PREFACE xi

INTRODUCTION xiii

BIOGRAPHICAL DATA xxvii

1. TYPES OF FACILITIES AND OPERATIONS 1

Introduction 1

The Story of Energy 2

The Nuclear Fuel Cycle 21

The Nuclear Island 31

The Turbine Island 34

The Outlook for Nuclear Power Plants: Issues and Answers 52

Designs for the Next Generation of Nuclear Power Plants 59

2. TYPES OF HEALTH AND ENVIRONMENTAL EFFECTS 67

Introduction 67

Causes of the Upward Trend in Malignant Disease 69

Societal Scars Versus Societal Gains from Nuclear Products and Services 70

Potential Dangers of the Transboundary Transfer of Radioactivity 70

Impact of Nuclear Bombardment and Atmospheric Nuclear Testing 79

Internal Radiation 88

External Radiation 98

Nuclear Incidents Unrelated to Atmospheric Testing or Commercial Nuclear Power 101

Impact of Nuclear Accidents 101

Impact of Commercial Nuclear Industry Accidents 105

1975 Brown's Ferry Unit 1 Fire 105

1979 Three Mile Island Unit 2 Valve Leak 106

1986 Chernobyl Unit 4 Explosion, Fire, and Nuclear Meltdown 109

Precursor Analysis of Event Occurrences at U.S. Commercial Nuclear Facilities 114

Impact of Soviet Nuclear-Related Accidents 122

- Impact of U.S. Defense Nuclear Facility Accidents* 130
Similarities Between the U.S. and Soviet Radioactive Releases 135
Current Countermeasures in Place for Radioactive Releases 136
3. CONTROL AND SAFETY SYSTEMS 141
Introduction 141
Control and Safety Systems 143
Engineered Safeguard Features 144
Systems That Control Process Parameters During Normal Operations 151
Instrumentation and Control Systems 157
Nuclear Steam Supply Control System 162
Processing Systems for Solid and Liquid Hazardous Waste 169
Radiation Monitoring System 171
4. ACCIDENT PREVENTION 175
Introduction 175
Risk Reduction 176
Design Objective of Nuclear Facilities 176
Defense-in-Depth 177
Accident Mitigation 179
Site Characteristics 180
External Factors Affecting Safe Operation 180
Design Basis Accidents 182
Accident Consequence Analysis 184
Safety Analysis and Review 186
Operational Accidents 189
Natural Phenomena Events 194
Operating Technical Specifications 199
Normal, Abnormal, and Emergency Operating Procedures 204
Human Factors 206
Quality Assurance 208
Configuration Management 213
Managing Nuclear Operations 219
5. SAFETY MARGIN AND ADEQUATE PROTECTION 227
Introduction 227
Safety Margin and Adequate Protection 227
System Safety Engineering 232
Accident Initiators and Accident Sequences 233
Probabilistic Risk Assessment 233
Experiences with PRA Applications 243
Hazard Evaluation 244
Safety Goals of the U.S. Nuclear Regulatory Commission 245

- Defense-in-Depth Accident Mitigation Features* 257
Role of the U.S. Congress in Establishing the Adequate Protection Standard 257
Commercial Nuclear Industry Practice in the United States 260
Systems Important to the Safety and Balance of Plant Systems 260
Radiological and Toxicological Dose Values 261
6. IMPEDIMENTS TO ACCIDENT PREVENTION 265
- Introduction* 265
People Identify Hazards and Prevent Accidents 266
Public Participation in Key Decisions About Accident Prevention 267
The Role of Science and Engineering in Accident Prevention 268
Management Response to Hazards and Accidental Occurrences 268
Protecting Workers from Occupational Hazards 269
The Role of Workers in Accident Prevention 270
Tensions Between Economic Cost and Safety 273
Pervasiveness of Worker Persecution 274
Raising Plant Emergency Lighting System Concerns 275
Raising Spent-Fuel Storage Concerns 279
Accidents Avoided by Concerns Raised by Workers 282
Adequacy of Legislation to Protect Workers from Persecution 283
Effectiveness of NRC Regulatory Oversight 283
The Diminishing Nuclear Workforce 284
Deregulation and Discretionary Enforcement Under Executive Order 12498 286
The Economic Constraints and Foreign Policy Impact on Accident Prevention at Soviet-Designed Nuclear Power Plant Reactors in Russia and Central and Eastern Europe 287
7. NUCLEAR FIRE PROTECTION (AN EXAMPLE OF EXTERNAL EVENT ANALYSIS) 295
- Introduction* 295
Nuclear Fire Protection Strategies 297
The Science of Nuclear Fire Protection 300
Four Major Sources of Fire Ignition 304
Explosions 308
Products of Combustion and Corrosive Species 310
Fire Load 315
Combustible Materials 317
Flashover 319
The Goal of Fire Protection at Nuclear Power Plants 320
The Dominance of Fire Risks 321

- Fire Risk Separation by Compartmentalization* 327
- Physical Security Considerations* 328
- Design Interfaces and Protective Measures* 329
- Fire Damage Thresholds of Equipment* 329
- Fire Test Data Confirming Electrical Equipment Fire Damage Thresholds* 331
- Qualitative Fire Hazard Analysis/Risk Assessment Methods* 336
- Quantitative Fire Hazard Analysis/Risk Assessment Methods* 339
- Goal Trees as Logic Models for Fire Hazard Analysis* 349
- Typical Boiling-Water Reactor Performance Goals* 354
- Typical Pressurized-Water Reactor Performance Goals* 357
- Alternate (Remote) or Dedicated Shutdown Capability* 361
- 8. NUCLEAR PLANT MAINTENANCE 365
 - Introduction* 365
 - Maintenance Management Philosophy* 365
 - The Maintenance Function and Control System* 366
 - Trends in Performance-Centered Regulations Related to Maintenance* 367
 - Maintenance Practice in the U.S. Aviation Industry* 373
 - Preventive Maintenance* 377
- 9. SAFETY MANAGEMENT 387
 - Introduction* 387
 - Elements of Safety Management* 388
 - Accident Management* 389
 - Emergency Management* 394
 - Emergency Planning* 396
 - Emergency Preparedness* 397
 - Risk Management* 403
- 10. REGULATORY OVERSIGHT AND FUTURE TRENDS 411
 - Introduction* 411
 - Technology-Based Regulation* 412
- 11. ACCIDENT INVESTIGATION 431
 - Introduction* 431
 - Key Elements of Accident Investigation* 433
 - Other Analytic Techniques for Accident Investigation* 437
 - Analytic Trees* 439
 - Two Analytic Techniques for Root-Cause Analysis* 440
 - Arriving at Conclusions in Accident Investigations* 443
 - Example of an Investigation* 446
 - Summary* 447

EPILOG 449

- Moscow Nuclear Safety and Security Summit* 450
- Nuclear Waste Management* 453
- Nuclear Material Security* 453
- Principles for Enhancing Professionalism of Nuclear Safety Personnel* 456

APPENDIX: INTERNATIONAL ELECTRICITY DEMAND AND
USAGE FORECASTS 459

- Economic Growth* 462
- North America* 466
- Western Europe* 470
- Industrialized Pacific* 471
- Eastern Europe and the Former Soviet Union* 473
- Developing Asia* 473
- Other Developing Countries* 475
- Carbon Emissions and the Greenhouse Effect* 482
- Forecast Uncertainties* 483

INDEX 485
