

CONTENTS

Operations on Machine Tools of the Lathe Type	1
Lathes Designed for Turning Duplicate Parts	26
Typical Machining Operations on Turret Lathes	45
Automatic Machines which Turn Parts from Bar Stock	70
Automatic Machines which Turn Parts Held in Chucks	88
Cutting External Screw Threads with Dies	116
Milling External and Internal Screw Threads	127
Grinding Screw Threads	135
Tapping with Single- and Multiple-Spindle Machines	144
Drilling Holes with Machines of Single-Spindle Type	155
Drilling Holes with Machines of Multiple-Spindle Type.	169
Boring with Standard and Special Machines	186
Rifling Gun Barrels	213
Preliminary Cutting Operations on Bars and Plates	226
Punching and Riveting Sheets and Plates	245
Planing, Shaping and Slotting Operations	261
Milling with Machines of Horizontal-Spindle Type	277
Milling with Vertical Machines and Attachments	306
Multiple-Spindle Milling Operations	316
Milling Irregular Forms by Reproducing a Model	328
Broaching with Vertical and Horizontal Machines	355
Grinding External Surfaces of Circular Cross-Section	375
Grinding Holes or Internal Surfaces	387
Centerless Grinding Operations	400
Grinding Flat or Plane Surfaces	409
Honing and Superfinishing Processes	427
Examples of Gear Cutting and Gear-Tooth Finishing	442
Machine Tools Designed for a Single Purpose	465
Miscellaneous Applications of Standard and Special Tools	490
Index	545
