

CONTENTS

1.	INTRODUCTION	1
1.1.	Objective and scope	1
1.2.	Motivation for nuclear energy	1
1.3.	Market size	2
1.3.1.	District heating	2
1.3.2.	Water desalination	6
1.3.3.	Industrial process heat applications	6
1.3.4.	Ship propulsion	7
1.3.5.	Space applications	7
1.3.6.	Innovative applications	7
1.4.	Potential nuclear solutions for non-electric energy supply	8
1.4.1.	District heating	8
1.4.2.	Water desalination	9
1.4.3.	Process heat supply	9
1.4.4.	Ship propulsion	9
1.4.5.	Supply of spacecraft energy	9
1.4.6.	Innovative applications	10
1.5.	Economic competitiveness	10
1.6.	Prospects	11
1.6.1.	Near term	11
1.6.2.	Long term	12
1.7.	Structure	14
2.	MOTIVATION AND BACKGROUND	15
2.1.	Background	15
2.2.	Current status	16
2.3.	Future developments	17
2.3.1.	Demand growth	18
2.3.2.	Impact of climate change considerations	19
2.3.3.	Technological advancement to the point of commercial application	19
2.3.4.	Changes in the social environment	21
2.4.	Definition of the baseline: competitiveness of electricity generated by nuclear energy	21

3.	EVALUATION METHOD	25
3.1.	Quantitative assessment of the ultimate market size	25
3.2.	Qualitative ranking of nuclear prospects	26
3.3.	Presentation of results by world regions and selected countries ...	28
3.4.	Illustrative examples of the method	29
3.4.1.	Generic example	29
3.4.2.	Specific example: the case of nuclear desalination in North Africa and the Middle East	30
4.	DISTRICT HEATING	31
4.1.	Market characterization	31
4.1.1.	Market size	31
4.1.2.	Market features	32
4.1.2.1.	Principal competitors and types of competition	34
4.1.2.2.	Medium and temperature range required	34
4.1.2.3.	Need for a heat transportation network	34
4.1.2.4.	Typical capacity ranges	34
4.1.2.5.	Intermittent supply mode	35
4.1.2.6.	Supply reliability	35
4.1.2.7.	Supply security	35
4.1.2.8.	Impact of specific nuclear considerations	35
4.1.2.9.	Market competitiveness	35
4.1.3.	Market potential for nuclear penetration	36
4.2.	Potential nuclear solutions	38
4.3.	Economic competitiveness	39
4.4.	Current and prospective market	41
4.4.1.	Current use of nuclear energy	41
4.4.2.	Prospects for nuclear energy in the near term (2000–2020) .	44
4.4.3.	Prospects for nuclear energy in the long term (2020–2050) .	44
5.	WATER DESALINATION.....	47
5.1.	Market characterization	47
5.1.1.	Market size	47
5.1.1.1.	Water supply sustainability	52
5.1.2.	Market features	53
5.1.2.1.	Principal competitors and types of competition	53

5.1.2.2.	Available desalination technologies	53
5.1.2.3.	Required type of energy	54
5.1.2.4.	Siting and the problem of energy delivery	54
5.1.2.5.	Typical capacity ranges	55
5.1.2.6.	Supply mode and reliability	56
5.1.2.7.	Impact of specific nuclear considerations	56
5.1.3.	Market potential for nuclear penetration	57
5.2.	Potential nuclear solutions	58
5.3.	Economic competitiveness	58
5.3.1.	Correlation with the competitiveness of electricity generated by nuclear energy	61
5.3.2.	Competitive position of nuclear desalination	61
5.3.3.	Interregional comparison and the effect of technology selection	61
5.4.	Current and prospective market	62
5.4.1.	Current use of nuclear energy	62
5.4.2.	Prospects for nuclear energy in the near term (2000-2020) .	62
5.4.3.	Prospects for nuclear energy in the long term (2020-2050) .	63

6. INDUSTRIAL PROCESS HEAT APPLICATIONS

6.1.	Market characterization	68
6.1.1.	Market size	68
6.1.2.	Market features	72
6.1.2.1.	Main heat consumers	72
6.1.2.2.	Required temperature ranges	73
6.1.2.3.	Typical capacity ranges	74
6.1.2.4.	Heat transportation	74
6.1.2.5.	Supply mode	75
6.1.2.6.	Supply reliability	76
6.1.2.7.	Impact of specific nuclear considerations	76
6.1.2.8.	Competitive market with growing supply options ..	76
6.1.3.	Market potential for nuclear penetration	76
6.2.	Potential nuclear solutions	77
6.3.	Economic competitiveness	80
6.4.	Current and prospective market	81
6.4.1.	Current use of nuclear energy	81
6.4.2.	Prospects for nuclear energy in the near term (2000-2020) .	81
6.4.3.	Prospects for nuclear energy in the long term (2020-2050) .	81

7.	SHIP PROPULSION	89
7.1.	Market characterization	89
7.1.1.	Market size	89
7.1.2.	Market features	91
7.1.2.1.	Typical size	91
7.1.2.2.	Transportation mode and reliability	91
7.1.2.3.	Impact of specific nuclear considerations	94
7.1.2.4.	Market competitiveness	94
7.1.3.	Market potential for nuclear penetration	94
7.2.	Potential nuclear solutions	95
7.3.	Economic competitiveness	9 8
7.4.	Current and prospective market	99
7.4.1.	Current use of nuclear energy	99
7.4.2.	Prospects for nuclear energy in the near term (2000-2020) .	99
7.4.3.	Prospects for nuclear energy in the long term (2020-2050) .	100
8.	SPACEAPPLICATIONS	103
8.1.	Market characterization	103
8.1.1.	Market size and potential for nuclear penetration	103
8.1.2.	Market features	106
8.1.2.1.	Typical power ranges	106
8.1.2.2.	Supply duration	106
8.1.2.3.	Supply reliability	107
8.1.2.4.	Impact of specific nuclear considerations	107
8.2.	Potential nuclear solutions	108
8.3.	Economic competitiveness	109
8.4.	Current and prospective market	110
9.	INNOVATIVE APPLICATIONS	111
9.1.	Fuel synthesis	111
9.1.1.	Hydrogen production	113
9.1.1.1.	Prospects for hydrogen penetration in the energysystem	114
9.1.1.2.	Prospects for nuclear energy for hydrogen production	116
9.1.2.	Coal gasification	118

9.1.3. Other synthetic fuels	119
9.2. Oil extraction	120
9.3. Nuclear submarines for fossil fuel transportation	121
10. OVERALL MARKET POTENTIAL FOR ALL NON-ELECTRIC APPLICATIONS	123
11. CONCLUSIONS	125
11.1. General conclusions	125
11.2. Specific conclusions (by application)	126
11.2.1. District heating	126
11.2.2. Water desalination	127
11.2.3. Process heat supply	127
11.2.4. Ship propulsion	127
11.2.5. Supply of spacecraft energy	127
11.2.6. Hydrogen production	128
11.2.7. Coal gasification	128
11.2.8. Other synthetic fuels	128
11.2.9. Oil extraction	129
11.2.10. Use of nuclear submarines for fossil fuel transportation	129
APPENDIX I: DEFINITIONS OF WORLD REGIONS	131
APPENDIX II: QUALITATIVE INDICATORS FOR THE PUBLIC ACCEPTANCE OF NUCLEAR ENERGY	133
APPENDIX III: STATISTICS OF HEAT SUPPLY AND DEMAND	141
APPENDIX IV: ESTIMATE OF THE LONG TERM PROSPECTS FOR NUCLEAR PENETRATION IN DISTRICT HEATING	152
APPENDIX V: WATER SUPPLY AND DEMAND IN THE WORLD	162
APPENDIX VI: ESTIMATE OF THE LONG TERM PROSPECTS FOR NUCLEAR PENETRATION IN WATER DESALINATION	173
APPENDIX VII: INTERRELATION OF ELECTRICITY AND FUEL CONSUMPTION IN SOME COUNTRIES	183
APPENDIX VIII: STATISTICS OF INDUSTRIAL HEAT SUPPLY AND DEMAND	187
APPENDIX IX: ESTIMATE OF THE LONG TERM PROSPECTS FOR NUCLEAR PENETRATION IN PROCESS HEAT SUPPLY	199
APPENDIX X: CHARACTERIZATION OF THE WORLD SHIP FLEET	209
APPENDIX XI: ESTIMATE OF THE LONG TERM PROSPECTS FOR NUCLEAR POWERED SHIP PROPULSION	219
