<b>Chapter 1</b>	<b>Principles of Gasification</b> .....	<b>1</b>
	Introduction .....	1
	Historical Perspective and Commercialization Trends .....	2
	Historical Perspectives .....	2
	Renewed Interest and the Incentives for Commercialization...	3
	Commercialization Growth and Today's Applications .....	4
	Gasification Principles .....	5
	Overview .....	5
	Hydrogenation .....	7
	Stoichiometric Considerations .....	7
	Gasification Versus Combustion .....	10
	Comparisons of General Features .....	10
	Environmental Controls .....	10
	Solid Byproducts .....	13
	Advantages of Gasification over Combustion .....	14
	Stoichiometries and Thermodynamics .....	16
	Drying .....	17
	Devolatilization .....	17
	Gasification .....	17
	Combustion .....	18

Gasification Kinetics .....	20
Biomass Gasification.....	23
Overview .....	23
Types of Biomass Gasifiers.....	24
Biomass Characteristics.....	25
Petroleum Coke Gasification .....	27
References .....	30
Recommended Resources .....	32
<b>Chapter 2</b> Coal Gasification Technologies .....	<b>35</b>
Introduction .....	35
Coal Gasification .....	36
Overview .....	36
Types of Coal .....	36
Composition and Structure.....	38
Characteristics .....	39
Gasifier Configurations.....	40
Gasifier Classification .....	40
Entrained Flow Technologies .....	41
Fluidized-bed Technologies.....	54
Moving-bed Technologies .....	62
Technology Suppliers .....	64
Syngas Characteristics .....	64
Gas Cleanup Systems .....	65
Technology Suppliers for Particulate Removal.....	67
Sulfur Removal.....	67
The Power Block.....	68
Comparisons Between Technologies.....	68
Syngas Applications and Technology Selection Criteria.....	68
Integrated Gasification Combined Cycle .....	81
Operational Feedback.....	85
Investment Costs.....	86
Guide to Commercial Experience .....	86
<b>Chapter 3</b> Biogasification.....	<b>119</b>
Introduction .....	119
Overview .....	119
Technology Advantages.....	120
General Applications.....	121
Commercial Systems.....	121

**Table of Contents**

xv

Contaminants .....	127
Formation of Tars.....	130
Ammonia Formation .....	131
No <sub>x</sub> Formation .....	132
Sulfur .....	132
Hydrogen Production from Biomass.....	133
Recommended Resources.....	140
EndNotes .....	143
<b>Chapter 4 Pyrolysis.....</b>	<b>145</b>
Introduction .....	145
Pyrolysis Principles.....	147
General.....	147
Effect of Heating Rate .....	149
Effect of Temperature .....	150
Applications .....	152
Large-scale Commercial Processes for Mixed Solid Waste ...	152
Application to Contaminated Soil Remediation.....	157
Treatment of Municipal Solid Waste .....	158
Treatment of Medical Waste.....	159
Plasma Torches and Plasma Pyrolysis .....	160
EndNotes .....	164
<b>Chapter 5 Gas Cleanup Technologies.....</b>	<b>165</b>
Introduction.....	165
Overview of Particulate Removal Technologies .....	165
Particulate Collection Technologies .....	170
Gravity Settling Chambers.....	170
Cyclone Separators.....	177
Fabric Filter Pulse Jet-Cleaned Type .....	185
Dry Electrostatic Precipitator: Wire-Pipe Type .....	193
Wet Electrostatic Precipitator: Wire-Pipe Type and Others.....	200
Venturi Scrubbers.....	208
Orifice Scrubber.....	214
Condensation Scrubbers .....	219
Gas Conditioning Technologies .....	221
Packed Tower and Absorption .....	222
Impingement-Plate/Tray Tower Scrubbers.....	231
Fiber-Bed Scrubbers .....	236

Activated Carbon and Other Adsorber Systems.....	239
Thermal Destructive Technologies.....	247
Recommended Resources.....	265
<b>Chapter 6 Integration of Gasification Technologies .....</b>	<b>271</b>
Introduction .....	271
Role of Coal Gasification .....	271
Gas Turbine Technologies.....	282
Fuel Requirements.....	286
Use of Coal-Derived Liquid Fuel.....	287
Market Trends.....	289
R&D Needs .....	294
Improved Operational Performance.....	294
Improved Efficiencies .....	294
Fuel Cell Technology Development Status .....	298
Integrated Gasification Fuel Cell Power Systems Requirements.....	305
Integrated Gasification Fuel Cell Hybrid Power Systems Requirements.....	307
System Configurations and Costs .....	309
Fuel Processing Technology.....	313
Technology Integration with Coal Gasification .....	313
Hybrid Systems .....	315
Fuel Cell Technology and System Integration Issues.....	317
Areas for Technical Development.....	318
Large-Scale Distributed Power, Industrial Cogeneration, and Central Generation.....	319
Gasification Technology Development and System Integration Issues.....	320
Recommended Resources.....	328
 Index .....	 331
