Contents

Preface vii

Part 1: Black Holes and Quantum Mechanics 1

1. The Schwarzschild Black Hole 3
   - 1.1 Schwarzschild Coordinates . . . 3
   - 1.2 Tortoise Coordinates . . . 7
   - 1.3 Near Horizon Coordinates (Rindler space) . . . 8
   - 1.4 Kruskal–Szekeres Coordinates . . . 10
   - 1.5 Penrose Diagrams . . . 14
   - 1.6 Formation of a Black Hole . . . 15
   - 1.7 Fidos and Frefos and the Equivalence Principle . . . 21
2. Scalar Wave Equation in a Schwarzschild Background 25
   - 2.1 Near the Horizon . . . 28
3. Quantum Fields in Rindler Space 31
   - 3.1 Classical Fields . . . 31
   - 3.2 Entanglement . . . 32
   - 3.3 Review of the Density Matrix . . . 34
   - 3.4 The Unruh Density Matrix . . . 36
   - 3.5 Proper Temperature . . . 39
4. Entropy of the Free Quantum Field in Rindler Space 43
   - 4.1 Black Hole Evaporation . . . 48

5. Thermodynamics of Black Holes 51

6. Charged Black Holes 55

7. The Stretched Horizon 61

8. The Laws of Nature 69
   - 8.1 Information Conservation 69
   - 8.2 Entanglement Entropy 71
   - 8.3 Equivalence Principle 77
   - 8.4 Quantum Xerox Principle 79

9. The Puzzle of Information Conservation in Black Hole Environments 81
   - 9.1 A Brick Wall? 84
   - 9.2 Black Hole Complementarity 85
   - 9.3 Baryon Number Violation 89

10. Horizons and the UV/IR Connection 95

Part 2: Entropy Bounds and Holography 99

11. Entropy Bounds 101
   - 11.1 Maximum Entropy 101
   - 11.2 Entropy on Light-like Surfaces 105
   - 11.3 Friedman–Robertson–Walker Geometry 110
   - 11.4 Bousso's Generalization 114
   - 11.5 de Sitter Cosmology 119
   - 11.6 Anti de Sitter Space 123

12. The Holographic Principle and Anti de Sitter Space 127
   - 12.1 The Holographic Principle 127
   - 12.2 AdS Space 128
   - 12.3 Holography in AdS Space 130
   - 12.4 The AdS/CFT Correspondence 133
   - 12.5 The Infrared Ultraviolet Connection 135
   - 12.6 Counting Degrees of Freedom 138

3. Black Holes in a Box 141
13.1 The Horizon 144
13.2 Information and the AdS Black Hole 144

art 3: Black Holes and Strings 149

. Strings 151
14.1 Light Cone Quantum Mechanics 153
14.2 Light Cone String Theory 156
14.3 Interactions 159
14.4 Longitudinal Motion 161

Entropy of Strings and Black Holes 165

nclusions 175

bliography 179
