Henri Poincaré. A Life at the Service of Science

Jean Mawhin		1
1	Introduction	2
2	Family, childhood, studies	2
3	Carreer and personality	3
4	The <i>annus mirabilis</i>	4
5	The three stars of Hermite and King Oscar Prize	5
6	Mathematical physics	7
7	Celestial mechanics and topology	8
8	Scientific philosophy and the Académie française	8
9	Poincaré and public affairs	10
10	Poincaré and science	11
11	Conclusion	12
	References	13

Henri Poincaré and XXth Century Topology

S. Novikov		17
1	Introduction	18
2	Prehistory	18
3	Topological works of Poincaré. Their contribution and immediate byproduct	19
4	Topology after Poincaré	21
	References	23

What is Complete Integrability in Quantum Mechanics

L. D. Faddeev		25
	References	32

Infinite Curves on Closed Surfaces

D. V. Anosov		33
	References	40

On Dynamical Properties of Diffeomorphisms with Homoclinic Tangencies

S. V. Gonchenko, L. P. Shilnikov, and D. V. Turaev		41
1	Setting the problem and main results	43
2	Properties of the local and global maps	49
3	Proof of rescaling lemmas	53
4	Proof of main theorems	65
	References	69

Quasi-Periodicity in Dissipative and Conservative Systems

Henk W. Broer	73
1 Introduction	74
2 Complex linearization	74
3 Dissipative KAM theory	75
4 Conservative KAM theory	78
5 Global Hamiltonian KAM theory	81
6 Quasi-periodic bifurcations	82
References	88

From Dynamical Systems Theory to Nonequilibrium Thermodynamics

Pierre Gaspard	97
1 Introduction	98
2 Poincaré and dynamical systems theory	99
3 Poincaré and gas kinetic theory	100
4 Chaotic behavior in molecular dynamics	101
5 Spontaneous breaking of time-reversal symmetry and Pollicott-Ruelle resonances	102
6 Diffusion in spatially extended systems	105
7 Examples of diffusive modes	107
8 Diffusion in a geodesic flow on a negative curvature space	111
9 Entropy production and irreversibility	116
10 Conclusions	117
References	119

Irreversibility from Poincaré's Theory of Secular Perturbations

R. Brout	121
References	124

Particle Physics as Representations of the Poincaré Algebra

Lars Brink	125
1 Introduction	126
2 Light-frame formulation of field theories	127
3 Light-Frame formulation of supersymmetric field theories	130
4 Light-frame formulations of higher dimensional theories	135
5 Strings	142
6 Continuous spin representations	144
7 Concluding remarks	146
References	146

Poincaré, Relativity, Billiards and Symmetry

Thibault Damour	149
1 Poincaré and relativity	150
2 Relativity, billiards and symmetry	156
References	170

Poincaré Synchronization: From the Local Time to the Lorentz Group

Jean Reignier	175
1 Introduction	176
2 Lorentz local time	176
3 La mesure du temps	178

4	The Leyden lecture of 1900	178
5	Poincaré's local time	180
6	The group of parallel translations	182
7	The Lorentz group	184
8	About some critics on Poincaré's work	186
	References	188
