

CONTENTS

| | |
|--|----|
| CHAPTER 1. INTRODUCTION | 1 |
| 1.1. Objective | 1 |
| 1.2. Scope | 1 |
| 1.3. Overview of nuclear desalination | 2 |
| 1.4. Technical, safety, economic and organizational aspects of Nuclear desalination | 4 |
| 1.5. Steps to introduce nuclear desalination by Member States | 8 |
| | |
| PART I. OVERVIEW OF NUCLEAR DESALINATION | 15 |
| | |
| CHAPTER 2. STATUS AND PROSPECTS OF NUCLEAR DESALINATION | 17 |
| 2.1. Introduction | 17 |
| 2.1.1. Global water availability | 17 |
| 2.1.2. Global water withdrawals | 20 |
| 2.1.3. Water quality | 20 |
| 2.1.4. Importance of seawater desalination | 23 |
| 2.1.5. Energy sources for desalination | 25 |
| 2.2. Potential role of nuclear reactors for seawater desalination | 25 |
| 2.3. Nuclear plants in operation and under construction | 27 |
| 2.4. Desalination plants in operation and under construction | 27 |
| 2.5. Status of nuclear desalination experiences and activities | 32 |
| 2.5.1. Experiences in Kazakhstan and Japan | 32 |
| 2.5.2. Ongoing national programmes and activities | 33 |
| 2.5.3. IAEA activities | 36 |
| 2.6. Prospects for nuclear desalination | 37 |
| | |
| CHAPTER 3. NUCLEAR ENERGY FOR DESALINATION | 39 |
| 3.1. Introduction | 39 |
| 3.2. Survey of nuclear reactors in operation and under construction .. | 39 |
| 3.2.1. Nuclear reactors for electricity generation | 40 |
| 3.2.2. Nuclear reactors for co-generation | 41 |
| 3.2.3. Nuclear reactors for heat generation | 42 |

| | | |
|-----------------------------------|--|----|
| 3.3. | Survey of nuclear reactors under development | 42 |
| 3.3.1. | Design and development status of SMRs | 42 |
| 3.3.2. | Reactors with other than water coolants | 45 |
| 3.3.3. | Barge mounted reactors | 46 |
| 3.4. | Elements of the nuclear fuel cycle | 46 |
| 3.4.1. | Exploration, mining and milling of uranium | 48 |
| 3.4.2. | Conversion and enrichment of uranium | 48 |
| 3.4.3. | Fuel element fabrication | 48 |
| 3.4.4. | Fuel management in reactor operation | 49 |
| 3.4.5. | Spent fuel transport and storage | 49 |
| 3.4.6. | Reprocessing of spent fuel | 49 |
| 3.4.7. | Management and disposal of radioactive wastes | 50 |
| 3.5. | Availability of fuel (supply and demand) | 50 |
| 3.5.1. | Uranium resources | 50 |
| 3.5.2. | Uranium conversion and enrichment services | 52 |
| 3.5.3. | Fuel fabrication | 53 |
| 3.6. | Radioactive waste management | 53 |
| 3.6.1. | Categorization of wastes | 53 |
| 3.6.2. | Solid waste | 54 |
| 3.6.3. | Liquid wastes | 55 |
| 3.6.4. | Gaseous wastes | 55 |
| CHAPTER 4. DESALINATION PROCESSES | | 56 |
| 4.1. | Introduction | 56 |
| 4.2. | Common desalination processes | 57 |
| 4.2.1. | Multistage flash | 57 |
| 4.2.2. | Multi-effect distillation | 59 |
| 4.2.3. | Vapour compression | 61 |
| 4.2.4. | Reverse osmosis | 62 |
| 4.3. | Other technologies | 65 |
| 4.3.1. | Freezing | 65 |
| 4.3.2. | Ionexchange | 65 |
| 4.3.3. | Electrodialysis | 65 |
| 4.3.4. | Low temperature vacuum evaporation | 67 |
| 4.4. | Hybrid desalination systems | 67 |
| 4.4.1. | Combination of RO with distillation processes | 67 |
| 4.4.2. | Combination of vapour compression with distillation processes | 69 |
| 4.4.3. | Other combinations | 69 |
| 4.5. | Comparison of commercial desalination processes | 70 |

| | | |
|--------|--------------------------------|----|
| 4.6. | Technologies under development | 70 |
| 4.6.1. | Long tube vertical evaporator | 70 |
| 4.6.2. | Orbital tube evaporators | 72 |
| 4.6.3. | Long tube MSF | 73 |
| 4.6.4. | Membrane distillation (MD) | 74 |
| 4.6.5. | Solar powered MED | 74 |

**CHAPTER 5. COUPLING OF NUCLEAR REACTORS WITH
DESALINATION SYSTEMS** 75

| | | |
|--------|--|----|
| 5.1. | Introduction | 75 |
| 5.2. | Technical descriptions of various coupling concepts | 75 |
| 5.2.1. | Desalination plant coupled to power reactors | 76 |
| 5.2.2. | Desalination plant coupled to heating reactors | 76 |
| 5.2.3. | Desalination plant coupled to co-generation reactors | 80 |
| 5.3. | Design requirements for the couplings | 84 |
| 5.3.1. | Safety | 84 |
| 5.3.2. | Designlife | 84 |
| 5.3.3. | Operational flexibility | 85 |
| 5.3.4. | Reliability/availability | 86 |
| 5.3.5. | Design limitations | 86 |
| 5.4. | Operating experience with nuclear desalination | 86 |
| 5.4.1. | Nuclear desalination systems at Aktau, Kazakhstan | 86 |
| 5.4.2. | Nuclear desalination plants in Japan | 88 |
| 5.4.3. | Nuclear desalination projects in India | 91 |
| 5.5. | Operating Experience with nuclear district heating systems | 91 |
| 5.6. | Operating experience with nuclear process heat systems | 96 |
| 5.7. | Relevant issues of nuclear heat applications | 98 |

**PART II. SPECIAL ASPECTS AND CONSIDERATIONS
RELEVANT TO THE INTRODUCTION OF
NUCLEAR DESALINATION** 101

CHAPTER 6. TECHNICAL ASPECTS 103

| | | |
|--------|---|-----|
| 6.1. | Introduction | 103 |
| 6.2. | Desirable technical features of nuclear desalination plants | 104 |
| 6.2.1. | Some aspects of decision making processes | 104 |
| 6.2.2. | Importance of power to water ratio in selecting co-generation plants | 105 |

| | | |
|---|---|------------|
| 6.3. | Considerations for coupling with nuclear reactors | 106 |
| 6.3.1. | Backpressure and extraction schemes | 107 |
| 6.3.2. | Other schemes | 107 |
| 6.4. | Technical protection measures against product water contamination, including monitoring and isolation | 111 |
| 6.5. | Reliability and flexibility requirements | 112 |
| 6.5.1. | Reliability, availability and quality assurance | 112 |
| 6.5.2. | Flexibility | 114 |
| 6.5.3. | Transients | 115 |
| 6.5.4. | Design basis events | 115 |
| 6.6. | Floating nuclear desalination plants | 116 |
| 6.7. | Comparison of fossil and nuclear desalination | 117 |
| CHAPTER 7. SAFETY AND ENVIRONMENTAL CONSIDERATIONS | | 119 |
| 7.1. | Introduction | 119 |
| 7.2. | Radiation hazards from nuclear desalination systems | 121 |
| 7.2.1. | Radiation hazards under normal operation | 121 |
| 7.2.2. | Radiation hazards from nuclear power plant accidents | 122 |
| 7.3. | Safety issues in nuclear desalination | 122 |
| 7.3.1. | Nuclear reactor safety | 123 |
| 7.3.2. | Reactor safety considerations introduced by the addition of a desalination plant | 127 |
| 7.4. | Regulatory and licensing aspects | 130 |
| 7.4.1. | Regulatory codes and standards | 130 |
| 7.4.2. | Licensing procedures and stages | 131 |
| 7.4.3. | Inspection and enforcement | 131 |
| 7.4.4. | Decommissioning of nuclear desalination facilities | 131 |
| 7.5. | Environmental effects of nuclear desalination systems | 132 |
| 7.5.1. | Non-nuclear environmental effects | 132 |
| 7.5.2. | Nuclear environmental effects | 133 |
| CHAPTER 8. ECONOMICS OF NUCLEAR DESALINATION | | 135 |
| 8.1. | Introduction | 135 |
| 8.2. | Product water cost and its components | 137 |
| 8.2.1. | Main factors influencing overall product water cost | 138 |
| 8.2.2. | Design and planning parameters | 145 |
| 8.3. | Cost evaluation methodology | 148 |
| 8.3.1. | Single purpose plants | 148 |

| | | |
|--------|---|------------|
| 8.3.2. | Co-generation plants | 148 |
| 8.3.3. | IAEA Desalination Economic Evaluation Programme (DEEP) | 152 |
| 8.3.4. | Other international methods | 154 |
| 8.4. | Reliability of cost estimates | 155 |
| 8.5. | Economic comparison with fossil fuel based desalination | 156 |
| 8.6. | Cost and price of water | 158 |
| 8.6.1. | Value of desalted water | 158 |
| 8.6.2. | Prices of water and power | 158 |
| 8.6.3. | Cash flow, payback period and rate of return | 159 |
| 8.7. | Financing | 159 |

CHAPTER 9. NATIONAL REQUIREMENTS 161

| | | |
|--------|--|-----|
| 9.1. | Introduction | 161 |
| 9.2. | Organizational requirements | 161 |
| 9.3. | Basic requirements | 162 |
| 9.3.1. | Staff development | 162 |
| 9.3.2. | Industries | 163 |
| 9.3.3. | Technical information and services | 164 |
| 9.3.4. | Licensing and regulations | 165 |
| 9.4. | Project management requirements | 166 |
| 9.5. | Public acceptance | 166 |
| 9.6. | International agreements and commitments | 167 |
| 9.6.1. | Non-proliferation agreements and commitments | 167 |
| 9.6.2. | Safety agreements and commitments | 169 |
| 9.6.3. | Other agreements involving the IAEA | 171 |

PART III. STEPS TO INTRODUCE NUCLEAR DESALINATION 175

CHAPTER 10. POLICY ISSUES 177

| | | |
|---------|--|------------|
| 10.1. | Introduction | 177 |
| 10.2. | Overview of relevant national policies | 178 |
| 10.2.1. | National development policy | 178 |
| 10.2.2. | National energy and water policy | 179 |
| 10.2.3. | Policy concerning international relations | 180 |
| 10.2.4. | Regional co-operation | 180 |
| 10.3. | Specific policy issues concerning nuclear energy | 182 |
| 10.3.1. | Regulatory issues | 183 |

| | | |
|---|--|---------|
| 10.3.2] | Environmental protection | 183 |
| 10.3.3. | National participation in plant design, construction and operation | 183 |
| 10.3.4. | The nuclear fuel cycle | 184 |
| 10.3.5. | Waste management and decommissioning | 184 |
| 10.4. | Specific policy issues concerning water management | 185 |
| 10.4.1. | Water management policy | 185 |
| 10.4.2. | Market mechanism | 186 |
| 10.4.3. | Capability building | 187 |
| 10.4.4. | Environmental protection | 187 |
| 10.5. | Policy issues in financing | 188 |
| 10.5.1. | Investment requirements | 188 |
| 10.5.2. | Electricity and water prices | 188 |
| 105.3. | Basic financing and contracting approaches | 188 |
| CHAPTER 11. NUCLEAR DESALINATION PLANNING | | 190 |
| 11.1. | Introduction | 190 |
| 11.2. | National water planning | 190 |
| 11.2.1. | National water structure | 191 |
| 11.2.2. | Availability of water resources | 191 |
| 11.2.3. | Water demand forecast | 192 |
| 11.2.4. | Water supply planning | 193 |
| 11.3. | National energy planning | 193 |
| 11.3.1. | National energy structure | 194 |
| 11.3.2. | Availability of energy resources | 194 |
| 11.3.3. | Energy demand forecast | 194 |
| 11.3.4. | Energy supply planning | 195 |
| 11.4. | Specific elements of nuclear desalination planning | 195 |
| 11.4.1. | Plant capacity | 195 |
| 11.4.2. | Type of energy | 196 |
| 11.4.3. | Programme schedule | 197 |
| 11.4.4. | Financing | 197 |
| 11.4.5. | National infrastructure and participation | 198 |
| 11.4.6. | Availability of relevant personnel resources and training programme | 198 |
| 11.4.7. | Siting considerations | 198 |
| 11.4.8. | Licensing considerations | 199 |
| 11.4.9. | Public acceptance | 199 |
| 11.4.10. | Project management | 200 |
| 11.4.11. | Expected benefits and constraints | 201 |

| | | |
|----------|--|-----|
| 11.4.12. | International/bilateral co-operation | 201 |
| 11.5. | Long term nuclear desalination expansion planning | 202 |
| 11.5.1. | Expansion planning of a nuclear desalination programme | 202 |
| 11.5.2. | Considerations of expansion parameters and constraints | 202 |
| 11.5.3. | Admissible unit size | 203 |
| 11.5.4. | Economic optimization | 203 |

CHAPTER 12. SITING OF NUCLEAR DESALINATION PLANTS 204

| | | |
|---------|--|------------|
| 12.1. | Introduction | 204 |
| 12.2. | Nuclear desalination plant site characteristics and requirements | 205 |
| 12.2.1. | Site location and infrastructure | 205 |
| 12.2.2. | Effects of the site on the plant | 206 |
| 12.2.3. | Impact of the plant on the site | 207 |
| 12.2.4. | Impact of extreme external events | 208 |
| 12.2.5. | Socioeconomical and cultural aspects | 208 |
| 12.3. | Site survey stage | 209 |
| 12.3.1. | Procedure and methodology | 210 |
| 12.3.2. | Organization and management | 213 |
| 12.3.3. | Selection of preferred candidate sites | 213 |
| 12.4. | Site evaluation stage | 214 |
| 12.4.1. | Procedure and methodology | 214 |
| | 12.4.2. Organization, staffing and scheduld | 217 |
| 12.5. | Site review and approval by the regulatory body | 217 |

CHAPTER 13. FEASIBILITY OF THE FIRST NUCLEAR DESALINATION PROJECT 219

| | | |
|--------|--|------------|
| 13.1. | Introduction | 219 |
| 13.2. | Scope and responsibility for the feasibility study | 219 |
| 13.3. | Market analysis of potable water and electricity | 221 |
| 13.4. | Determination of plant capacity and site | 222 |
| 13.5. | Identification of supply options | 222 |
| 13.6. | Technical aspects of supply options | 226 |
| 13.7. | Institutional aspects | 227 |
| 13.8. | Infrastructure requirements and development | 227 |
| 13.9. | National participation | 228 |
| 13.10. | Project schedule and implementation | 230 |
| 13.11. | Comparative economic evaluation | 230 |

| | |
|---|------------|
| 13.12. Financial assessment | 231 |
| 13.13. Overall cost/benefit assessment | 232 |
| CHAPTER 14. NUCLEAR DESALINATION PLANT ACQUISITION | 236 |
| 14.1. Introduction | 236 |
| 14.2. Overall schedule | 236 |
| 14.3. Role of the local organization | 237 |
| 14.4. Data and information requirements | 239 |
| 14.5. Definition of contractual approaches | 240 |
| 14.5.1. Turnkey contracts | 241 |
| 14.5.2. Split package | 243 |
| 14.5.3. Multiple package | 243 |
| 14.5.4. Independent projects (BOT and BOO) | 244 |
| 14.5.5. Use of architect-engineers | 245 |
| 14.6. Bid invitation specifications | 246 |
| 14.6.1. Purpose, scope and procedures | 246 |
| 14.6.2. Terms and conditions (draft contract) | 248 |
| 14.7. Bid preparation | 249 |
| 14.8. Bid evaluation | 250 |
| 14.9. Contract negotiations | 254 |
| 14.10. Financing arrangements | 255 |
| 14.11. International agreements and commitments | 257 |
| CHAPTER 15. OVERVIEW OF DESIGN, CONSTRUCTION AND OPERATION | 258 |
| 15.1. Introduction | 258 |
| 15.2. Project management | 259 |
| 15.2.1. Project management in the planning phase | 259 |
| 15.2.2. Project management in the execution phase | 260 |
| 15.2.3. Structure of project management | 261 |
| 15.2.4. Project execution | 261 |
| 15.2.5. Project control | 262 |
| 15.3. Quality assurance and quality control | 262 |
| 15.4. Design and engineering | 265 |
| 15.5. Civil works | 266 |
| 15.6. Manufacturing of nuclear reactor equipment and components .. | 267 |
| 15.7. Manufacturing of desalination unit equipment and components .. | 268 |
| 15.8. Installation of equipment, components and systems | 269 |
| 15.9. Commissioning | 269 |

15.10. Operation and maintenance 270
