

CONTENTS

Preface	v
The Phase Diagram of the Hubbard Model <i>M. W. Long</i>	1
Charge and Spin Fluctuations in the Hubbard Model: Fermi Liquid Properties at Low Temperatures <i>M. Lavagna</i>	21
The t - J and Frustrated Heisenberg Models: A Status Report on Numerical Studies <i>E. Dagotto</i>	43
The Hubbard-Stratonovich Transformation and the Hubbard Model <i>S. Sorella</i>	73
SO_4 Symmetry in a Hubbard Model <i>C. N. Yang and S. C. Zhang</i>	113
Mott Transition in an Exactly Solvable K.S.S.H. Model <i>A. Montorsi and M. Rasetti</i>	121
The Hubbard Model: From Small to Large U <i>D. Baeriswyl and W. von der Linden</i>	135
First Order Metal-Insulator Transition in an Alloy Analogy Approach to the Hubbard Model <i>M. Corrias</i>	151
Renormalization Group Approach to Quasi-One-Dimensional Conductors <i>C. Bourbonnais and L. G. Caron</i>	169
