

# CONTENTS

<b>SUMMARY</b> .....	1
<b>OPENING SESSION</b>	
Opening Address .....	7
<i>Y.A. Sokolov</i>	
Opening Address .....	9
<i>T. Tanaka</i>	
President's Opening Address .....	11
<i>J. Bouchard</i>	
<b>SPENT FUEL MANAGEMENT – THE EVOLVING INTERNATIONAL SCENE (Session 1.A)</b>	
International perspectives on spent fuel management .....	17
<i>E. Amaral, K. Brockman, H. Forsström,</i>	
An international perspective on the management of spent fuel .....	31
<i>T. Tanaka</i>	
Multinational approaches relevant to spent fuel management .....	41
<i>B. Pellaud</i>	
Global nuclear energy partnership .....	55
<i>L. Brown</i>	
Initiative by the President of the Russian Federation on global nuclear infrastructure .....	63
<i>A. Zrodnikov</i>	
Back end of the nuclear fuel cycle: The French choices .....	73
<i>F. Fouquet</i>	
Evolving policies in expanding economies .....	89
<i>S.K. Jain</i>	
Spent fuel: Nuclear security issues .....	101
<i>M. Gregoric</i>	
<b>INTERNATIONAL SAFETY REGIME (Session 1.B)</b>	
Implementation of the Joint Convention on the Safety of Spent Fuel Management and on the Safety of Radioactive Waste Management .....	117
<i>A.-C. Lacoste</i>	

Towards a consistent set of harmonized safety standards .....	125
<i>A.-C. Lacoste</i>	
Transport issues .....	131
<i>S. Whittingham</i>	

### **CRITICALITY SAFETY (Session 2)**

Current issues in criticality safety, including burnup credit .....	147
<i>J.-C. Neuber</i>	
Potential benefits of burnup credit in Hungary .....	181
<i>G. Hordósy</i>	
The South African experience in spent fuel management at the Koeberg nuclear power plant — The perspective of the National Nuclear Regulator .....	193
<i>S. Rokita, T.F. Hill, G.A. Clapison</i>	
New approach to nuclear safety assessment of the WWER-440 reactor pool .....	203
<i>E.A. Dudka, Y. Kovbasenko</i>	

### **INTERNATIONAL SAFETY REGIME (Session 3)**

Licensing aspects of spent fuel storage as a function of timescales .....	221
<i>P. Lietava</i>	

### **PANEL DISCUSSION (Session 3)**

Statement .....	239
<i>W. Brach</i>	
Statement .....	241
<i>A. Lavrinovich</i>	
Statement .....	243
<i>V. Khotylev</i>	
Statement .....	247
<i>K. Shirai</i>	
Statement .....	249
<i>P. Standring</i>	
Statement .....	251
<i>I. Pechera</i>	
Panel Discussion: Term related licensing issues .....	253

## SUMMARY PANEL 1: DISCUSSIONS WITH CHAIRPERSONS OF SESSIONS 1, 2 AND 3

Discussions with Chairpersons of Sessions 1, 2 and 3 ..... 259

### STORAGE FACILITIES (Session 4)

Conceptual design of a modular system for the interim  
dry storage of PHWR Atucha spent fuel ..... 267

*H.E.P. Nassini, C.S. Fuenzalida Troyano, A.M. Bevilacqua,  
J.E. Bergallo, M. Silva, A. Blanco*

Safety philosophy at Ontario Power Generation used fuel  
dry storage facilities ..... 281

*H. Román, A. Khan*

The spent fuel storage solution in Armenia ..... 295

*Y. Solignac, A. Gevorgyan, G. Markosyan*

Regulatory aspects of building dry spent fuel storage facilities  
in the Russian Federation ..... 307

*N. Pronkin, R. Charafoutdinov, A. Lavrinovich*

Regulatory body experiences in licensing and inspection of dry  
cask storage facilities ..... 315

*S. Baggett, W. Brach*

### STORAGE CONTAINERS (Session 5)

Licensing of the CASTOR<sup>®</sup> 440/84M cask for transport and storage  
of spent fuel ..... 325

*P. Lietava*

Anticipating future needs for the transport and storage of spent  
fuel from evolutionary nuclear power reactors ..... 341

*H. Issard*

Demonstration test programme using full scale metal and  
concrete casks ..... 353

*K. Shirai, H. Takeda, M. Wataru, T. Saegusa*

## **FUEL AND CLADDING PROPERTIES AND BEHAVIOUR**

### **(Session 6)**

Damage in spent nuclear fuel defined by properties and requirements .....	373
<i>R. Einziger, C.L. Brown, G.P. Hornseth, S.R. Helton, N.L. Osgood, C.G. Interrante</i>	
Development of approaches for the long term storage of damaged nuclear fuel .....	385
<i>A. Novikov</i>	
Trends in dry spent fuel storage and transport in Germany and the United States of America .....	395
<i>W. Goll, K. McCoy, G.L. Garner, K. Nissen, D. Hoffmann, P. Dyck</i>	
High burnup fuel cladding tube property testing for the evaluation of spent fuel integrity during interim dry storage .....	409
<i>M. Aomi, K. Kamimura, T. Baba, T. Miyashita</i>	

## **SUMMARY PANEL 2: DISCUSSIONS WITH CHAIRPERSONS OF SESSIONS 4-6**

### **LOOKING TO THE FUTURE (Session 7)**

Spent fuel management: Present and future .....	431
<i>T. Saegusa, K. Nagano</i>	

### **CONCLUSIONS (Session 8)**

Summary of Session 1.A: Spent fuel management – the evolving scene .....	449
<i>J. Bouchard</i>	
Summary of Session 1.B: International safety regime .....	453
<i>A. González</i>	
Summary of Session 2: Criticality safety .....	457
<i>J. Whang</i>	
Summary of Session 3: Storage term limits .....	461
<i>W. Brach</i>	
Summary of Session 4: Storage facilities .....	465
<i>T. Saegusa</i>	
Summary of Session 5: Storage containers .....	467
<i>N. Tikhonov</i>	

Summary of Session 6: Fuel and cladding properties and cladding behaviour .....	469
<i>W. Goll</i>	
Summary of Session 7: Looking to the future .....	473
<i>A. Marvy</i>	
Conclusions of the Conference President.....	477
<i>J. Bouchard</i>	
Closing Address .....	481
<i>T. Taniguchi</i>	
Chairpersons of Sessions, President of the Conference, Programme Committee and Secretariat of the Conference .....	485
Summary List of Participants .....	487
Author Index .....	491
