

CONTENTS

	B.M. McCoy and T.T. Wu: Indistinguishable-mass particles	VIII
	C. ITZYKSON: Duality for discrete Ising	IX
	J. ERNJUSTIN: Large order estimates in perturbation theory	X
	G. YARISI: The Borel transform and the renormalization group	XI
	E. BRÉZIN: Planar diagrams	XII
	M. KAROWSKI: Exact Z-matrices and form factors in 1 + 1 dimensional field theories	XIII
	Models with soliton behaviour	
	A. D'ADDA, M. LÜSCHER and P. DI VICCHIA: Topology and higher symmetries of the two-dimensional nonlinear σ model	XIV
Foreword		iii
Introduction		1
EXTENDED SYSTEMS IN FIELD THEORY		
	<i>organised by J L Gervais & A Neveu</i>	
I	J.-L. GERVAIS and A. NEVEU: Introduction	7
II	S. MANDELSTAM: Vortices and quark confinement in non-Abelian gauge theories	12
III	Y. NAMBU: Magnetic and electric confinement of quarks	17
IV	T.D. LEE: Examples of four-dimensional soliton solutions and abnormal nuclear states	21
V	S.-J. CHANG: Classical solution in the massive Thirring model	26
VI	A. NEVEU: Semiclassical quantization methods in field theory	32
VII	R. JACKIW: The quantum theory of solitons and other non-linear classical waves	40
VIII	J.-L. GERVAIS, A. JEVICKI and B. SAKITA: Collective coordinate method for quantization of extended systems	48
IX	N.H. CHRIST: Quantum expansion of soliton solutions	61
X	S.-J. CHANG: Hartree-type approximation applied to a ϕ^4 field theory	68
XI	S. MANDELSTAM: Soliton operators for the quantized sine-Gordon equation	74
XII	B. SCHROER: Classical aspects and fluctuation-behaviour of two dimensional models in statistical mechanics and many body physics	81
XIII	K.G. WILSON: Quarks on a lattice, or, the colored string model	98
XIV	L. SUSSKIND and J. KOGUT: New ideas about confinement	115
XV	C. ITZYKSON: Gauge fields on a lattice	135
NON-PERTURBATIVE ASPECTS IN QUANTUM FIELD THEORY		
	<i>edited by E Brézin & J L Gervais</i>	
I	E. CORRIGAN: Self-dual solutions to Euclidean Yang-Mills equations	147
II	J. MADORE, J. L. RICHARD and R. STORA: An introduction to the twistor programme	165
III	J.-L. GERVAIS: Collective coordinates with non-trivial dynamics	183
IV	D.J. GROSS: A theory of the strong interactions	195
V	D. OLIVE: Magnetic monopoles	217
VI	F. ENGLERT and P. WINDEY: Dynamical and topological considerations on quark confinement	225
VII	S. SCIUTO: Difficulties in fixing the gauge in non-Abelian gauge theories	233

VIII	B.M. McCOY and T.T. WU: Indeterminate-mass particles	2
IX	C. ITZYKSON: Duality for discrete lattice gauge fields	2
X	J. ZINN-JUSTIN: Large order estimates in perturbation theory	2
XI	G. PARISI: The Borel transform and the renormalization group	2
XII	E. BRÉZIN: Planar diagrams	2
XIII	M. KAROWSKI: Exact S-matrices and form factors in 1 + 1 dimensional field theoretic models with soliton behavior	2
XIV	A. D'ADDA, M. LÜSCHER and P. DI VECCHIA: Topology and higher symmetries of the two-dimensional nonlinear σ model	2
XV	T.T. WU: Twodimensional Yang-Mills theory in the leading $1/N$ expansion	2
XVI	D.R. NELSON: Superfluidity and the two-dimensional XY model .	3
XVII	A. LUTHER: Bosonized fermions in three dimensions	3
XVIII	G. TOULOUSE: Symmetry and topology concepts for spin glasses and other glasses	3

COMMON TRENDS IN PARTICLE AND CONDENSED MATTER PHYSICS

edited by E Brézin, J L Gervais & G Toulouse

D.J. THOULESS: Introduction to localization	3
E. ABRAHAMS: Conductivity scaling and localization	3
F. WEGNER: Disordered electronic system as a model of interacting matrices	3
S. KIRKPATRICK: Status report on spin glasses (not included in this report)	
G. PARISI: Mean field theory for spin glasses	3
B. DERRIDA: The random energy model	3
C. DE DOMINICIS: Towards a mean field theory of spin glasses: The TAP route revisited	3
G. TOULOUSE, J. VANNIMENUS: On the connection between spin glasses and gauge field theories	3
C. REBBI: Monte Carlo simulations of lattice gauge theories	3
J.-M. DROUFFE: Large dimension expansions and transition patterns in lattice gauge theories	3
J.B. KOGUT: Progress in lattice gauge theory	3
D. HORN: Phase structure of the Z(2) gauge and matter theory	4
S. MANDELSTAM: General introduction to confinement	4
C.G. CALLAN Jr.: A simple picture of the weak-to-strong coupling transition in quantum chromodynamics	4
B.A. BERG: Quantum fluctuations in a multiinstanton background	4
J. FRÖHLICH: Some comments on the crossover between strong and weak coupling in SU(2) pure Yang-Mills theory	4
J.-L. GERVAIS, A. NEVEU: String dynamics in Q.C.D.	4
C.B. THORN: Dual models and strings: the critical dimension	4
C.B. THORN: Duality and finite size effects in six vertex models	4
M. NAUENBERG, D. SCALAPINO: Scaling at a bifurcation point	4
T.W.B. KIBBLE: Some implications of a cosmological phase transition	4
