Tension, Compression, and Shear	1
1.1	Introduction to Mechanics of Materials 1
1.2	Normal Stress and Strain 3
1.3	Mechanical Properties of Materials 10
1.4	Elasticity, Plasticity, and Creep 20
1.5	Linear Elasticity, Hooke's Law, and Poisson's Ratio 23
1.6	Shear Stress and Strain 28
1.7	Allowable Stresses and Allowable Loads 39
1.8	Design for Axial Loads and Direct Shear 44
	Problems 49
Axially Loaded Members 67	
2.1	Introduction 67
2.2	Changes in Lengths of Axially Loaded Members 68
2.3	Changes in Lengths Under Nonuniform Conditions 77
2.4	Statically Indeterminate Structures 84
2.5	Thermal Effects, Misfits, and Prestrains 93
2.6	Stresses on Inclined Sections 105
2.7	Strain Energy 116
*2.8	Impact Loading 128
*2.9	Repeated Loading and Fatigue 136
*2.1	0 Stress Concentrations 138
*2.1	1 Nonlinear Behavior 144
*2.1	2 Elastoplastic Analysis 149
	Problems 155

^{*}Stars denote specialized and advanced topics.

	3.3 3.4 3.5 3.6 3.7	Circular Bars of Linearly Elastic Materials 189 Nonuniform Torsion 202 Stresses and Strains in Pure Shear 209 Relationship Between Moduli of Elasticity <i>E</i> and <i>G</i> 216 Transmission of Power by Circular Shafts 217
	3.8	Statically Indeterminate Torsional Members 222
	J.9 2 10	Thin Welled Types 224
	*3 11	Stress Concentrations in Transien 242
	0.11	Problems 245
4	Shear Forces and Bending Momen	ts 264
	4.1	Introduction 264
	4.2	Types of Beams, Loads, and Reactions 264
	4.3	Shear Forces and Bending Moments 269
	4.4	Relationships Between Loads, Shear Forces, and Bending Moments 276
	4.5	Shear-Force and Bending-Moment Diagrams 281 Problems 292
5	Stresses in Beams (Basic Topics)	300
	5.1	Introduction 300
	5.2	Pure Bending and Nonuniform Bending 301
	5.3	Curvature of a Beam 302
	5.4	Longitudinal Strains in Beams 304
	5.5	Normal Stresses in Beams (Linearly Elastic Materials) 309
	5.6	Design of Beams for Bending Stresses 321
	5.7	Nonprismatic Beams 330
	5.8	Shear Stresses in Beams of Rectangular Cross Section 334
	5.9	Shear Stresses in Beams of Circular Cross Section 343
	5.10	Shear Stresses in the Webs of Beams with Flanges 346
	*5.11	Built-Up Beams and Shear Flow 354
	*5.12	Beams with Axial Loads 358
	*5.13	Stress Concentrations in Bending 364
		Problems 366

	Composite Dealing 333	
6.3	Transformed-Section Method 403	
6.4	Doubly Symmetric Beams with Inclined Loads 409	
6.5	Bending of Unsymmetric Beams 416	
6.6	The Shear-Center Concept 421	
6.7	.7 Shear Stresses in Beams of Thin-Walled Open Cross	
	Sections 424	
6.8	Shear Stresses in Wide-Flange Beams 427	
6.9	Shear Centers of Thin-Walled Open Sections 431	
*6.10	Elastoplastic Bending 440	
	Problems 450	

Analysis of Stress and Strain 464

7.1	Introduction 464
7.2	Plane Stress 465
7.3	Principal Stresses and Maximum Shear Stresses 474
7.4	Mohr's Circle for Plane Stress 483
7.5	Hooke's Law for Plane Stress 500
7.6	Triaxial Stress 505
7.7	Plane Strain 510
	Problems 525

Applications of Plane Stress (Pressure Vessels, Beams, and Combined Loadings) 541		
8.1	Introduction 541	
8.2	Spherical Pressure Vessels 541	
8.3	Cylindrical Pressure Vessels 548	
8.4	Maximum Stresses in Beams 556	
8.5	Combined Loadings 566	
	Problems 583	

	= more than Equations of the Deficetion Curve 394	
9.3	Deflections by Integration of the Bending-Moment	
	Equation 600	
9.4	Deflections by Integration of the Shear-Force and Load	
	Equations 611	
9.5	Method of Superposition 617	
9.6	Moment-Area Method 626	
9.7	Nonprismatic Beams 636	
9.8	Strain Energy of Bending 641	
*9.9	Castigliano's Theorem 647	
*9.10	Deflections Produced by Impact 659	
*9.11	Discontinuity Functions 661	
*9.12	Use of Discontinuity Functions in Determining Beam	
	Deflections 673	
*9.13	Temperature Effects 685	
	Problems 687

)	Statically Indeterminate Beams 7	07
	10.1	Introduction 707
	10.2	Types of Statically Indeterminate Beams 708
	10.3	Analysis by the Differential Equations of the Deflection Curve 711
	10.4	Method of Superposition 718
	*10.5	Temperature Effects 731
	*10.6	Longitudinal Displacements at the Ends of a Beam 734
		Problems 738

- **11.2** Buckling and Stability 749
- **11.3** Columns with Pinned Ends 752
- **11.4** Columns with Other Support Conditions 765
- **11.5** Columns with Eccentric Axial Loads 776
- **11.6** The Secant Formula for Columns 781
- **11.7** Elastic and Inelastic Column Behavior 787
- **11.8** Inelastic Buckling 789
- **11.9** Design Formulas for Columns 795 *Problems* 813

Review of Centroids and Moments of Inertia 828

12.1	Introduction 828	
12.2	Centroids of Plane Areas 829	
12.3	Centroids of Composite Areas 832	
12.4	Moments of Inertia of Plane Areas 835	
12.5	Parallel-Axis Theorem for Moments of Inertia	838
12.6	Polar Moments of Inertia 841	
12.7	Products of Inertia 843	
12.8	Rotation of Axes 846	

Principal Axes and Principal Moments of Inertia 848*Problems* 852
