

CONTENTS.

CHAPTER I.

SPEED, VELOCITY AND ACCELERATION

	PAGE
Speed	1
Displacement	2
Vector quantities	3
Velocity	4
Parallelogram of velocities	5
Triangle and polygon of velocities	8
Relative velocity	12
Angular velocity	18
Acceleration	24
Component accelerations	26
Relative acceleration	26
Velocity and acceleration of the centre of mass of a system of particles	27
Equation of motion with constant acceleration	28
Space-time and other curves for variable acceleration	34
Harder worked examples	42
Vertical motion under gravity	47
Motion on a smooth inclined plane	53
Time down chord of vertical circle	54
Lines of quickest descent	5 4

CHAPTER II.

FORCE, MOMENTUM, WORK AND ENERGY.

Momentum	57
Newton's Laws of Motion	58
Newton's Law of Gravitation	59
Units of force	59
Weight and mass	60
Parallelogram of forces	61
Conservation of linear momentum	61
Effective force	62
Friction	62
Connected masses	69
Atwood's Machine	7
Work, energy and power	8
Work done by a couple	92
Transmission of Power by belts	93

	PAGE
Tension in elastic strings	94
Principle of energy. Conservative forces	97-
Force-space and indicator diagrams	108
Harder worked examples	109
Worked examples requiring calculus	115
Units and dimensions	125

CHAPTER III.

IMPULSIVE FORCES. IMPACT OF ELASTIC BODIES.

Impact of two inelastic bodies	131
Motion of shot and gun	134
Impact of water on a surface	133
Impulsive tensions in strings	140
Impact of elastic bodies.	149
Direct impact of two spheres	151
Impact on a fixed elastic plane	159
Oblique impact of two spheres	165
Harder worked examples	174

CHAPTER IV.

PROJECTILES.

Time of flight and range on a horizontal plane	189
Range on an inclined plane	189
Harder worked examples	196
The path of a projectile is a parabola	200
The bounding parabola	203
Problems involving impacts of projectiles	211

CHAPTER V.

MOTION IN A CIRCLE

Normal acceleration	216
The conical pendulum	220
Governors of steam engines	221
Motion of a railway carriage on a curved track	227
Equilibrium of a ring on a rotating wire	235
Effect of the earth's rotation on gravity	236
Tension in a rotating ring or belt	238
Motion in a vertical circle	240

CHAPTER VI.

SIMPLE HARMONIC MOTION.

Definition and fundamental equation	253
Simple harmonic motion in a straight line	254
Particle on a smooth table attached to a spring	264
Particle suspended by a spring or elastic string	265
The simple pendulum	273'
Composition of S.H.M.s. in the same straight line	279
Composition of S.H.M.s. at right angles	280

CHAPTER VII.

MOTION OF A PARTICLE IN TWO DIMENSIONS.

	PAGE
Components of velocity and acceleration—	
Cartesian	291
Along and perpendicular to radius vector	292
Tangential and normal	293
Angular momentum	294
Central forces	299
Motion on a smooth cycloid under gravity	301
Motion in a resisting medium	307
Motion in a straight line under the inverse square law	310
The hodograph	313

CHAPTER VIII.

MOTION OF A RIGID BODY ABOUT A FIXED AXIS.

Kinetic energy of a rotating body	916
Moment of Inertia and Radius of Gyration	317
Moment of inertia of a rod	317
" " " rectangular lamina	318
" " " parallelogram	319
" " " circular ring	320
" " " circular disc	320
" " " solid sphere	321
Thworem of parallel axes	322
Moment of inertia of a lamina about a normal axis	323
Products of inertia	324
Moment of inertia of a rectangular prism	326
" " " hollow sphere	327
" " " circular cylinder	323
Velocity acquired by a rigid body rotating about a fixed axis under gravity	330
Moment of inertia of a flywheel	332
D'Alembert's Principle	335
Moment of effective forces about axis of rotation	336
Equation of motion for a body rotating about a fixed axis	336
Compound pendulum	337
Centre of oscillation	338
Pressures on the axis of rotation	347
Impulsive forces	349

CHAPTER IX.,

MOTION OF A RIGID BODY IN TWO DIMENSIONS.

Instantaneous Centre	354
Centre of no acceleration	356
Translation and rotation	357
Angular momentum and kinetic energy of a rigid body moving in two dimensions	359
Impulsive forces	364
ANSWERS TO THE EXAM P L E S .	37
