<b>Chapter I</b>	<b>The Experimental Background of the Theory of Special Relativity</b>	<b>1</b>
1.1	<i>Introduction</i>	1
1.2	<i>Galilean Transformations</i>	3
1.3	<i>Newtonian Relativity</i>	8
1.4	<i>Electromagnetism and Newtonian Relativity</i>	16
1.5	<i>Attempts to Locate the Absolute Frame; the Michelson-Morley Experiment</i>	18
1.6	<i>Attempts to Preserve the Concept of a Preferred Ether Frame; the Lorentz-Fitzgerald Contraction Hypothesis</i>	26
1.7	<i>Attempts to Preserve the Concept of a Preferred Ether Frame; the Ether-Drift Hypothesis</i>	28
1.8	<i>Attempts to Modify Electrodynamics</i>	33
1.9	<i>The Postulates of Special Relativity Theory</i>	35
1.10	<i>Einstein and the Origin of Relativity Theory</i>	38
<b>Chapter II</b>	<b>Relativistic Kinematics</b>	<b>50</b>
2.1	<i>The Relativity of Simultaneity</i>	50
2.2	<i>Derivation of the Lorentz Transformation Equations</i>	56
2.3	<i>Some Consequences of the Lorentz Transformation Equations</i>	62
2.4	<i>A More Physical Look at the Main Features of the Lorentz Transformation Equations</i>	65
2.5	<i>The Observer in Relativity</i>	77
2.6	<i>The Relativistic Addition of Velocities</i>	79
2.7	<i>Aberration and Doppler Effect of Relativity</i>	84
2.8	<i>The Common Sense of Special Relativity</i>	91
<b>Chapter III</b>	<b>Relativistic Dynamics</b>	<b>110</b>
3.1	<i>Mechanics and Relativity</i>	110
3.2	<i>The Need to Redefine Momentum</i>	111
3.3	<i>Relativistic Momentum</i>	114
3.4	<i>Alternative Views of Mass in Relativity</i>	118

3.5	<i>The Relativistic Force Law and the Dynamics of a Single Particle</i>	119
3.6	<i>The Equivalence of Mass and Energy</i>	131
3.7	<i>The Transformation Properties of Momentum, Energy, Mass, and Force</i>	143
<b>Chapter IV</b>	<b>Relativity and Electromagnetism</b>	<b>157</b>
4.1	<i>Introduction</i>	157
4.2	<i>The Interdependence of Electric and Magnetic Fields</i>	158
4.3	<i>The Transformation for E and B</i>	163
4.4	<i>The Field of a Uniformly Moving Point Charge</i>	167
4.5	<i>Forces and Fields near a Current-Carrying Wire</i>	172
4.6	<i>Forces between Moving Charges</i>	175
4.7	<i>The Invariance of Maxwell's Equations</i>	178
4.8	<i>The Possible Limitations of Special Relativity</i>	181
<b>Supplementary Topic A</b>		
	<b>The Geometric Representation of Space-Time</b>	<b>188</b>
A-1	<i>Space-Time Diagrams</i>	188
A-2	<i>Simultaneity, Contraction, and Dilation</i>	193
A-3	<i>The Time Order and Space Separation of Events</i>	196
<b>Supplementary Topic B</b>		
	<b>The Twin Paradox</b>	<b>201</b>
B-1	<i>Introduction</i>	201
B-2	<i>The Route Dependence of Proper Time</i>	201
B-3	<i>Space-Time Diagram of the "Twin Paradox"</i>	203
B-4	<i>Some Other Considerations</i>	207
B-5	<i>An Experimental Test</i>	208
<b>Supplementary Topic C</b>		
	<b>The Principle of Equivalence and General Relativity</b>	<b>210</b>
C-1	<i>Introduction</i>	210
C-2	<i>The Principle of Equivalence</i>	210
C-3	<i>The Gravitational Red Shift</i>	212
C-4	<i>General Relativity Theory</i>	214
<b>Answers to Problems</b>		<b>220</b>
<b>Index</b>		<b>223</b>
