

CONTENTS

PART I. ELEMENTS OF NUCLEAR LAW

CHAPTER 1. NUCLEAR LAW AND THE LEGISLATIVE PROCESS	3
1.1. Concept of nuclear law	3
1.1.1. Risks and benefits	3
1.1.2. National legal hierarchy	3
1.2. Definition of nuclear law	4
1.3. Objective of nuclear law	5
1.4. Principles of nuclear law	5
1.4.1. Safety principle	5
1.4.2. Security principle	6
1.4.3. Responsibility principle	7
1.4.4. Permission principle	7
1.4.5. Continuous control principle	8
1.4.6. Compensation principle	8
1.4.7. Sustainable development principle	8
1.4.8. Compliance principle	9
1.4.9. Independence principle	9
1.4.10. Transparency principle	10
1.4.11. International co-operation principle	10
1.5. Legislative process for nuclear law	11
1.5.1. Assessment of nuclear programmes and plans	12
1.5.2. Assessment of laws and the regulatory framework	14
1.5.3. Input from stakeholders	15
1.5.4. Initial legislative drafting	16
1.5.5. First review of the initial draft	18
1.5.6. Further legislative consideration	18
1.5.7. Legislative oversight	19
1.5.8. Relationship to non-nuclear laws	19
1.5.9. Reflecting international conventions or treaties in national legislation	20
1.5.10. Incorporating international guidance documents or foreign law provisions into national legislation	21
1.6. Security culture and safety culture in nuclear law	22

CHAPTER 2. THE REGULATORY BODY	25
2.1. Designating the regulatory body	25
2.2. Independence and separation of regulatory functions	26
2.3. Regulatory functions	28
2.3.1. Establishing safety requirements and regulations	28
2.3.2. Preliminary assessment	29
2.3.3. Authorization (licensing, registration, etc.)	29
2.3.4. Inspection and assessment	30
2.3.5. Enforcement	30
2.3.6. Public information	30
2.3.7. Co-ordination with other bodies	31
2.4. Advisory bodies and external support	31
Bibliography for Chapter 2	32

CHAPTER 3. LICENSING, INSPECTION AND ENFORCEMENT

3.1. Background	33
3.2. Licensing legislation	34
3.2.1. Availability of a licence	35
3.2.2. Application for a licence	36
3.2.3. Public participation	36
3.2.4. Criteria for the issuance of a licence	37
3.2.5. Issuance of a licence	38
3.2.6. Suspension, modification or revocation of a licence	38
3.2.7. Review of licensing decisions	38
3.3. Inspection and enforcement legislation	38
3.3.1. Scope and objectives of inspection and enforcement	39
3.3.2. Inspection	39
3.3.3. Enforcement	40
3.4. Definitions	41
Bibliography for Chapter 3	42

PART II. RADIATION PROTECTION

CHAPTER 4. RADIATION PROTECTION	45
4.1. Background	45
4.2. Objectives	47

4.3. Scope	47
4.3.1. Exclusion	48
4.4. Role of the regulatory body	48
4.4.1. Exemption	48
4.4.2. Absence of a justification	49
4.4.3. Clearance..	49
4.5. Activities and facilities requiring a licence	49
4.6. Conditions for the issuance of a licence	50
4.7. Specific issues	51
4.7.1. Doses and dose limits	51
4.7.2. Transboundary effects of radiation	52
4.7.3. Radiation from cosmic rays	52
4.8. Cross-cutting relationships	52
Bibliography for Chapter 4	53

PART III. NUCLEAR AND RADIATION SAFETY

CHARTER 5. SOURCES OF RADIATION AND RADIOACTIVE MATERIAL

5.1. Background	57
5.1.1. Radioactive material	57
5.1.2. Irradiation equipment	58
5.1.3. Definition of radiation sources	58
5.2. Objectives	58
5.3. Scope	59
5.4. Activities and facilities requiring a licence	59
5.5. Licence conditions	60
5.6. Specific issues	60
5.6.1. Irradiation equipment	60
5.6.2. Orphan sources	61
5.6.3. Disused sources	61
5.6.4. Training	62
5.7. Cross-cutting relationships	62
Bibliography for Chapter 5	62

CHAPTER 6. SAFETY OF NUCLEAR FACILITIES

6.1. Background	63
6.2. Objectives	63
6.3. Scope	64

6.4.	General requirements for power reactors	65
6.5.	Role of the regulatory body	66
6.5.1.	Reactive approach	66
6.5.2.	Step by step licensing	66
6.5.3.	Continuous control	67
6.5.4.	Modification, suspension or revocation of a licence	67
6.6.	Role of the operating organization	68
6.6.1.	Management of safety	69
6.6.2.	Verification of safety	70
6.6.3.	Other issues	70
6.6.4.	Decommissioning	70
6.7.	Conditions for a licence	71
6.8.	Specific issues	72
6.9.	Research and test reactors	72
6.10.	Cross-cutting relationships	73
	Bibliography for Chapter 6	74
 CHAPTER 7. EMERGENCY PREPAREDNESS AND RESPONSE		 75
7.1.	Background	75
7.2.	Goals and elements	76
7.3.	Implementation of emergency preparedness	76
7.3.1.	Legal framework	76
7.3.2.	Emergency plans	78
7.4.	International co-operation	79
7.4.1.	Obligations under public international law and relevant conventions	79
7.4.2.	The IAEA's ENATOM	80
	Bibliography for Chapter 7	81
 CHAPTER 8. MINING AND MILLING		 83
8.1.	Background	83
8.2.	Objective	83
8.3.	Scope	84
8.4.	Activities and facilities requiring a licence	85
8.5.	Licence conditions	85
8.6.	Specific issues	86
8.6.1.	Experts	86
8.6.2.	Effluents	86

8.6.3. Waste	87
8.6.4. Closure and rehabilitation	87
8.7. Cross-cutting relationships	88
Bibliography for Chapter 8	88
CHAPTER 9. TRANSPORT OF RADIOACTIVE MATERIAL	89
9.1. Background	89
9.2. Legal means of ensuring the safe transport of radioactive material	89
9.2.1. National nuclear law provisions	89
9.2.2. Model Regulations of the United Nations and the IAEA Regulations for the Safe Transport of Radioactive Material	90
9.2.3. International instruments	91
9.2.4. IAEA Regulations for the Safe Transport of Radioactive Material	91
9.2.5. Incorporation of the IAEA Transport Regulations into national law	92
9.3. Cross-cutting relationships	93
9.3.1. Change of jurisdiction during international transport	93
9.3.2. Transboundary movement of spent fuel and radioactive waste	93
9.3.3. Physical protection of nuclear material	94
9.3.4. Other	94
9.4. Summary	94
CHAPTER 10. RADIOACTIVE WASTE AND SPENT FUEL	97
10.1. Background	97
10.2. Objective	97
10.3. Scope	98
10.4. Activities and facilities requiring a licence	98
10.5. Conditions for the issuance of a licence	99
10.6. Specific issues	100
10.6.1. Storage and disposal	100
10.6.2. Long term planning for disposal sites	100
10.6.3. Past practices	101
10.6.4. Sorting and packaging of radioactive waste	101
10.6.5. Export and import of radioactive waste	101
10.6.6. Radioactive waste as an end product	101

10.7. Cross-cutting relationships	102
Bibliography for Chapter 10	102

PART IV. NUCLEAR LIABILITY AND COVERAGE

CHAPTER 11. NUCLEAR LIABILITY AND COVERAGE	107
11.1. Background	107
11.1.1. Need for a special regime	107
11.1.2. International nuclear liability conventions	107
11.2. Nuclear liability principles	109
11.2.1. Main definitions	109
11.2.2. Strict liability	111
11.2.3. Legal channelling of liability on to the operator	112
11.2.4. Exonerations from liability	113
11.2.5. Limitation of liability in amount	113
11.2.6. Limitation of liability in time	113
11.2.7. Congruence of liability and coverage	114
11.2.8. Equal treatment	115
11.2.9. Jurisdiction	115
11.3. Liability for nuclear damage occurring during transport	116
11.4. Liability for other radiation damage	117
Bibliography for Chapter 11	118

PART V. NON-PROLIFERATION AND PHYSICAL PROTECTION

CHAPTER 12. SAFEGUARDS	121
12.1. Background	121
12.1.1. Basic character of safeguards	121
12.1.2. Non-proliferation treaties and agreements	122
12.1.3. Basic safeguards documents	123
12.1.4. Using safeguards instruments and documents in drafting legislation	124
12.2. Objectives	125
12.3. Scope	125
12.4. Key elements of safeguards legislation	126
12.4.1. The comprehensive safeguards agreement	126
12.4.2. Additional Protocol to the safeguards agreement	131
12.5. Definitions	135
12.6. Cross-cutting relationships	135

CHAPTER 13. EXPORT AND IMPORT CONTROLS	137
13.1. Background 	137
13.2. Objectives	138
13.3. Scope 	139
13.4. Key elements of nuclear export and import	
control legislation	139
13.4.1. Requirements for the issuance of a licence	140
13.4.2. Governmental organization	
for export and import control	140
13.4.3. Requirements for the issuance	
of export or import licences	141
13.4.4. Inspection and monitoring	142
13.4.5. Enforcement	142
13.4.6. Illicit trafficking	142
13.5. Cross-cutting relationships	143
13.6. Definitions	143
Bibliography for Chapter 13	144
 CHAPTER 14. PHYSICAL PROTECTION	 145
14.1. Background	145
14.1.1. Convention on the Physical Protection	
of Nuclear Material (CPPNM)	145
14.1.2. IAEA physical protection recommendations	146
14.1.3. IAEA project and supply agreements	147
14.1.4. Objectives and fundamental principles	
of physical protection	147
14.1.5. Other instruments	148
14.2. Objectives	148
14.3. Scope 	149
14.4. Key elements of physical protection legislation	149
14.4.1. Assessment of the threat	150
14.4.2. Governmental organization for physical protection	150
14.4.3. Authorization through licensing or permits	151
14.4.4. Requirements for physical protection	151.
14.4.5. Authorized persons	152
14.4.6. Inspection and quality assurance	152
14.4.7. Enforcement	152
14.4.8. State system of accounting and control (SSAC)	153
14.4.9. Contingency (emergency) plans	153

14.4.10. Confidentiality 153
14.4.11. International transport 154
14.4.12. Security culture 154
14.5. Illicit trafficking 154
14.6. Cross-cutting relationships 155
14.7. Definitions 155
