ABSTRACT	11
THE TRIESTE DECLARATION	15
1. SCIENCE AND TECHNOLOGY, A SHARED HERITAGE OF MANKIND	17
2. THE WIDENING GAP IN SCIENCE AND TECHNOLOGY	19
3. THE FOUR AREAS OF SCIENCE AND TECHNOLOGY	23
A) Basic (curiosity-oriented) Sciences	23
B) Sciences in Application	25
C) Conventional “Low” Technology	26
D) Science-based “High” Technology	28
4. WHY HAS SCIENCE AND TECHNOLOGY LAGGED BEHIND IN THE SOUTH?	33
A) i) Lack of Meaningful Commitment towards Science, either Basic or Applied	33
ii) No Commitment to Self-Reliance in Technology	33
B) Inadequate Institutional and Legal Framework	34
C) The Manner in Which the Enterprise of Science Has Been Run	35

	Page
5. THE SUB-CRITICAL SIZE OF SCIENCE AND TECHNOLOGY IN THE SOUTH	36
6. STEPS NEEDED TO MAKE SCIENCE AND TECHNOLOGY STRONG IN DEVELOPING COUNTRIES	43
A) The Five Classes of Communities in a Developing Society which must Cooperate	43
B) Generous Patronage and Minimal Expenditures on Science and Technology	47
C) A Blueprint for Action	50
D) Utilisation of and Reciprocal Commitment and Responsibility of Scientists	59
i) Feeling of Inferiority regarding Indigenous Science and Technology	59
ii) Reciprocal Responsibility of Scientists and Technologists	61
E) The Universality of Science and the Brain Drain	63
F) The Role of Private Foundations for Science and Technology	65
G) Recognition that Creativity in Scientific Research is not Easy and that it has its own Mores and Modalities	66
7. SCIENCE AND TECHNOLOGY EDUCATION POLICY	67

	Page
8. INTERNATIONAL MODALITIES FOR THE GROWTH AND UTILISATION OF SCIENCE AND TECHNOLOGY	78
A) Recognition that the Growth of Science Education as well as of Sciences and Technology is basically a Problem for the South and a Long-term One	78
B) Concerted Action between the South and the North	79
i) 10% of the Aid Funds to be earmarked for Science and Technology	79
ii) Birthright of Southern Scientific Communities: Free Access to Scientific Literature	79
iii) United Nations Agencies (including the World Bank) and International Centres for Science	80
C) South-South Collaboration	81
9. DESIRABLE REGIONAL ARRANGEMENTS AND GLOBAL SCIENCE	84
10. ENVOI	87

1. International Institutions

Appendix I	The International Centre for Theoretical Physics	90
Appendix II	The Third World Academy of Sciences	99
Appendix 111	The Third World Network of Scientific Organisations	102
Appendix N	Scientific Centres contribute to Third World Productivity - the case of CGIAR	112

2. Impact of Sciences

Appendix V	Science, the Key to World Domination	114
Appendix VI	A State's Duties towards Science	117

3. Basic Sciences Sciences

Appendix VII	Basic Sciences	119
Appendix VIII	Infinite in All Directions	121

4. Technology

Appendix IX	Approaches to Science in Industry	123
Appendix X	Technologies of the Twenty-First Century	126
Appendix XI	Unequal Treaties	128

	Page	
5. <u>Country Experiences</u>		
Appendix XII	Japanese Industrial Development and Technology	131
Appendix XIII	Who are the Copy Cats Now?	138
Appendix XIV	Promoting Progress through Science in the USSR	144
Appendix XV	Science and Technology Policies in the Industrialization of a Developing Country South Korean Approaches	148
Appendix XVI	Beyond the Green Revolution	158
Appendix XVII	An Open Letter to the Prime Minister	162
Appendix XVIII	A Confucian Perspective on the Rise of Industrial East Asia	165
Appendix XIX	Technology and the Future of Europe	168
Appendix XX	Policy for Science in 1989 for the USA	171
