## *“Massive” Higher Spin Multiplets and Holography*

<b>M. Bianchi, V. Didenko</b>	<b>1</b>
1 Introduction . . . . .	2
2 Historical motivations . . . . .	2
3 Lessons from <i>AdS/CFT</i> . . . . .	6
4 Stringy $AdS_5 \times S^5$ and higher spin holography . . . . .	7
5 $N=4$ SYM spectrum: Polyakov Theory . . . . .	11
6 HS extension of (P)SU(2,2 4) . . . . .	13
7 Conclusions and outlook . . . . .	17
References . . . . .	18

## *Yang-Mills and $N$ -homogeneous algebras*

<b>M. Dubois-Violette, O.F. Boffill</b>	<b>21</b>
Introduction . . . . .	22
1 $N$ -differentials and $N$ -complexes . . . . .	22
2 Homogeneous algebras of degree $N$ . . . . .	23
3 Yang-Mills algebras . . . . .	30
4 Appendix . . . . .	33
References . . . . .	34

## *Higher-Spin Gauge Fields and Duality*

<b>D. Francia, C.M. Hull</b>	<b>35</b>
1 Introduction . . . . .	36
2 Young Tableaux . . . . .	37
3 Duality . . . . .	37
4 Bi-forms . . . . .	39
5 $D$ -Dimensional Linearised Gravity . . . . .	41
6 General Bi-Form Gauge Theories . . . . .	43
7 Multi-Forms . . . . .	44
8 Multi-Form Gauge Theories . . . . .	45
References . . . . .	47

## *Higher spin fields from indefinite Kac-Moody algebras*

<b>S. de Buyl, A. Kleinschmidt</b>	<b>49</b>
1 Introduction and Motivation . . . . .	50
2 Field content of Kac-Moody algebras . . . . .	52
3 Relation to higher spin fields . . . . .	58
4 Space-time concepts . . . . .	59

5	Conclusions . . . . .	61
A	Coset Models . . . . .	61
	References . . . . .	62
 <i>Holography, Duality and Higher-Spin Theories</i>		
	<b>A. Petkou</b> . . . . .	<b>65</b>
1	Introduction . . . . .	66
2	Higher-spin currents and the operator spectrum of Conformal Field Theories . . . . .	66
3	Holography of the critical three-dimensional $O(N)$ vector model . . . . .	68
4	The role of boundary double-trace transformations and the first trace of duality . . . . .	71
5	Double-trace deformations and the duality of linearized HS gauge theories . . . . .	74
6	Discussion . . . . .	77
	References . . . . .	77
 <i>An Introduction to Free Higher-Spin Fields</i>
