- Preface vii  
Dedication ix  
Introduction xi
1. *The melt* 1
    - 1.1 Reactions of the melt with its environment 2
    - 1.2 Transport of gases in melts 10
    - 1.3 Surface film formation 12
  2. *Entrainment* 17
    - 2.1 Entrainment defects 20
    - 2.2 Entrainment processes 31
    - 2.3 Furling and unfurling 54
    - 2.4 Deactivation of entrained films 61
    - 2.5 Soluble, transient films 63
    - 2.6 Detrainment 64
    - 2.7 Evidence for bifilms 64
    - 2.8 The significance of bifilms 67
  3. *Flow* 70
    - 3.1 Effect of surface films on filling 70
    - 3.2 Effect of entrained films on filling 73
    - 3.3 Fluidity (maximum fluidity length)  $L_f$  74
    - 3.4 Continuous fluidity 95
    - 3.5 Glossary of symbols 98
  4. *The mould* 99
    - 4.1 Inert moulds 99
    - 4.2 Aggregate moulds 100
    - 4.3 Mould atmosphere 105
    - 4.4 Mould surface reactions 111
    - 4.5 Metal surface reactions 114
  5. *Solidification structure* 117
    - 5.1 Heat transfer 117
    - 5.2 Development of matrix structure 129
    - 5.3 Segregation 139
    - 5.4 Aluminium alloys 147
    - 5.5 Cast irons 156
    - 5.6 Steels 167
  6. *Gas porosity* 178
    - 6.1 Nucleation of gas porosity 178
    - 6.2 Subsurface porosity 186
    - 6.3 Growth of gas pores 195
    - 6.4 Blowholes 200
  7. *Solidification shrinkage* 205
    - 7.1 General shrinkage behaviour 205
    - 7.2 Solidification shrinkage 206
    - 7.3 Feeding criteria 210
    - 7.4 Feeding – the five mechanisms 212
    - 7.5 Initiation of shrinkage porosity 222
    - 7.6 Growth of shrinkage pores 226
    - 7.7 Final forms of shrinkage porosity 227
  8. *Linear contraction* 232
    - 8.1 Uniform contraction 232
    - 8.2 Non-uniform contraction (distortion) 237
    - 8.3 Hot tearing 242
    - 8.4 Cold cracking 258
    - 8.5 Residual stress 259
  9. *Structure, defects and properties of the finished casting* 267
    - 9.1 Grain size 267
    - 9.2 Dendrite arm spacing 270
    - 9.3 Compact defects 275
    - 9.4 Planar defects 279
    - 9.5 Effects of defects on properties of castings 282
    - 9.6 The statistics of failure 301
  10. *Processing* 306
    - 10.1 Impregnation 306
    - 10.2 Hot isostatic pressing 306
    - 10.3 Working (forging, rolling and extrusion) 309
    - 10.4 Machining 309
    - 10.5 Painting 310
  11. *Environmental interactions* 311
    - 11.1 Internal oxidation 311
    - 11.2 Corrosion 313
- Postscript 318
