

CONTENTS

1	Introduction to supersymmetry	1
1.1	The unreasonable effectiveness of the Standard Model	1
1.2	SUSY algebra	4
1.3	SUSY representations	8
1.4	Extended SUSY	11
1.5	Central charges	15
	References	17
2	SUSY Lagrangians	19
2.1	The free Wess–Zumino model	19
2.2	Commutators of SUSY transformations	21
2.3	The supercurrent and the SUSY algebra	24
2.4	The interacting Wess–Zumino model	26
2.5	SUSY Yang–Mills	29
2.6	SUSY gauge theories	30
2.7	Superspace	34
2.8	$\mathcal{N} = 0$ SUSY	38
2.9	Exercises	41
	References	41
3	SUSY gauge theories	43
3.1	Symmetries and group theory	43
3.2	Renormalization group	47
3.3	Quadratic divergence of the squark mass	52
3.4	Flat directions (classical moduli space)	53
3.5	The super Higgs mechanism	56
3.6	Exercises	60
	References	61
4	The minimal supersymmetric standard model	62
4.1	Particles, sparticles, and their interactions	62
4.2	Electroweak symmetry breaking	67
4.3	The sparticle spectrum	72
4.4	Gauge coupling unification	77
4.5	Radiative electroweak symmetry breaking	78
4.6	One-loop correction to the Higgs mass	79
4.7	Precision electroweak measurements	81
4.8	Problems with flavor and CP	82
4.9	Exercises	86
	References	86

5	SUSY breaking and the MSSM	90
5.1	Spontaneous SUSY breaking at tree-level	90
5.2	SUSY breaking scenarios	93
5.3	The goldstino	95
5.4	The goldstino theorem	97
5.5	Exercises	99
	References	99
6	Gauge mediation	101
6.1	Messengers of SUSY breaking	101
6.2	RG calculation of soft masses	102
6.3	Gauge mediation and the μ problem	105
6.4	Exercise	106
	References	106
7	Nonperturbative results	108
7.1	Monopoles	108
7.2	Anomalies in the path integral	113
7.3	Gauge anomalies	117
7.4	't Hooft's anomaly matching	118
7.5	Instantons	119
7.6	Instantons in broken gauge theories	121
7.7	NSVZ exact β function	123
7.8	Superconformal symmetry	125
	References	130
8	Holomorphy	133
8.1	Non-renormalization theorems	133
8.2	Wavefunction renormalization	134
8.3	Integrating out	135
8.4	The holomorphic gauge coupling	136
8.5	Gaugino condensation	139
8.6	NSVZ revisited	141
8.7	Exercises	143
	References	143
9	The Affleck–Dine–Seiberg superpotential	145
9.1	Symmetry and holomorphy	145
9.2	Consistency of W_{ADS} : moduli space	148
9.3	Consistency of W_{ADS} : mass perturbations	150
9.4	Generating W_{ADS} from instantons	152
9.5	Generating W_{ADS} from gaugino condensation	154
9.6	Vacuum structure	155
9.7	Exercise	155
	References	155

10	Seiberg duality for SUSY QCD	157
10.1	Phases of gauge theories	157
10.2	The moduli space for $F \geq N$	158
10.3	IR fixed points	160
10.4	Duality	162
10.5	Integrating out a flavor	165
10.6	Consistency	167
10.7	$F = N$: confinement with chiral symmetry breaking	168
10.8	$F = N$: consistency checks	171
10.9	$F = N + 1$: s-confinement	173
10.10	Connection to theories with $F > N + 1$	176
10.11	Exercises	179
	References	179
11	More Seiberg duality	182
11.1	The $SO(N)$ moduli space	182
11.2	Duality for $SO(N)$	184
11.3	Some special cases	186
11.4	Duality for $Sp(2N)$	187
11.5	Why chiral gauge theories are interesting	189
11.6	S-Confinement	190
11.7	Deconfinement	192
11.8	Exercises	194
	References	194
12	Dynamical SUSY breaking	196
12.1	A rule of thumb for SUSY breaking	196
12.2	The 3-2 model	196
12.3	The $SU(5)$ model	199
12.4	SUSY breaking and deformed moduli spaces	200
12.5	SUSY breaking from baryon runaways	202
12.6	Direct gauge mediation	205
12.7	Single sector models	207
12.8	Exercise	208
	References	208
13	The Seiberg–Witten theory	210
13.1	The Coulomb phase of $\mathcal{N} = 1$ $SO(N)$	210
13.2	Diversion on $SO(3)$	214
13.3	The dyonic dual	215
13.4	Elliptic curves	217
13.5	$\mathcal{N} = 2$: Seiberg–Witten	221
13.6	The Seiberg–Witten curve	225
13.7	Adding flavors	230
	References	231

14 Superconformal field theories	233
14.1 A-Maximization	233
14.2 The simplest chiral SCFT	234
14.3 $\mathcal{N} = 2$ and Argyres–Douglas points	239
14.4 $\mathcal{N} = 4$ and orbifolds	240
References	243
15 Supergravity	246
15.1 Supergravity: on-shell	246
15.2 Supergravity: off-shell	247
15.3 Coupling to matter	249
15.4 10 and 11 dimensions	251
15.5 Five dimensions	258
15.6 Exercises	259
References	259
16 Anomaly and gaugino mediation	262
16.1 “Supergravity” mediation	262
16.2 SUSY breaking	265
16.3 The μ problem	267
16.4 Slepton masses	269
16.5 Gaugino mediation	272
16.6 Exercise	273
