

# CONTENTS

<b>INTRODUCTION.</b> .....	1
<b>FRONTEND FUEL CYCLE STRATEGIES (Session 1).</b> .....	15
<i>Key Issue Paper of Working Group 1: Uranium demand and supply up to 2050 (Paper 1.1)</i> .....	17
<i>J. McMurray, D.B. Beattie, A. Boitsov, G. Capus</i>	
Uranium market secondary supplies: Availability and appraisal of market impact (Paper 1.2) .....	59
<i>G. Capus</i>	
World nuclear capacity projections up to 2050 (Paper 1.3) .....	89
<i>Kee-Yung Nam, H.H. Rogner</i>	
Uranium production capability in the CIS countries (Paper 1.4) .....	115
<i>A. V. Boitsov</i>	
Uranium production capability: North America, Australia, Asia and Africa (Paper 1.5) .....	131
<i>D.B. Beattie</i>	
Uranium market in the context of exploration and production activities (Paper 1.6). .....	165
<i>T.C. Pool</i>	
Worldwide uranium exploration and mining: Status and related challenges (Paper 1.7) .....	183
<i>P. Heeroma</i>	
Uranium supply and production scenarios in Kazakhstan (Paper 1.8). ...	193
<i>M. Dzhabishev, D.N. Parfenov</i>	
Thorium and unconventional uranium resources (Paper 1.9) .....	199
<i>F.H. Barthel</i>	
Impact of emerging environmental constraints on uranium supply (Paper 1.10). .....	217
<i>M.B. Wittrup, E.S. Ritchie</i>	
<b>BACKEND FUEL CYCLE STRATEGIES (Session 2)</b> .....	245
<i>Key Issue Paper of Working Group 2:</i>	
Fissile material management strategies for sustainable nuclear energy: Back end fuel cycle options (Paper 2.1) .....	247
<i>H. Bairiot, M. Dunn, K. Fukuda, F.M. Killar, Won Il Ko, E. Kudryavtsev, K. Ochiai, J.-M. Sire</i>	

Modelling for nuclear material flows in the nuclear fuel cycle (Paper 2.2). . . . .	325
<i>M. Ceyhan</i>	
Forecast of fissile material inventories in the back end of the nuclear fuel cycle (Paper 2.3) . . . . .	357
<i>K. Fukuda, M. Ceyhan</i>	
International database of spent fuel inventories and management (Paper 2.4). . . . .	375
<i>Iae-Sol Lee</i>	
The economics of reprocessing versus direct disposal of spent nuclear fuel (Paper 2.5) . . . . .	391
<i>M. Bunn, I.P. Holdren, S. Fetter, B. van der Zwaan</i>	
The benefit of reprocessing/recycling for sustainable nuclear energy: The French view (Paper 2.6). . . . .	433
<i>E Proust, M. Debes, I.-M. Sire</i>	
Separated plutonium management (Paper 2.7) . . . . .	449
<i>M.J. Dunn, H. Bairiot</i>	
Reprocessed uranium issues (Paper 2.8). . . . .	469
<i>H. Bairiot, K. Fukuda</i>	
Long term storage and disposal: Competing or complementary strategies for management of radioactive waste? (Paper 2.9) . . . . .	489
<i>I. Rowat</i>	
Waste management aspects of various fuel cycle options (Paper 2.10) . . .	503
<i>R.A. Wigeland, T.H. Bauer, EE Morris</i>	
Advanced fuel cycle studies at the OECD Nuclear Energy Agency (Paper 2.11). . . . .	525
<i>T. Haapalehto, Kwang-Seok Lee</i>	
Technical and economic driving factors for advanced fuel cycle designs industrially applicable by 2030 (Paper 2.12) . . . . .	531
<i>K. Hesketh</i>	
Status and prospects of innovative nuclear fuel cycle technology (Paper 2.13). . . . .	543
<i>C. Ganguly</i>	
The DUPIC technology contribution to fissile management (Paper 2.14). . . . .	577
<i>Won Il Ko, Ho Dong Kim, Myung Seung Yang</i>	

<b>FUTURE FUEL CYCLE TECHNOLOGY OPTIONS (Session 3). . . .</b>	<b>597</b>
<i>Key Issue Paper of Working Group 3: Sustainable nuclear energy development beyond 2050: Cross-cutting issues (Paper 3.1) . . . . .</i>	<i>599</i>
<i>L. Koch, A. V. Bychkov, M. Delpech, C. Ganguly, T. Ogawa, T.E. Shea, A. Vasile</i>	
The eternally open uranium fuel cycle (Paper 3.2) . . . . .	617
<i>T.E. Shea, M.D. Zentner</i>	
Partitioning of fissile and radiotoxic materials from spent fuel:	
An overview (Paper 3.3). . . . .	639
<i>A. V. Bychkov</i>	
Transmutation of radionuclides (Paper 3.4). . . . .	669
<i>T. Ogawa, K. Minato</i>	
Potential contributions of fast reactor cycle technologies to TRU element management in Japan (Paper 3.5). . . . .	695
<i>K. Sato</i>	
Potential contribution of fast reactors and new reactor concepts to fissile materials and MA management (Paper 3.6) . . . . .	727
<i>M. De/pech, C. Garzenne, A. Vasile, D. Greneche</i>	
Core safety features of advanced fuel cycles (Paper 3.7) . . . . .	759
<i>A. Vasile, G. Rimpault, M. Vanier</i>	
The thorium fuel cycle (Paper 3.8) . . . . .	769
<i>C. Ganguly</i>	
Impact of the technology of the MSBR concept on long lived radiotoxicity and proliferation resistance (Paper 3.9). . . . .	805
<i>C. Le Brun, L. Mathieu, D. Heuer, A. Nuttin</i>	
Technical barriers for proliferation resistance in management of nuclear material (Paper 3.10) . . . . .	827
<i>M. Saito</i>	
Present and future safeguards (Paper 3.11) . . . . .	845
<i>AC.F. Hadfield</i>	
<b>LIST OF AUTHORS AND PARTICIPANTS . . . . .</b>	<b>861</b>
