

CONTENTS

1.	INTRODUCTION	1
1.1.	Background	1
1.2.	The principle of MNA	4
1.3.	Sources of contamination	6
2.	MIGRATION AND RETENTION MECHANISMS	7
2.1.	Overview	7
2.2.	Radioactive decay	7
2.3.	Physical processes	8
2.3.1.	Introduction	8
2.3.2.	Advection, diffusion, dispersion	8
2.3.3.	Soil erosion and wash-off	10
2.3.4.	Sedimentation and erosion	14
2.3.5.	Filtration	15
2.3.6.	Gaseous transport	16
2.4.	Chemical processes	20
2.4.1.	Introduction	20
2.4.2.	Aqueous complexation	20
2.4.3.	Complexation by natural organic matter	21
2.4.4.	Precipitation and dissolution	22
2.4.5.	Sorption	24
2.4.6.	Isotopic substitution	29
2.4.7.	Colloid formation	29
2.5.	Biological processes	30
2.5.1.	Overview	30
2.5.2.	Biologically induced physical changes	31
2.5.3.	Biologically induced chemical changes	31
3.	GEOCHEMISTRY OF SELECTED RADIONUCLIDES	36
3.1.	Introduction	36
3.2.	Geochemistry of uranium	38
3.2.1.	Aqueous chemistry	38
3.2.2.	Solid geochemistry	39
3.2.3.	Adsorption/desorption behaviour	41
3.2.4.	Microbiological interactions	42

3.3.	Geochemistry of neptunium	42
3.3.1.	Aqueous chemistry	42
3.3.2.	Solid geochemistry	44
3.3.3.	Adsorption/desorption behaviour	45
3.3.4.	Microbiological interactions	45
3.4.	Geochemistry of technetium	46
3.4.1.	Aqueous chemistry	46
3.4.2.	Solid geochemistry	47
3.4.3.	Adsorption/desorption behaviour	48
3.4.4.	Microbiological interactions	48
3.5.	Geochemistry of caesium	49
3.5.1.	Aqueous chemistry	49
3.5.2.	Solid geochemistry	49
3.5.3.	Adsorption/desorption behaviour	49
3.5.4.	Microbiological interactions	50
3.6.	Geochemistry of strontium	50
3.6.1.	Aqueous chemistry	50
3.6.2.	Solid geochemistry	51
3.6.3.	Adsorption/desorption behaviour	51
3.6.4.	Microbiological interactions	51
3.7.	Geochemistry of thorium	51
3.7.1.	Aqueous chemistry	51
3.7.2.	Solid geochemistry	52
3.7.3.	Adsorption/desorption behaviour	52
3.7.4.	Microbiological interactions	53
3.8.	Geochemistry of radium	53
3.8.1.	Aqueous chemistry	53
3.8.2.	Solid geochemistry	53
3.8.3.	Adsorption/desorption behaviour	54
3.8.4.	Microbiological interactions	54
3.9.	Geochemistry of lead	55
3.9.1.	Aqueous chemistry	55
3.9.2.	Solid geochemistry	55
3.9.3.	Adsorption/desorption behaviour	56
3.9.4.	Microbiological interactions	56
4.	DATA AVAILABILITY AND UNCERTAINTY	57
4.1.	Types of data and associated uncertainties	57
4.1.1.	Site characterization	58
4.2.	Generic chemical databases	58

4.2.1.	Thermodynamic databases	58
4.2.2.	Kinetic data	61
4.2.3.	Sorption data	62
4.2.4.	Ion exchange	63
4.2.5.	Surface complexation	63
4.3.	Parameter estimation methods	65
5.	ASSESSING THE POTENTIAL OF MNA	66
5.1.	Modelling approaches and tools	66
5.1.1.	Introduction	66
5.1.2.	Geochemical calculation codes	66
5.1.3.	Coupled geochemistry-transport codes	67
5.1.4.	Modelling biological effects	69
5.1.5.	Airborne transport	71
5.1.6.	Modelling food chain transfer	71
5.2.	Monitoring	72
6.	CONCLUDING DISCUSSION	73
6.1.	Scope, opportunities and limitations	73
6.2.	Enhancing attenuation	74
APPENDIX I:	OVERVIEW OF PUBLISHED THERMOCHEMICAL DATASETS	77
APPENDIX II:	ADDITIONAL DETAILS OF PUBLISHED THERMOCHEMICAL DATASETS	78
APPENDIX III:	PRINCIPAL CHARACTERISTICS OF COUPLED GEOCHEMISTRY-TRANSPORT CODES	79
