

Contents

1	Introduction	1
2	Principles of Quantum Mechanics	5
2.1	Classical Physics.....	5
2.2	Hilbert Spaces and Operators.....	6
2.3	Basic Principles of Quantum Mechanics.....	9
2.4	Some Consequences of the Basic Principles.....	12
2.5	Measurement Process.....	15
2.5.1	The Concept of Measurement.....	15
2.5.2	Quantum Measurements.....	16
2.6	Commutation Relations and the Uncertainty Principle..	17
2.7*	Some Properties of Hermitian Operators.....	20
2.8*	Notions of Probability Theory.....	2 1
	Problems.....	22
3	The Heisenberg Realization of Quantum Mechanics ...	25
3.1	Matrix Formalism.....	25
3.1.1	A Realization of the Hilbert Space.....	25
3.1.2	The Solution of the Eigenvalue Equation.....	26
3.1.3	Transformation Between Sets of Basis States.....	27
3.1.4	Application to 2×2 Matrices.....	28
3.2	Harmonic Oscillator.....	31
3.2.1	Solution of the Eigenvalue Equation.....	32
3.2.2	Some Properties of the Solution.....	34
	Problems.....	3 5
4	The Schrödinger Realization of Quantum Mechanics ..	39
4.1	Time-Independent Schrödinger Equation.....	39
4.1.1	Probabilistic Interpretation of Wave Functions... ..	41
4.2	The Harmonic Oscillator Revisited.....	43
4.2.1	Solution of the Schrödinger Equation.....	43
4.2.2	Spatial Features of the Solutions.....	44
4.3	Free Particle.....	47
4.4	Infinite Square Well Potential. Electron Gas.....	49
4.5	One-Dimensional Unbound Problems.....	51

- 4.5.1 One-step Potential 51
- 4.5.2 Square Barrier 54
- 4.6* Finite Square Well Potential 55
- 4.7* Band Structure of Crystals 57
- Problems 60

- 5 Angular Momentum.. 63**
- 5.1 Eigenvalues and Eigenstates 63
 - 5.1.1 Matrix Treatment 63
 - 5.1.2 Treatment Using Position Wave Functions 65
- 5.2 Spin 67
 - 5.2.1 Stern Gerlach Experiment 67
 - 5.2.2 Spin Formalism 68
- 5.3 Addition of Angular Momenta. 70
- 5.4* Details of Matrix Treatment. 72
- 5.5* Details of the Treatment of Orbital Angular Momentum . . 73
- 5.6* Coupling with Spin $s = 1/2$ 75
- Problems 75

- 6 Three-Dimensional Hamiltonian Problems 79**
- 6.1 Central Potentials. 79
 - 6.1.1 Coulomb and Harmonic Oscillator Potentials 80
- 6.2 Spin Orbit Interaction 81
- 6.3 Some Elements of Scattering Theory 83
 - 6.3.1 Boundary Conditions. 83
 - 6.3.2 Expansion in Partial Waves 84
 - 6.3.3 Cross-Sections. 85**
- 6.4* Solutions to the Coulomb and Oscillator Potentials. 87
- 6.5* Some Properties of Spherical Bessel Functions 90
- Problems 91

- 7 Many-Body Problems 95**
- 7.1 The Pauli Principle 95
- 7.2 Two-Electron Problems 98
- 7.3 Periodic Tables 99
- 7.4 Motion of Electrons in Solids 103
 - 7.4.1 Electron Gas 103
 - 7.4.2* Band Structure of Crystals. 105
- 7.5* Occupation Number Representation 106
- 7.6* Quantum Statistics 107
- 7.7* Bose-Einstein Condensation. 109
- 7.8* Quantum Hall Effects 111
 - 7.8.1* Integer Quantum Hall Effect 112
 - 7.8.2* Fractional Quantum Hall Effect 115
- Problems 116

8	Approximate Solutions to Quantum Problems	119
8.1	Perturbation Theory	119
8.2	Variational Procedure	121
8.3	Ground State of the He Atom	122
8.4	Molecules	123
8.4.1	Intrinsic Motion. Covalent Binding	123
8.4.2	Vibrational and Rotational Motions	125
8.5	Approximate Matrix Diagonalizations	128
8.5.1*	Approximate Treatment of Periodic Potentials	128
8.6*	Matrix Elements	
	Involving the Inverse of the Interparticle Distance	130
8.7*	Quantization with Constraints	131
8.7.1*	Constraints	131
8.7.2*	Outline of the BRST Solution	133
	Problems	133
9	Time-Dependence in Quantum Mechanics	137
9.1	The Time Principle	137
9.2	Time-Dependence of Spin States	138
9.2.1	Larmor Precession	138
9.2.2	Magnetic Resonance	139
9.3	Sudden Change in the Hamiltonian	141
9.4	Time-Dependent Perturbation Theory	141
9.4.1	Transition Amplitudes	142
9.4.2	Constant-in-Time Perturbation	143
9.5	Quantum Electrodynamics for Newcomers	144
9.5.1	Classical Description of the Radiation Field	145
9.5.2	Quantization of the Radiation Field	146
9.5.3	Interaction of Light with Particles	147
9.5.4	Emission and Absorption of Radiation	148
9.5.5	Selection Rules	149
9.5.6	Mean Lifetime	
	and Energy-Time Uncertainty Relation	150
	Problems	151
10	Entanglement	
	and Some Recent Applications of Quantum Mechanics	153
10.1	Entanglement	153
10.2	Quantum Cryptography	154
10.3	Quantum Teleportation	156
10.4	Quantum Computation	157
10.4.1	Conceptual Framework	157
10.4.2	Quantum Gates	158
10.4.3	Factorization	160
10.5*	Bell States	162
