

Table of Contents

Author's Preface	9
-------------------------------	----------

Chapter 1 Power graphs

1.1 The power graph.....	.12
1.2 Analysis of the power graph15
1.3 Electrical circuits.....	.16
1.4 Mechanical systems21
1.5 Transmission elements23
1.6 Active transmission elements24
1.7 An example of a larger system25
1.8 A transistor circuit.....	.28
P r o b l e m s	3 0

Chapter 2 Bond graphs

2.1 Causality32
2.2 Causality paths37
2.3 The simple loop rule39
2.4 The application of the loop rule to simple networks.....	.40
2.4.1 A mechanical example41
2.4.2 The magnetic circuit43
2.5 A case study: a hydroelectric scheme44
P r o b l e m s	4 8

Chapter 3 Open loops

3.1 The full loop rule50
3.2 An operational amplifier.....	.54
3.3 An RC filter.....	.55

Table of Contents

3.4	A multiwinding transformer56
3.5	Model development58
P r o b l e m s		6 1

Chapter 4 Complex systems

4.1	Matrix analysis62
4.2	Matrix with \mathbf{I} terms67
4.3	Matrix partitioning70
4.4	The Wien bridge oscillator.71

Chapter 5 State variables

5.1	The state variable equations.75
5.2	The numerical solution.77
5.3	The generation of state variable equations81
5.3.1	Direct algebraic assembly82
5.3.2	Assembly using the loop rule.84
5.3.3	The matrix assembly of State variable equations88
5.4	Assembly of output equations90
5.5	Application of matrix assembly to state equations90
P r o b l e m s		9 5

6.2	A capacitor field98
6.3	An inductor field.100
		.102

Chapter 7 Nonlinear systems and modulated elements

7.1	Nonlinear storage elements	104
7.1.1	A nonlinear capacitor.	104
7.1.2	A nonlinear inductor	105
7.2	Nonlinear dissipation elements.	107
7.2.1	A nonlinear resistor	108
7.3	A case study: the dynamics of an air pistol.	109
7.4	Modulated elements.	114
7.4.1	A flow-rate meter	114
7.5	The case of non-zero F	115
7.5.1	Wein bridge oscillator with output voltage control	117
7.6	Modulated transmission elements for mechanical linkages	120
7.6.1	A mass-spring oscillator	123
7.6.2	The suspension system for an automobile.	125

Table of Contents

7

Appendix A A matrix package	132
Appendix B A program for the integration of state variable equations	142
Appendix C The factorised inverse.	147
Index	149
