

CONTENTS

1.	INTRODUCTION	1
1.1.	Background	1
1.2.	Objective	2
1.3.	Scope	2
1.4.	Structure	3
2.	THE GEOLOGICAL DISPOSAL CONCEPT	3
2.1.	Introduction	3
2.2.	Disposal systems	8
2.2.1.	Basic system concepts	8
2.2.2.	Repository design	9
2.2.3.	Design and construction constraints	11
2.2.3.1.	Consolidated hard rocks	11
2.2.3.2.	Low to medium strength rocks	12
2.2.3.3.	Plastic rocks	13
2.2.4.	Additional constraints	13
2.3.	Developing a geological repository	14
2.4.	Developing the safety case	16
3.	NEAR FIELD COMPONENTS AND PROCESSES	23
3.1.	The groundwater environment	25
3.1.1.	Groundwater flow rate	25
3.1.1.1.	Environments with groundwater flow	25
3.1.1.2.	Environments with insignificant groundwater flow	26
3.1.2.	Groundwater chemistry	27
3.2.	Waste forms	29
3.2.1.	Spent fuel	29
3.2.2.	High level waste	30
3.2.3.	Cement and concrete	31.
3.2.4.	Bitumen	32
3.2.5.	Metallic waste	32
3.3.	Container materials	32
3.3.1.	Mild steel and cast iron	33
3.3.2.	Stainless steel	33

3.3.3.	Copper and titanium	33
3.3.4.	Concrete	34
3.4.	Backfill materials	34
3.4.1.	Role of clay buffers in HLW/spent fuel, saturated rock EBSs	35
3.4.2.	Role of the repository backfill	36
3.5.	Construction materials	37
3.6.	Mobilization of radionuclides	37
3.6.1.	Wasteform dissolution	38
3.6.2.	Transport mechanisms through the buffer and backfill	40
3.7.	Gas production and its consequences	41
4.	FAR FIELD BARRIERS AND PROCESSES	41
4.1.	Transport in groundwater	43
4.2.	Solute pathways	43
4.2.1.	Rock matrix properties	43
4.2.2.	Fractures and fracture zones	44
4.3.	Hydrogeology and water movement	45
4.3.1.	Flow of water	45
4.3.2.	Water pathways	45
4.3.3.	Channelling	46
4.4.	Water chemistry and chemical retardation	46
4.4.1.	Chemical setting and sorption	46
4.4.2.	Rock and water chemistry	46
4.4.3.	Importance of secondary minerals for retardation processes	47
4.5.	Transport by groundwater	48
4.5.1.	Advection and dispersion	48
4.5.2.	Transfer between water and rock	48
4.5.3.	Sorption and retardation	48
4.5.4.	Colloidal transport	49
4.6.	Flow in partially saturated rocks — tuffs	50
4.7.	Long term stability of the disposal system	51
4.7.1.	Tectonic stability	51
4.7.2.	Potential impacts of climate change	5 2
5.	CONFIDENCE IN ADEQUATE ISOLATION	53
5.1.	Containment requirements	53
5.2.	Coupled processes	54

5.3.	Underground investigations	55
5.3.1.	Underground research laboratories	55
5.3.2.	Demonstration activities	55
5.4.	Safety and performance assessments	55
5.4.1.	Structuring safety and performance assessments	57
5.4.2.	Uncertainty management	59
5.4.3.	Testing models	62
5.5.	Confidence building in results of SA/PA	63
5.5.1.	Natural analogues	64
5.5.2.	Palaeohydrogeology and climate change	65
5.6.	The current position	66
6.	SUMMARY AND CONCLUSIONS	67
	REFERENCES	73
	CONTRIBUTORS TO DRAFTING AND REVIEW	81
