
CONTENTS

Preface	vii
1. Smooth manifolds and smooth maps	1
Tangent spaces and derivatives	2
Regular values	7
The fundamental theorem of algebra	8
2. The theorem of Sard and Brown	10
Manifolds with boundary	12
The Brouwer fixed point theorem	13
3. Proof of Sard's theorem	16
4. The degree modulo 2 of a mapping	20
Smooth homotopy and smooth isotopy	20
5. Oriented manifolds	26
The Brouwer degree	27
6. Vector fields and the Euler number	32
7. Framed cobordism; the Pontryagin construction	42
The Hopf theorem	50
8. Exercises	52
Appendix: Classifying 1-manifolds	55
Bibliography	59
Index	63
