

# Contents

Foreword	xi
Chapter 1 Introduction	1
Chapter 2 The Electric Power Supply System and Its Properties	5
2.1 Topological and Electrical Structures	5
2.1.1 The High-Voltage Level	6
2.1.2 The Medium- and Low-Voltage Levels	18
2.1.3 The Interference Scenario	32
Chapter 3 Historical Development of Data Communication over Powerlines	43
3.1 Possibilities and Limits of Classical Usage Types	43
3.1.1 Carrier Transmission over Powerlines (CTP)	44
3.1.2 Ripple Carrier Signaling (RCS)	54
Chapter 4 New Usage Possibilities of the Low-Voltage Level Based on European Standards	73
4.1 The European CENELEC Standard EN 50065 for the Frequency Range Below the Long-Wave Broadcast Band	73
4.1.1 The Impact of Limiting the Signal Level	76
4.1.2 The Impact of Limiting the Signal Spectrum	77

4.2	Signal Coupling, Signal Attenuation, Access Impedance	81
4.2.1	Signal Coupling	81
4.2.2	Transmission Attenuation	91
4.2.3	Access Impedance	92
4.3	Modulation and Access Methods for Use under EN 50065	92
4.3.1	Narrowband Modulation Schemes and Their Properties	94
4.3.2	Spread-Spectrum Techniques	99
4.3.3	Pseudonoise Direct Sequencing (PN-DS)	100
4.3.4	Frequency Hopping (FH)	101
4.4	Examples of System Implementations	107
4.4.1	Matched Filtering and Synchronization- Introductory Remarks	107
4.4.2	Digital Signal Synthesis by Wave Table	137
4.4.3	Digital Optimum Receiver Technology for Powerline Communication	144
4.4.4	Powemet-EIB in Building Automation	176
4.4.5	Error-Correction Coding Against Impulsive Noise	188
4.4.6	Behavior of Coded Transmission under White Noise (AWGN Environment)	198
4.4.7	Communication System for Energy-Related Value-Added Services of PSUs	200
4.4.8	Integrated Microsystem Concept as a Mixed-Signal ASIC	206
4.4.9	The Symbol-Processing Multicarrier Scheme-Summary	219
4.4.10	Modern Implementations for Energy-Related Value-Added Services	220
<b>Chapter 5</b>	<b>Innovation Potential from Deregulation- Possibilities and Limits of Signal Transmission</b>	<b>229</b>
5.1	Deregulation of the Telecommunication Markets	229
5.2	Fast Data Transmission over Building Installations (Last Meter Solutions)-the HomePlug Powerline Alliance	230
5.2.1	Mission and Vision ofthe HomePlug Powerline Alliance	230
5.3	Telecommunication Access over the Low-Voltage Grid (Last-Mile Solutions)	232
5.4	Energy Market Deregulation (Free Electricity Trade)	234
5.5	Bandwidth Requirements and Frequency Allocation	236

5.6	Channel Characteristics, Coupling and Measuring Techniques at High Frequencies for PLC	237
5.6.1	Coupling of High-Frequency Signals	239
5.6.2	HF Measuring Systems and Measurement Results	241
5.6.3	Transmission Characteristics at High Frequencies	251
5.7	The Powerline Channel Model	257
5.8	The High-Frequency Interference Scenario	263
5.9	Access Impedance	268
5.10	Estimating the Powerline Channel Capacity	269
5.10.1	Shannon's Theory for the Powerline Channel	269
5.10.2	Access-Channel Capacity Estimation	272
5.10.3	Indoor Channel-Capacity Estimation	273
5.11	Electromagnetic Compatibility: Problems and Solutions	276
5.11.1	Compatibility with Wireless Services	276
5.11.2	Compatibility of Different PLC Systems	284
5.11.3	What to Expect from Regulations in the Near Future	285
5.12	Measures of Network Conditioning-Analysis of Feasibility and Efficiency	286
<b>Chapter 6</b>	<b>Appropriate Modulation Schemes for PLC and Communication System Concepts</b>	293
6.1	Introduction	293
6.1.1	Basic Consideration of Broadband Techniques	294
6.2	Single-Carrier Modulation and CDMA	294
6.3	PLC Signal Characteristics and Level-Limit Measurements	297
6.4	OFDM-A Multicarrier Scheme for High-Speed PLC	299
6.5	OFDM Signal Synthesis, Carrier Modulation and Demodulation	302
6.5.1	The OFDM Transmitter	306
6.5.2	The OFDM Receiver	307
6.6	OFDM for High-Speed PLC-Summary	308
<b>Chapter 7</b>	<b>Conclusions and Further Work</b>	311
<b>Chapter 8</b>	<b>Reading List and Bibliography by Topics</b>	315
8.1	Carrier-Frequency Modulation in High-Voltage Lines	315
8.2	Ripple Carrier Signaling	315
8.3	Standards and Regulation Issues	316
8.4	Spread-Spectrum Techniques	316

8.5	Fundamentals of Communications, Systems Theory, and RF Technology	317
8.6	PLC-Related Electronic Circuit Design, Application Notes	318
8.7	Communication over the Electric Power Distribution Grid	318
8.7.1	Channel Analysis and Modeling at Low Frequencies	318
8.7.2	System Concepts, Experimental Modems, and Test Results for Low Bit-Rate PLC	320
8.7.3	Doctoral and Habilitation Dissertations Concerning PLC	323
8.7.4	Channel Analysis, Modeling, and System Concepts for High-Speed PLC	323
8.8	Conference Proceedings	327
8.9	Books on Powerline Communication	328
8.10	WWW Links Related to PLC	329
