

Contents

Introduction, 1

Chapter 1 Vectors and Linearity, 4

- 1** Vectors, 4
- 2** Geometric interpretations, 7
- 3** Matrices, 15
- 4** Linear functions, 25
- 5** Dot products, 37
- 6** Euclidean geometry, 46
- 7** Determinants, 51
- 8** Determinant expansions, 67

Chapter 2 Linear Algebra, 79

- 1** Linear equations, inverse matrices, 79
- 2** Some applications, 88
- 3** Theory of linear equations, 97
- 4** Vector spaces, subspaces, dimension, 108

- 5 Linear functions, 120
- 6 Differential operators, 130
- 7 Complex vector spaces, 147
- 8 Orthonormal bases, 160
- 9 Eigenvectors, 167
- 10 Coordinates, 179

Chapter 3 Derivatives, 190

- 1 Vector functions, 190
- 2 Functions of one variable, 204
- 3 Arc length, 212
- 4 Line integrals, 220
- 5 Partial derivatives, 227
- 6 Vector partial derivatives, 234
- 7 Limits and continuity, 240
- 8 Differentials, 250
- 9 Newton's method, 263

Chapter 4 Vector Calculus, 272

- 1 Directional derivatives, 272
- 2 The gradient, 277
- 3 The chain rule, 287
- 4 Implicitly defined functions, 301
- 5 Curvilinear coordinates, 310
- 6 Inverse and implicit function theorems, 325
- 7 Surfaces and tangents, 337

Chapter 5 Real-Valued Functions, 350

- 1 Extreme values, 350
- 2 Quadratic polynomials, 361

- 3 Taylor expansions, 380
- 4 Taylor expansions and extreme values, 390
- 5 Fourier series, 397
- 6 Modified Fourier expansions, 405
- 7 Heat and wave equations, 412
- 8 Uniform convergence, 422
- 9 Orthogonal functions, 429

Chapter 6 Multiple Integration, 440

- 1 Iterated integrals, 440
- 2 Multiple integrals, 449
- 3 Change of variable, 467
- 4 Improper integrals, 482
- 5 Estimates of integrals, 492
- 6 Numerical integration, 498

Chapter 7 Vector Field Theory, 510

- 1 Green's theorem, 510
- 2 Conservative vector fields, 522
- 3 Surface integrals, 530
- 4 Stokes's theorem, 541
- 5 Gauss's theorem, 551
- 6 The operators ∇ , $\nabla \times$, and $\nabla \cdot$, 557
- 7 Differential forms, 565
- 8 The exterior derivative, 574

Appendix, 579

- 1 Introduction, 579
- 2 The chain rule, 583

- 3 Arc length formula, 585
- 4 Convergence of Fourier series, 587
- 5 Proof of the inverse and implicit function theorems, 589
- 6 Proof of Lagrange's theorem, 595
- 7 Proof of Taylor's theorem, 598
- 8 Existence of the Riemann integral, 601
- 9 The change-of-variable formula for integrals, 605
