

Contents

Contributors	xv
Abbreviations	xvii
1 Basic principles	1
<i>P. D. Wilson</i>	
1.1 Introduction	1
1.2 Atomic structure	1
1.3 Reactors	10
1.4 Fuel management	11
1.5 Fuel supply	12
1.6 Waste management	12
1.7 The fuel cycle	13
1.8 Economics	14
1.9 The future	16
1.10 References	17
2 Mining and milling uranium ore	18
<i>G. M. Ritcey</i>	
2.1 Introduction	18
2.2 Occurrence	18
2.3 Mining practice	19
2.4 Milling	21
2.5 Tailings management	37
2.6 References	40
3 Fuel fabrication	41
<i>G. Marsh and H. Eccles</i>	
3.1 Introduction	41
3.2 Design considerations	43
3.3 Uranium purification	44
3.4 Conversion	46
3.5 Magnox fuel	48

3.6	Oxide	50
3.7	Oxide fuel assembly	61
3.8	Conclusion	65
3.9	References	66
4	Isotopic enrichment of uranium	67
	<i>P. C. Upson</i>	
4.1	Introduction	67
4.2	Gaseous diffusion	69
4.3	Centrifuge enrichment	71
4.4	Laser enrichment	74
4.5	Re-enrichment of reprocessed uranium	75
4.6	Conclusion	76
4.7	References	77
5	Power reactors	78
	<i>K. W. Hesketh</i>	
5.1	Introduction	78
5.2	Fissions in nature	78
5.3	Fundamentals of fission reactors	79
5.4	Reactor types	84
5.5	Future perspective	99
5.6	References	101
6	Transport and storage of irradiated fuel	102
	<i>D. E. Haslett</i>	
6.1	Introduction	102
6.2	At the reactor	102
6.3	Transport	105
6.4	Interim storage	110
6.5	References	115
7	Reprocessing irradiated fuel	116
	<i>I. S. Denniss and A. P. Jeapes</i>	
7.1	Introduction	116
7.2	Head-end processes	117
7.3	Solvent extraction	123
7.4	Conclusion	135
7.5	References	136
8	Recycling uranium and plutonium	138
	<i>J. P. Patterson and P. Parkes</i>	
8.1	Introduction	138

8.2	Rationale for recycling	139
8.3	Brief history of recycling	142
8.4	Recycling uranium	143
8.5	Recycling plutonium	149
8.6	Future trends in recycling	158
8.7	References	160
9	Waste treatment	161
	<i>G. V. Hutson</i>	
9.1	Introduction	161
9.2	Waste types	162
9.3	Liquid wastes	163
9.4	Solid wastes	173
9.5	Aerial effluent	178
9.6	Practices at other sites	181
9.7	Conclusion	183
9.8	References	183
10	Disposal of fuel or solid wastes	184
	<i>S. Richardson, P. Curd, and E. J. Kelly</i>	
10.1	Introduction	184
10.2	Waste categories	185
10.3	Low-level waste	185
10.4	Intermediate level waste	190
10.5	High level waste	195
10.6	Direct disposal	197
10.7	Review of world-wide disposal systems	200
10.8	Conclusion	204
10.9	References	205
10.10	Further reading	206
11	Environmental radioactivity	207
	<i>P. D. Wilson</i>	
11.1	Introduction	207
11.2	Atmosphere	208
11.3	Terrestrial environment	209
11.4	Seas, rivers, etc.	212
11.5	Artificial radionuclides of special interest	216
11.6	Natural radioelements	221
11.7	Monitoring and research	223
11.8	Conclusion	227
11.9	References	227

12 Decommissioning nuclear facilities	229
<i>S. Buck</i>	
12.1 Introduction	229
12.2 Principles	229
12.3 Timing and strategy	232
12.4 Planning	235
12.5 Practical techniques	236
12.6 Waste management	242
12.7 Progress	246
12.8 Future prospects	247
12.9 Conclusion	249
12.10 References	250
12.11 Further reading	251
13 Management of safety	252
<i>A. C. Fryer, M. Merry, C. Sunman, and A. E. Waterhouse</i>	
13.1 Introduction	252
13.2 Risk assessment	255
13.3 Criticality control	263
13.4 THORP: a specific example	267
13.5 References	271
14 Future perspectives	272
<i>P. D. Wilson</i>	
14.1 Introduction	272
14.2 Aims of the industry	272
14.3 Special topics	283
14.4 Conclusion	292
14.5 References	293
Glossary	295
Appendix 1: elements of the periodic table	307
Appendix 2: decay chains of heavy radionuclides	310
Appendix 3: products from thermal fission of U-235	314
Appendix 4: decay properties of selected radionuclides	317
Index	319
