

CONTENTS

	Introduction	vii
1	<i>Aplicación del método de Hadamard al cálculo de campo electromagnético del electrón.</i>	1
2	<i>Non-relativistic equation for particles with spin 1 (with J. Tiomno).</i>	9
3	<i>Note on the non relativistic equation for spin 1/2 and 1 particles with anomalous magnetic moment.</i>	17
4	<i>Maxwell's equations for multipoles.</i>	24
5	<i>Elastic scattering of α-particles (with S.W. Mac-Dowell).</i>	26
6	<i>The first excited states of the C^{13}-N^{13} mirror pair (with J.P. Davidson).</i>	29
7	<i>Jost functions and dispersion relations (with T.W.B. Kibble).</i>	39
8	<i>Analogy between Lorentz and Foldy-Wouthuysen transformation.</i>	52
9	<i>Relativistic pion-nucleon scattering with the determinantal method (with N. Bali, C. Garibotti, A. Pignotti).</i>	53
10	<i>On a generalized Foldy-Wouthuysen transformation (with C.G. Bollini).</i>	56
11	<i>Regge trajectories for the square-well/potential (with C.G. Bollini).</i>	68
12	<i>Causality and analyticity in non-relativistic scattering (with H Saavedra).</i>	83
13	<i>Jost functions for the harmonic oscillator (with V.A. Alessandrini).</i>	87
14	<i>Analytic regularization and the divergences of quantum field theories (with C.G. Bollini, A. Gonzalez Dominguez).</i>	101
15	<i>A differential equation for the self-energy in momentum space (with C.G. Bollini).</i>	113
16	<i>On the reduction formula of Feinberg and Pais (with C.G. Bollini, A. Gonzalez Dominguez).</i>	116
17	<i>Relations between Green functions (with C.G. Bollini).</i>	118
18	<i>Sum rules and the isovector form factor (with C.G. Bollini).</i>	131
19	<i>Equal time commutation relations and sum rules (with C.G. Bollini).</i>	135
20	<i>Sum rules and the electromagnetic isobar-nucleon current (with C.G. Bollini).</i>	140

1 2	<i>On the covariance of equal-time commutators and sum rules</i> (with C.G. Bollini, J. Tiomno).	144
2 2	<i>The isovector form factor and the electromagnetic nucleon-isobar coupling constant</i> (with C.G. Bollini).	155
2 3	<i>On spectral-function sum rules</i> (with C.G. Bollini).	159
2 4	<i>Phase shifts and matrix elements of potentials</i> (with C.G. Bollini).	168
2 5	<i>A linear theory of gravitation</i> (with C.G. Bollini, J. Tiomno).	171
2 6	<i>On a SC method for determining bond orders in alternant hydrocarbons</i> (with C.G. Bollini, M. Giambiagi, M. Segre de Giambiagi).	177
2 7	<i>Interaction independent π bond orders for certain excited states</i> (with C.G. Bollini, M. Giambiagi, M. Segre de Giambiagi).	182
2 8	<i>Lowest order "divergent" graphs in n-dimensional space</i> (with C.G. Bollini).	187
2 9	<i>Dimensional renormalization: the number of dimensions as a regularizing parameter</i> (with C.G. Bollini).	190
3 0	<i>Remarks concerning the renormalized coupling constants of the gauge theories</i> (with C.G. Bollini, A. Sirlin).	197
3 1	<i>Current-current commutators, slices of the light cone, and the value of the σ term</i> (with G. Cocho, A. García).	211
3 2	<i>Evanescant couplings and compensation of Adler anomaly</i> (with C.G. Bollini).	219
3 3	<i>El flujo del cereal en l/as máquinas secadoras</i> (with C.G. Bollini).	224
3 4	<i>Continuous dimensions and evanescent couplings</i> (with C.G. Bollini).	230
3 5	<i>Finite interaction from an evanescent coupling</i> (with C.G. Bollini).	238
3 6	<i>About direct obtainment of π SC bond orders</i> (with C.G. Bollini, M. Giambiagi, M. Segre de Giambiagi).	243
3 7	<i>Solutions of Sine-Gordon equation with particular coordinate dependent coefficients in n-dimensional space</i> (with C.G. Bollini).	248
3 8	<i>On the gauge field of magnetic monopoles</i> (with C.G. Bollini).	250
3 9	<i>Regular N-instanton fields and singular gauge transformations</i> (with K.D. Rothe).	259
4 0	<i>Gauge field copies</i> (with C.G. Bollini, J. Tiomno).	273

4 1	<i>Singular potentials and analytic regularization in classical Yang-Mills equations</i> (with C.G. Bollini, J. Tiomno).	276
4 2	<i>Application of the U(3) symmetric matrices algebra to molecular problems</i> (with C.G. Bollini, M. Giambiagi, M. Segre de Giambiagi).	281
4 3	<i>Hidden singularities in non-Abelian gauge fields</i> (with C.G. Bollini, J. Tiomno).	290
4 4	<i>Wilson loop and related strings for the instanton and their variational derivatives</i> (with C.G. Bollini, J. Tiomno).	300
4 5	<i>Wilson loops in Kerrgravitation</i> (with C.G. Bollini, J. Tiomno).	307
4 6	<i>Quantized Wilson loops with dimensional regularization</i> (with M. Abud, C.G. Bollini).	316
4 7	<i>Fourier analysis and Wilson loops</i> (with C.G. Bollini).	325
4 8	<i>Relations between effective potentials in different dimensions</i> (with C.G. Bollini).	333
4 9	<i>Wilson loops and constant gauge fields</i> (with C.G. Bollini).	336
5 0	<i>Generalized Klein-Gordon equations in d dimensions from supersymmetry</i> (with C.G. Bollini).	339
5 1	<i>Lagrangian procedures for higher order field equations</i> (with C.G. Bollini).	342
5 2	<i>Gauge superfield in six dimensions</i> (with C.G. Bollini).	359
5 3	<i>Higher order equations of motion</i> (with C.G. Bollini).	364
5 4	<i>Study of wave equations involving iterated Laplacian and potential $r^{-\beta}$ by the 1/N method</i> (with C.G. Bollini, J.S. Helman).	371
5 5	<i>Gauge transformations for six-dimensional superfields</i> (with C.G. Bollini).	374
5 6	<i>Huygens' principle in $(2n+1)$ dimensions for nonlocal pseudodifferential operators of the type \square^α</i>	382
[57]	<i>Criteria to fix the dimensionality corresponding to some higher derivative Lagrangians</i> (with C.G. Bollini, O. Obregón).	386
[58]	<i>Arbitrary powers of D'Alembertians and the Huygens' principle</i> (with C.G. Bollini).	393
[59]	<i>Which is the dimension of space if Huygens' principle and Newtonian potential are simultaneously satisfied?</i> (with C.G. Bollini, J. Benitez, O. Obregón).	405

6 0	<i>Relations among solutions for wave and Klein-Gordon equations for different dimensions.</i>	411
6 1	<i>Solutions of the spherically symmetric wave equation in $p+q$ dimensions (with W. Bietenholz).</i>	421
6 2	<i>An alternative dimensional reduction prescription (with J.D. Edelstein, C. Núñez, F.A. Schaposnik).</i>	436
6 3	<i>Dimensional regularization in configuration space (with C.G. Bollini).</i>	445
