

# CONTENTS

Preface	v
Welcome Address <i>H. Nomura</i>	1
The Chiral Phase Transition with Long Range Forces <i>T. W. Appelquist</i>	3
Conformal Phase Transition <i>V. A. Miransky</i>	11
Custodial Symmetry, Flavor Physics, and the Triviality Bound on the Higgs Mass <i>R. S. Chivukula, E. H. Simmons and B. A. Dobrescu</i>	29
Top Quark Condensate in Grand Unified Theories <i>I. Inukai, M. Tanabashi and K. Yamawaki</i>	44
Topcolor <i>C. T. Hill</i>	54
Progress on Symmetry Breaking and Generational Mixing in Topcolor-Assisted Technicolor <i>K. Lane</i>	72
Signatures for Low-Scale Technicolor at Hadron Colliders <i>E. Eichten</i>	88
Colorons: Theory and Phenomenology <i>E. H. Simmons</i>	100
Compositeness Condition in the Nambu-Jona-Lasinio Model <i>K. Akama</i>	107
Existence of Sigma Meson in Pi-Pi Scattering <i>M. Harada</i>	114
Dynamical Nonsupersymmetry Breaking <i>B. Holdom</i>	121

Phase Structure of Lattice QCD for General Number of Flavors <i>Y. Iwasaki</i>	135
An Evaluation of the Analytic Continuation by Duality Technique <i>T. Takeuchi, L. C. Goonetilleke, S. R. Ignjatovic and L. C. R. Wijewardhana</i>	150
Zero Temperature Phase Transitions in $2+1$ Dimensional Gauge Theories <i>L. C. R. Wijewardhana</i>	157
Non-Trivial Infrared Structure in $(2+1)$ -Dimensional Quantum Electrodynamics and Non-fermi Liquid Behaviour <i>N. E. Mavromatos</i>	164
Non-Perturbative Renormalization Group Approach to Dynamical Chiral Symmetry Breaking in Gauge Theories <i>K.-I. Aoki</i>	171
Strong Coupled QED: Towards Definite Results <i>G. Schierholz</i>	186
On Existence of Nontrivial Fixed Points in Large $N$ Gauge Theory <i>J. Nishimura</i>	200
The Effective Potential of Gauged NJL Model in Magnetic Field <i>I. Brevik, D. M. Gitman and S. D. Odintsov</i>	208
Subtractive Renormalization of Strong-Coupling Quenched QED in Four Dimensions <i>F. T. Hawes, T. Sizer and A. G. Williams</i>	215
Singular Integral Equation in Strong Quantum Electrodynamics <i>D. Atkinson</i>	222
RG Fixed Points and Composite Gauge Invariance in SUSY Gauge Theories <i>K. Intriligator</i>	228
Duality in Supersymmetric Field Theory: General Conceptual Background and an Application to Real Particle Physics <i>M. J. Strassler</i>	237

Duality of Supersymmetric Standard Models <i>N. Maekawa</i>	251
Models of Dynamical Supersymmetry Breaking <i>L. Randall</i>	258
Recent Developments in Dynamical Supersymmetry Breaking <i>S. Thomas</i>	272
Chirality vs Duality <i>P. Pouliot</i>	286
Effective Supersymmetry <i>A. G. Cohen</i>	291
An Analysis on a Supersymmetric Chiral Gauge Theory with No Flat Direction <i>N. Kitazawa</i>	297
Duality of $N = 1$ Supersymmetric $SO(10)$ Gauge Theory with Matter in the Spinorial Representation <i>T. Kawano</i>	304
Supersymmetric Nonlinear Realization <i>T. Kugo</i>	311
Dynamical Gauge Bosons and Grand Unified Theory <i>M. Bando</i>	327
Solving Gauge-Field Theory by Discretized Light-Cone Quantization <i>H. C. Pauli</i>	342
Wilson Loop on a Light-Cone Cylinder <i>S. S. Pinsky</i>	353
Subtleties in the Light-Cone Representation <i>G. McCartor</i>	360
Two Dimensional QCD and the Non-Abelian Coulomb Gas <i>C. R. Gattringer, L. D. Paniak and G. W. Semenoff</i>	367
Thirring Model in Lower Dimensions: Nonperturbative Approaches <i>Y. Kim</i>	374

Monte Carlo Study of the 3D Thirring Model S. Hands ( <i>UKQCD Collaboration</i> )	383
Chiral Dynamics in Weak, Intermediate, and Strong Coupling QED in Two Dimensions <i>Y. Hosotani</i>	390
Disoriented Chiral Condensates of QCD <i>M. Suzuki</i>	398
List of Participants	405
