

## TABLE OF CONTENTS

### Preface

### CH. I. General Properties of Electromagnetic Waves in Dielectric Media

1 . 1 .	Plasma as a dielectric medium.....	1
1 . 2 .	Two time-scale analysis.....	4
1 . 3 .	Analysis with two time and space scales.....	11
1 . 4 .	Instabilities .....	16
1 . 5 .	Nyquist technique for stability analysis.....	23
1 . 6 .	Absolute and convective instabilities .....	31

### CH. II. Linear Waves and Instabilities in Uniform Unmagnetized Plasmas

11 . 1 .	Solution of the linearized Vlasov equation.....	40
II . 2 .	Landau damping and phase mixing of ballistic modes .....	46
11 . 3 .	Particle trapping and the breakdown of linearization.....	52
11 . 4 .	Normal modes.....	56
11 . 5 .	Instabilities .....	59

### CH. III. Linear Waves and Instabilities in Uniform Magnetized Plasmas

111 . 1 .	Magnetized Vlasov equation with the guiding-center transformation.....	69
111 . 2 .	Solution of the linearized equation in the electrostatic limit .....	72
111 . 3 .	Quasi-electrostatic and quasi-transverse approximations..	78
111 . 4 .	Electromagnetic dielectric tensor for magnetized warm plasmas.....	81
111 . 5 .	Normal modes.....	85

<b>III. 6.</b>	Instabilities .....	<b>92</b>
<b>III. 7.</b>	Kinetic theory of low-frequency magnetohydrodynamic waves	<b>97</b>
CH. IV. <u>Linear Waves and Instabilities in Nonuniform Plasmas</u>		
<b>IV.1.</b>	Geometric optics and the ray equations .....	<b>109</b>
<b>IV.2.</b>	Derivation of the wave (quasi-particle) kinetic equation.	<b>115</b>
<b>IV.3.</b>	Cutoff, resonance, and WKB connection formulae .....	<b>118</b>
<b>IV.4.</b>	Tonk-Dattner resonance and resonant absorption .....	<b>128</b>
<b>IV.5.</b>	Linear mode conversion .....	<b>133</b>
<b>IV.6.</b>	Linear gyrokinetic equation in nonuniform plasmas .....	<b>140</b>
<b>IV.7.</b>	Drift instabilities in eikonal approximation .....	<b>145</b>
<b>IV.8.</b>	Convective damping of drift waves in a sheared magnetic field: an eigenmode analysis .....	<b>146</b>
CH. V. <u>Topics in Nonlinear Plasma Theory</u>		
<b>V.1.</b>	Quasi-linear theory .....	<b>152</b>
<b>V.2.</b>	Ponderomotive force .....	<b>161</b>
<b>V.3.</b>	Parametric instabilities .....	<b>166</b>
