PREFACE VIII

CHAPTER 1 PRELIMINARIES 1

- 1.1 Vectors and Matrices 1
- 1.2 MATLAB 4
- 1.3 Special Kinds of Matrices 7
- 1.4 The Geometry of Vector Operations 9

CHAPTER 2 SOLVING LINEAR EQUATIONS 16

- 2.1 Systems of Linear Equations and Matrices 17
- 2.2 The Geometry of Low-Dimensional Solutions 24
- 2.3 Gaussian Elimination 33
- 2.4 Reduction to Echelon Form 45
- 2.5 Linear Equations with Special Coefficients 52
- 2.6 *Uniqueness of Reduced Echelon Form 58

CHAPTER 3 MATRICES AND LINEARITY 61

- 3.1 Matrix Multiplication of Vectors 62
- 3.2 Matrix Mappings 67
- 3.3 Linearity 72
- 3.4 The Principle of Superposition 79
- 3.5 Composition and Multiplication of Matrices 83

- 3.6 Properties of Matrix Multiplication 88
- 3.7 Solving Linear Systems and Inverses 92
- 3.8 Determinants of 2×2 Matrices 101

CHAPTER 4 SOLVING ORDINARY DIFFERENTIAL EQUATIONS 101

- 4.1 A Single Differential Equation 107
- 4.2 Graphing Solutions to Differential Equations 119
- 4.3 Phase Space Pictures and Equilibria 126
- 4.4 *Separation of Variables 133
- 4.5 Uncoupled Linear Systems of Two Equations 142
- 4.6 Coupled Linear Systems 149
- 4.7 The Initial Value Problem and Eigenvectors 153
- 4.8 Eigenvalues of 2×2 Matrices 162
- 4.9 Initial Value Problems Revisited 168
- 4.10 *Markov Chains 175

CHAPTER 5 VECTOR SPACES 185

- 5.1 Vector Spaces and Subspaces 186
- 5.2 Construction of Subspaces 192
- 5.3 Spanning Sets and MATLAB 198
- 5.4 Linear Dependence and Linear Independence 201
- 5.5 Dimension and Bases 206
- 5.6 The Proof of the Main Theorem 211

CHAPTER 6 CLOSED FORM SOLUTIONS FOR PLANAR ODES 218

- 6.1 The Initial Value Problem 219
- 6.2 Closed Form Solutions by the Direct Method 225
- 6.3 Solutions Using Matrix Exponentials 234
- 6.4 Linear Normal Form Planar Systems 241
- 6.5 Similar Matrices 244
- 6.6 *Formulas for Matrix Exponentials 251
- 6.7 Second-Order Equations 256

CHAPTER 7 QUALITATIVE THEORY OF PLANAR ODES 263

- 7.1 Sinks, Saddles, and Sources 263
- 7.2 Phase Portraits of Sinks 270
- 7.3 Phase Portraits of Nonhyperbolic Systems 278

CHAPTER 8 DETERMINANTS AND EIGENVALUES 285

- 8.1 Determinants 285
- 8.2 Eigenvalues 297
- 8.3 *Appendix: Existence of Determinants 305

CHAPTER 9 LINEAR MAPS AND CHANGES OF COORDINATES 309

- 9.1 Linear Mappings and Bases 309
- 9.2 Row Rank Equals Column Rank 316
- 9.3 Vectors and Matrices in Coordinates 320
- 9.4 Matrices of Linear Maps on a Vector Space 331

CHAPTER 10 ORTHOGONALITY 336

- 10.1 Orthonormal Bases 336
- 10.2 Least Squares Approximations 340
- 10.3 Least Squares Fitting of Data 347
- 10.4 Symmetric Matrices 356
- 10.5 Orthogonal Matrices and QR Decompositions 360

CHAPTER 11 AUTONOMOUS PLANAR NONLINEAR SYSTEMS 368

- 11.1 Introduction 369
- 11.2 Equilibria and Linearization 375
- 11.3 Periodic Solutions 384
- 11.4 Stylized Phase Portraits 390

CHAPTER 12 BIFURCATION THEORY 394

- 12.1 Two-Species Population Models 395
- 12.2 Examples of Bifurcations 402
- 12.3 The Continuous Flow Stirred Tank Reactor 416
- 12.4 The Remaining Global Bifurcations 423
- 12.5 *Saddle-Node Bifurcations Revisited 428
- 12.6 *Hopf Bifurcations Revisited 434

CHAPTER 13 MATRIX NORMAL FORMS 440

- 13.1 Real Diagonalizable Matrices 440
- 13.2 Simple Complex Eigenvalues 446
- 13.3 Multiplicity and Generalized Eigenvectors 456
- 13.4 The Jordan Normal Form Theorem 462
- 13.5 *Appendix: Markov Matrix Theory 471
- 13.6 *Appendix: Proof of Jordan Normal Form 475

CHAPTER 14	HIGHER DIMENSIONAL SYSTEMS	479
14.1	Linear Systems in Jordan Normal Form	480
14.2	Qualitative Theory near Equilibria	489
14.3	MATLAB ode45 in One Dimension	495
14.4	Higher Dimensional Systems Using ode45	503
14.5	Quasiperiodic Motions and Tori	509
14.6	Chaos and the Lorenz Equation	516
CHAPTER 15	LINEAR DIFFERENTIAL EQUATIONS	524
15.1	Solving Systems in Original Coordinates	525
15.2	Higher Order Equations	537
15.3	Linear Differential Operators	544
15.4	Undetermined Coefficients	550
15.5	Periodic Forcing and Resonance	557
CHAPTER 16	LAPLACE TRANSFORMS	564
16.1	The Method of Laplace Transforms	565
16.2	Laplace Transforms and Their Computation	571
16.3	Partial Fractions	579
16.4	Discontinuous Forcing	584
16.5	RLC Circuits	590
CHAPTER 17	ADDITIONAL TECHNIQUES FOR SOLVING ODES	
17.1	Nonconstant Coefficient Linear Equations	597
17.2	Variation of Parameters for Systems	602
17.3	The Wronskian	608
17.4	Higher Order Equations	611
17.5	Simplification by Substitution	619
17.6	Exact Differential Equations	623
17.7	Hamiltonian Systems	633
CHAPTER 18	NUMERICAL SOLUTIONS OF ODES	639
18.1	A Description of Numerical Methods	640
18.2	Error Bounds for Euler's Method	652
18.3	Local and Global Error Bounds	658
18.4	Appendix: Variable Step Methods	667

MATLAB COMMANDS 669

ANSWERS TO SELECTED ODD-NUMBERED PROBLEMS 675

INDEX 697
