<i>Preface</i>	v
1. Introduction	1
Part 1: Synchronization and Clustering of Periodic Oscillators	
2. Ensembles of Identical Phase Oscillators	13
2.1 Coupled Periodic Oscillators . . . . .	13
2.2 Global Coupling and Full Synchronization . . . . .	19
2.3 Clustering . . . . .	22
2.4 Other Interaction Models . . . . .	27
3. Heterogeneous Ensembles and the Effects of Noise	35
3.1 Transition to Frequency Synchronization . . . . .	35
3.2 Frequency Clustering . . . . .	43
3.3 Fluctuating Forces . . . . .	47
3.4 Time-Delayed Interactions . . . . .	50
4. ‘Oscillator Networks	61
4.1 Regular Lattices with Local Interactions . . . . .	62
4.1.1 Heterogeneous ensembles . . . . .	66
4.2 Random Interaction Architectures . . . . .	70
4.2.1 Frustrated interactions . . . . .	72
4.3 Time Delays . . . . .	75
4.3.1 Periodic linear arrays . . . . .	77

4.3.2 Local interactions with uniform delay . . . . .	81
5. Arrays of Limit-Cycle Oscillators	83
5.1 Synchronization of Weakly Nonlinear Oscillators . . . . .	83
5.1.1 Oscillation death due to time delays . . . . .	91
5.2 Complex Global Coupling . . . . .	94
5.3 Non-local Coupling . . . . .	99
<b>Part 2: Synchronization and Clustering in Chaotic Systems</b>	
6. Chaos and Synchronization	109
6.1 Chaos in Simple Systems . . . . .	109
6.1.1 Lyapunov exponents . . . . .	112
6.1.2 Phase and amplitude in chaotic systems . . . . .	115
6.2 Synchronization of Two Coupled Maps . . . . .	116
6.2.1 Saw-tooth maps . . . . .	118
6.3 Synchronization of Two Coupled Oscillators . . . . .	121
6.3.1 Phase synchronization . . . . .	123
6.3.2 Lag synchronization . . . . .	126
6.3.3' Synchronization in the Lorenz system . . . . .	128
7. Synchronization in Populations of Chaotic Elements	131
7.1 Ensembles of Identical Oscillators . . . . .	132
7.1.1 Master stability functions . . . . .	137
7.1.2 Synchronizability of arbitrary connection topologies .	142
7.2 Partial Entrainment in -Rössler Oscillators . . . . .	146
7.2.1 Phase synchronization . . . . .	152
7.3 Logistic Maps . . . . .	159
7.3.1 Globally coupled logistic maps . . . . .	159
7.3.2 Heterogeneous ensembles . . . . .	161
7.3.3 Coupled map lattices . . . . .	167
8. Clustering	171
8.1 Dynamical Phases of Globally Coupled Logistic Maps . . .	172
8.1.1 Two-cluster solutions . . . . .	174
8.1.2 Clustering phase of globally coupled logistic maps .	178
8.1.3 Turbulent phase. . . . .	182
8.2 Universality Classes and Collective Behavior in Chaotic Maps	187

8.3 Randomly Coupled Logistic Maps . . . . .	193
8.4 Clustering in the Rössler System . . . . .	197
8.5 Local Coupling . . . . .	200
<b>9. Dynamical Glasses</b>	<b>203</b>
9.1 Introduction to Spin Glasses . . . . .	204
9.2 Globally Coupled Logistic Maps as Dynamical Glasses . .	211
9.3 Replicas and Overlaps <b>in Logistic Maps</b> . . . . .	215
9.4 The Thermodynamic Limit , . , . . . . .	217
9.5 Overlap Distributions and Ultrametricity . . . . .	221
<b>Part 3: Selected Applications</b>	
<b>10. Chemical Systems</b>	<b>227</b>
10.1 Arrays of Electrochemical Oscillators . . . . .	228
10.1.1 Periodic oscillators . . . . .	230
10.1.2 Chaotic oscillators . . . . .	234
10.2 Catalytic Surface Reactions . . . . .	245
10.2.1 Experiments with global delayed feedback . . . . .	248
10.2.2 Numerical simulations . . . . .	255
10.2.3 Complex Ginzburg-Landau equation with global de- layed feedback. . . . .	265
<b>11. Biological Cells</b>	<b>273</b>
11.1 Glycolytic Oscillations . . . . .	274
11.2 Dynamical Clustering and Cell Differentiation . . . . .	279
<b>11.3 Synchronization of Molecular Machines</b> . . . . .	<b>289</b>
<b>12. Neural Networks</b>	<b>303</b>
12.1 Neurons . . . . .	304
12.2 Synchronization in the brain . . . . .	312
<b>12.3 Cross-coupled neural networks</b> . . . . .	<b>322</b>
<b>Bibliography</b>	331
<b>Index</b>	<b>345</b>
