# Contents

<b>Introduction</b>	<b>5</b>
1.1 Complex Systems . . . . .	5
1.1.1 Social Systems . . . . .	6
1.2 A Network Review . . . . .	7
1.2.1 Networks Everywhere . . . . .	8
1.2.2 Network Variety . . . . .	10
1.2.3 Some Topological Features of Society . . . . .	13
1.3 The Small World Network . . . . .	14
1.3.1 Associated Topological Properties . . . . .	15
1.3.2 The SW Effect . . . . .	17
1.3.3 Annealed Networks . . . . .	18
<b>Dynamic Networks</b>	<b>19</b>
2.1 Annealed SWN with Memory . . . . .	20
2.1.1 The Model . . . . .	21
2.1.2 Memory Distribution . . . . .	21
2.1.3 Dynamic Properties . . . . .	23
2.1.4 Analytic Exploration . . . . .	24
2.1.5 Numerical Studies . . . . .	27
2.1.6 Conclusions . . . . .	30
2.2 Dynamic Domain Network . . . . .	31
2.2.1 The Model . . . . .	32
2.2.2 Dynamic Properties . . . . .	34
2.2.3 Conclusions . . . . .	36
<b>Dynamic Processes on Network Substrates</b>	<b>37</b>
3.1 Discrete Representations . . . . .	38
3.1.1 A Transport Process . . . . .	39
3.1.2 An Agent-Based System . . . . .	45
3.2 Continuous Representations . . . . .	45
3.2.1 One-Dimensional Phase Oscillators . . . . .	46
3.2.2 Multidimensional Oscillators . . . . .	48
3.3 Conclusions . . . . .	50

<b>A Model for Cultural Organization</b>	<b>51</b>
4.1 An Agent-Based System . . . . .	51
4.1.1 Culture as Macroscopic Organization . . . . .	52
4.1.2 The Axelrod Model . . . . .	53
4.1.3 Neighborhood Consensus Model . . . . .	56
4.2 Cultural Drift as Random Noise . . . . .	63
4.2.1 Simulated Annealing . . . . .	63
4.2.2 Variations with $p$ and $q$ . . . . .	67
4.3 Conclusions . . . . .	69
<b>A Model for Linguistic Diversification</b>	<b>71</b>
5.1 Human Communication . . . . .	72
5.1.1 Social Constraints . . . . .	74
5.1.2 The Macro Models . . . . .	75
5.1.3 The Micro Models . . . . .	76
5.2 The Model - Regional Accent Diversification . . . . .	77
5.2.1 Interaction Network . . . . .	77
5.2.2 Continuous Dynamic Variable . . . . .	79
5.2.3 Mathematical Formulation . . . . .	82
5.2.4 Pronunciation Synchronization . . . . .	83
5.3 Numerical Analysis . . . . .	84
5.3.1 Negative Internal Couplings . . . . .	85
5.3.2 Distinct Individual Internal Couplings . . . . .	86
5.3.3 An Interpretation of the Model's Topology . . . . .	86
5.4 Conclusions . . . . .	88
<b>Conclusion</b>	<b>89</b>
<b>Appendix - Master Stability Function</b>	<b>93</b>
<b>References</b>	<b>101</b>
