Preface to the Third Edition vii

Preface to the Second Edition ix

Preface to the First Edition xi

Notation xxiii

Chapter 1 | Introduction 1

1. Elasticity 1
2. Stress 2
3. Notation for Forces and Stresses 3
4. Components of Stress 4
5. Components of Strain 6
6. Hooke's Law 8
7. Index Notation 12
- Problems 14

Chapter 2 | Plane Stress and Plane Strain 15

8. Plane Stress 15
9. Plane Strain 15
10. Stress at a Point 17
11. Strain at a Point 23
12. Measurement of Surface Strains 24
13. Construction of Mohr Strain Circle for Strain Rosette 26

- 14. Differential Equations of Equilibrium 26
- 15. Boundary Conditions 28
- 16. Compatibility Equations 29
- 17. Stress Function 31
- Problems 33

Chapter 3 | Two-dimensional Problems in Rectangular Coordinates 35

- 18. Solution by Polynomials 35
- 19. End Effects. Saint-Venant's Principle 39
- 20. Determination of Displacements 40
- 21. Bending of a Cantilever Loaded at the End 41
- 22. Bending of a Beam by Uniform Load 46
- 23. Other Cases of Continuously Loaded Beams 50
- 24. Solution of the Two-dimensional Problem in the Form of a Fourier Series 53
- 25. Other Applications of Fourier Series. Gravity Loading 60
- 26. End Effects. Eigensolutions 61
- Problems 63

Chapter 4 | Two-dimensional Problems in Polar Coordinates 65

- 27. General Equations in Polar Coordinates 65
- 28. Stress Distribution Symmetrical about an Axis 68
- 29. Pure Bending of Curved Bars 71
- 30. Strain Components in Polar Coordinates 75
- 31. Displacements for Symmetrical Stress Distributions 77
- 32. Rotating Disks 80
- 33. Bending of a Curved Bar by a Force at the End 83
- 34. Edge Dislocation 88
- 35. The Effect of Circular Holes on Stress Distributions in Plates 90
- 36. Concentrated Force at a Point of a Straight Boundary 97
- 37. Any Vertical Loading of a Straight Boundary 104
- 38. Force Acting on the End of a Wedge 109
- 39. Bending Couple Acting on the End of a Wedge 112
- 40. Concentrated Force Acting on a Beam 113
- 41. Stresses in a Circular Disk 122
- 42. Force at a Point of an Infinite Plate 127
- 43. Generalized Solution of the Two-dimensional Problem in Polar Coordinates 132
- 44. Applications of the Generalized Solution in Polar Coordinates 136
- 45. A Wedge Loaded along the Faces 139
- 46. Eigensolutions for Wedges and Notches 141
- Problems 144

Chapter 5 | Photoelastic and Moiré Experimental Methods 150

- 47. Experimental Methods and Verifications 150
- 48. Photoelastic Stress Measurement 150
- 49. Circular Polariscopes 155
- 50. Examples of Photoelastic Stress Determination 157
- 51. Determination of the Principal Stresses 160
- 52. Three-dimensional Photoelasticity 162
- 53. The Moiré Method 164

Chapter 6 | Two-dimensional Problems in Curvilinear Coordinates 168

- 54. Functions of a Complex Variable 168
- 55. Analytic Functions and Laplace's Equation 170
Problems 171
- 56. Stress Functions in Terms of Harmonic and Complex
Functions 172
- 57. Displacement Corresponding to a Given Stress Function 175
- 58. Stress and Displacement in Terms of Complex Potentials 176
- 59. Resultant of Stress on a Curve. Boundary Conditions 179
- 60. Curvilinear Coordinates 181
- 61. Stress Components in Curvilinear Coordinates 185
Problems 187
- 62. Solutions in Elliptic Coordinates. Elliptic Hole in Uniformly
Stressed Plate 187
- 63. Elliptic Hole in a Plate under Simple Tension 191
- 64. Hyperbolic Boundaries. Notches 194
- 65. Bipolar Coordinates 196
- 66. Solutions in Bipolar Coordinates 198
Other Curvilinear Coordinates 202
Assignable Shapes 203
- 67. Determination of the Complex Potentials from Given
Boundary Conditions. Methods of Muskhelishvili 203
- 68. Formulas for the Complex Potentials 206
- 69. Properties of Stress and Deformation Corresponding to Complex Poten-
tials Analytic in the Material Region around a Hole 207
- 70. Theorems on Boundary Integrals 209
- 71. A Mapping Function $\omega(\xi)$ for the Elliptic Hole. The Second
Boundary Integral 212

- 72. The Elliptic Hole. Formula for $\psi(\xi)$ 213
- 73. The Elliptic Hole. Particular Problems 214
Problems 217

Chapter 7 | Analysis of Stress and Strain in Three Dimensions 219

- 74. Introduction 219
- 75. Principal Stresses 221
- 76. Stress Ellipsoid and Stress-director Surface 222
- 77. Determination of the Principal Stresses 223
- 78. Stress Invariants 224
- 79. Determination of the Maximum Shearing Stress 224
- 80. Homogeneous Deformation 226
- 81. Strain at a Point 228
- 82. Principal Axes of Strain 231
- 83. Rotation 232
Problems 234

Chapter 8 | General Theorems 235

- 84. Differential Equations of Equilibrium 235
- 85. Conditions of Compatibility 237
- 86. Determination of Displacements 240
- 87. Equations of Equilibrium in Terms of Displacements 240
- 88. General Solution for the Displacements 242
- 89. The Principal of Superposition 243
- 90. Strain Energy 244
- 91. Strain Energy of an Edge Dislocation 249
- 92. Principle of Virtual Work 250
- 93. Castigliano's Theorem 254
- 94. Applications of the Principle of Least Work—Rectangular
Plates 258
- 95. Effective Width of Wide Beam Flanges 262
Problems 268
- 96. Uniqueness of Solution 269
- 97. The Reciprocal Theorem 271
- 98. Approximate Character of the Plane Stress Solutions 274
Problems 277

**Chapter 9 | Elementary Problems of Elasticity in Three
Dimensions 278**

- 99. Uniform Stress 278
- 100. Stretching of a Prismatical Bar by Its Own Weight 279

101. Twist of Circular Shafts of Constant Cross Section 282
 102. Pure Bending of Prismatical Bars 284
 103. Pure Bending of Plates 288

Chapter 10 | Torsion 291

104. Torsion of Straight Bars 291
 105. Elliptic Cross Section 297
 106. Other Elementary Solutions 299
 107. Membrane Analogy 303
 108. Torsion of a Bar of Narrow Rectangular Cross Section 307
 109. Torsion of Rectangular Bars 309
 110. Additional Results 313
 111. Solution of Torsional Problems by Energy Method 315
 112. Torsion of Rolled Profile Sections 321
 113. Experimental Analogies 324
 114. Hydrodynamical Analogies 325
 115. Torsion of Hollow Shafts 328
 116. Torsion of Thin Tubes 332
 117. Screw Dislocations 336
 118. Torsion of a Bar in Which One Cross Section Remains Plane 338
 119. Torsion of Circular Shafts of Variable Diameter 341
 Problems 349

Chapter 11 | Bending of Bars 354

120. Bending of a Cantilever 354
 121. Stress Function 356
 122. Circular Cross Section 358
 123. Elliptic Cross Section 359
 124. Rectangular Cross Section 361
 125. Additional Results 366
 126. Nonsymmetrical Cross Sections 369
 127. Shear Center 371
 128. The Solution of Bending Problems by the Soap-film Method 374
 129. Displacements 378
 130. Further Investigations of Bending 378

Chapter 12 | Axisymmetric Stress and Deformation in a Solid of Revolution 380

131. General Equations 380
 132. Solution by Polynomials 383
 133. Bending of a Circular Plate 385

134. The Rotating Disk as a Three-dimensional Problem 388
135. Force at a Point in an Infinite Solid 390
136. Spherical Container under Internal or External Uniform Pressure 392
137. Local Stresses around a Spherical Cavity 396
138. Force on Boundary of a Semi-infinite Body 398
139. Load Distributed over a Part of the Boundary of a Semi-infinite Solid 403
140. Pressure between Two Spherical Bodies in Contact 409
141. Pressure between Two Bodies in Contact. More General Case 414
142. Impact of Spheres 420
143. Symmetrical Deformation of a Circular Cylinder 422
144. The Circular Cylinder with a Band of Pressure 425
145. Boussinesq's Solution in Two Harmonic Functions 428
146. The Helical Spring under Tension (Screw Dislocation in a Ring) 429
147. Pure Bending of an Incomplete Ring 432

Chapter 13 | Thermal Stress 433

148. The Simplest Cases of Thermal Stress Distribution. Method of Strain Suppression 433
Problems 438
149. Longitudinal Temperature Variation in a Strip 439
150. The Thin Circular Disk: Temperature Symmetrical about Center 441
151. The Long Circular Cylinder 443
Problems 452
152. The Sphere 452
153. General Equations 456
154. Thermoelastic Reciprocal Theorem 459
155. Overall Thermoelastic Deformations. Arbitrary Temperature Distribution 460
156. Thermoelastic Displacement. Maisel's Integral Solution 463
Problems 466
157. Initial Stress 466
158. Total Volume Change Associated with Initial Stress 468
159. Plane Strain and Plane Stress. Method of Strain Suppression 469
160. Two-dimensional Problems with Steady Heat Flow 470
161. Thermal Plane Stress Due to Disturbance of Uniform Heat Flow by an Insulated Hole 475
162. Solutions of the General Equations. Thermoelastic Displacement Potential 476
163. The General Two-dimensional Problem for Circular Regions 481
164. The General Two-dimensional Problem in Complex Potentials 482

Chapter 14 | The Propagation of Waves in Elastic Solid Media 485

- 165. Introduction 485
- 166. Waves of Dilatation and Waves of Distortion in Isotropic Elastic Media 486
- 167. Plane Waves 487
- 168. Longitudinal Waves in Uniform Bars. Elementary Theory 492
- 169. Longitudinal Impact of Bars 497
- 170. Rayleigh Surface Waves 505
- 171. Spherically Symmetric Waves in the Infinite Medium 508
- 172. Explosive Pressure in a Spherical Cavity 510

Appendix | The Application of Finite-difference Equations in Elasticity 515

- 1. Derivation of Finite Difference Equations 515
- 2. Methods of Successive Approximation 520
- 3. Relaxation Method 522
- 4. Triangular and Hexagonal Nets 527
- 5. Block and Group Relaxation 532
- 6. Torsion of Bars with Multiply-connected Cross Sections 534
- 7. Points Near the Boundary 536
- 8. Biharmonic Equation 538
- 9. Torsion of Circular Shafts of Variable Diameter 545
- 10. Solutions by Digital Computer 549
