Contributor contact details *xiii*

Preface *xvii*

Part I Introduction

| | | |
|-----|--|----|
| 1 | Hydrogen storage technologies | 3 |
| | G. WALKER, University of Nottingham, UK | |
| 1.1 | Introduction | 3 |
| 1.2 | High-pressure gas storage | 6 |
| 1.3 | Liquid hydrogen | 7 |
| 1.4 | Physically bound hydrogen | 8 |
| 1.5 | Chemically bound hydrogen | 10 |
| 1.6 | Hydrolytic evolution of hydrogen | 14 |
| 1.7 | Summary | 15 |
| 1.8 | References | 15 |
| 2 | Hydrogen futures: emerging technologies for hydrogen storage and transport | 18 |
| | P. EKINS, King's College London and P. BELLABY, University of Salford, UK | |
| 2.1 | Introduction | 18 |
| 2.2 | Hydrogen technologies | 18 |
| 2.3 | Hydrogen scenarios: from production to applications | 19 |
| 2.4 | Hydrogen economics | 23 |
| 2.5 | Hydrogen end-use applications | 29 |
| 2.6 | Public acceptability of hydrogen | 35 |
| 2.7 | Policy implications | 41 |
| 2.8 | Conclusions | 44 |
| 2.9 | References | 48 |

| | | |
|--|---|-----|
| vi | Contents | |
| 3 | Hydrogen containment materials | 51 |
| | B. P. SOMERDAY and C. SAN MARCHI, Sandia National Laboratories, USA | |
| 3.1 | Introduction | 51 |
| 3.2 | Materials challenges in hydrogen containment | 51 |
| 3.3 | Hydrogen permeation | 53 |
| 3.4 | Hydrogen embrittlement | 54 |
| 3.5 | Service experience with hydrogen containment | 64 |
| 3.6 | Materials used in the design of hydrogen containment structures | 66 |
| 3.7 | Future trends | 75 |
| 3.8 | Other sources | 76 |
| 3.9 | Acknowledgements | 77 |
| 3.10 | References | 77 |
| 4 | Solid-state hydrogen storage system design | 82 |
| | D. E. DEDRICK, Sandia National Laboratories, USA | |
| 4.1 | Introduction | 82 |
| 4.2 | The behavior of solid-state hydrogen storage materials in systems | 84 |
| 4.3 | Thermodynamic properties of hydrogen storage materials | 85 |
| 4.4 | Thermal properties of hydrogen storage materials | 86 |
| 4.5 | System heat exchange design | 94 |
| 4.6 | Safe systems design | 96 |
| 4.7 | Enabling safe systems based on hydrogen sorption materials | 101 |
| 4.8 | Future trends | 101 |
| 4.9 | Sources of further information and advice | 102 |
| 4.10 | References | 102 |
| Part II Analysing hydrogen interactions | | |
| 5 | Structural characterisation of hydride materials | 107 |
| | B. C. HAUBACK, Institute for Energy Technology, Norway | |
| 5.1 | Introduction | 107 |
| 5.2 | Principles of diffraction | 108 |
| 5.3 | X-ray and neutron diffraction | 112 |
| 5.4 | The use of powder diffraction data | 119 |
| 5.5 | Examples of structures and results from powder diffraction studies | 126 |
| 5.6 | Future trends | 131 |

| | | |
|------|---|-----|
| 5.7 | Sources of further information and advice | 132 |
| 5.8 | References | 133 |
| 6 | Neutron scattering studies for analysing solid-state hydrogen storage | 135 |
| | D. K. Ross, University of Salford, UK | |
| 6.1 | Introduction | 135 |
| 6.2 | The neutron scattering method | 136 |
| 6.3 | Studies of light metal hydrides | 137 |
| 6.4 | Studies of molecular hydrogen trapping in porous materials | 138 |
| 6.5 | The basic theory of neutron scattering | 138 |
| 6.6 | Theory of inelastic neutron scattering | 142 |
| 6.7 | Inelastic scattering measurements on solid-state hydrides | 154 |
| 6.8 | Inelastic neutron scattering from molecular hydrogen trapped on surfaces | 159 |
| 6.9 | Quasi-elastic scattering measurements on hydrogen diffusing in hydrides | 167 |
| 6.10 | Conclusions | 169 |
| 6.11 | References | 170 |
| 7 | Reliably measuring hydrogen uptake in storage materials | 174 |
| | E. MACA. GRAY, Griffith University, Australia | |
| 7.1 | Introduction | 174 |
| 7.2 | Compressibilities of hydrogen and deuterium | 175 |
| 7.3 | Measurement regimes | 177 |
| 7.4 | Measurement techniques | 179 |
| 7.5 | System characterisation | 189 |
| 7.6 | The sample volume problem | 195 |
| 7.7 | The variable-volume hydrogenator | 200 |
| 7.8 | Summary and conclusions | 202 |
| 7.9 | Acknowledgements | 203 |
| 7.10 | References | 203 |
| 8 | Modelling of carbon-based materials for hydrogen storage | 205 |
| | J. ÍÑIGUEZ, Institut de Ciencia de Materials de Barcelona (ICMAB-CSIC), Spain | |
| 8.1 | Introduction | 205 |

| | | |
|------|---|-----|
| viii | Contents | |
| 8.2 | Hydrogen interactions with carbons: physisorption and chemisorption | 207 |
| 8.3 | Predictions for hydrogen storage in carbon nanostructures coated with light transition metals | 211 |
| 8.4 | Conclusions and future trends | 216 |
| 8.5 | Sources of further information and advice | 217 |
| 8.6 | References | 217 |

Part III Physically bound hydrogen storage

| | | |
|-------|--|-----|
| 9 | Storage of hydrogen in zeolites | 223 |
| | P. A. ANDERSON, University of Birmingham, UK | |
| 9.1 | Introduction | 223 |
| 9.2 | Hydrogen encapsulation at high temperatures | 224 |
| 9.3 | Low-temperature physisorption | 227 |
| 9.4 | Storage at room temperature: encapsulation, physisorption, chemisorption and spillover | 231 |
| 9.5 | Spectroscopic studies | 234 |
| 9.6 | Theoretical studies and modelling | 243 |
| 9.7 | Other potential applications of zeolites in a hydrogen energy system | 248 |
| 9.8 | Prospects for the use of zeolites in a hydrogen energy system | 249 |
| 9.9 | Acknowledgements | 251 |
| 9.10 | References | 252 |
| 10 | Carbon nanostructures for hydrogen storage | 261 |
| | P. BÉNARD and R. CHAHINE, Institut de recherche sur l'hydrogène, Canada | |
| 10.1 | Introduction | 261 |
| 10.2 | Storage of hydrogen in solids | 262 |
| 10.3 | Carbon nanostructures and hydrogen storage | 263 |
| 10.4 | Supercritical adsorption in nanoporous materials | 267 |
| 10.5 | Theory | 269 |
| 10.6 | Adsorption of hydrogen on activated carbons and carbon nanostructures | 274 |
| 10.7 | Beyond carbon nanostructures | 283 |
| 10.8 | Conclusions | 284 |
| 10.9 | Acknowledgments | 284 |
| 10.10 | References | 284 |

| | | |
|--|---|-----|
| 11 | Metal–organic framework materials for hydrogen storage | 288 |
| | X. LIN, J. JIA, N. R. CHAMPNESS, P. HUBBERSTEY and M. SCHRÖDER, University of Nottingham, UK | |
| 11.1 | Introduction | 288 |
| 11.2 | Hydrogen storage in particular metal–organic framework (MOF) materials | 291 |
| 11.3 | Interactions of H ₂ with metal–organic frameworks: experiments and modelling | 303 |
| 11.4 | Conclusions and future trends | 308 |
| 11.5 | References | 308 |
| Part IV Chemically bound hydrogen storage | | |
| 12 | Intermetallics for hydrogen storage | 315 |
| | D. CHANDRA, University of Nevada, USA | |
| 12.1 | Introduction | 315 |
| 12.2 | Metal hydrides | 317 |
| 12.3 | Long-term stability of metal hydrides | 325 |
| 12.4 | Intrinsic testing of intermetallic hydrides | 329 |
| 12.5 | Extrinsic testing of intermetallic hydrides | 341 |
| 12.6 | Extrinsic cycling of complex hydrides | 345 |
| 12.7 | Conclusions | 346 |
| 12.8 | Acknowledgements | 348 |
| 12.9 | References | 348 |
| 13 | Magnesium hydride for hydrogen storage | 357 |
| | D. GRANT, University of Nottingham, UK | |
| 13.1 | Introduction | 357 |
| 13.2 | Background to magnesium and magnesium hydride | 357 |
| 13.3 | Thermodynamics and hydride mechanisms | 362 |
| 13.4 | Ball milling to improve hydrogen sorption behaviour | 363 |
| 13.5 | Metal and alloy additives | 366 |
| 13.6 | Metal oxide catalysts | 368 |
| 13.7 | Kinetic models of hydrogen absorption | 372 |
| 13.8 | Conclusions and future work | 374 |
| 13.9 | References | 376 |

| | | |
|------|---|-----|
| x | Contents | |
| 14 | Alanates as hydrogen storage materials | 381 |
| | C. JENSEN, University of Hawaii at Manoa, Hawaii, Y. WANG and M. Y. CHOU, Georgia Institute of Technology, USA | |
| 14.1 | Introduction | 381 |
| 14.2 | Atomic structure of alanates | 382 |
| 14.3 | Dehydrogenation and rehydrogenation reactions in alanates | 390 |
| 14.4 | Density-functional calculations of alkali and alkaline-earth alanates | 404 |
| 14.5 | Future trends | 411 |
| 14.6 | Conclusions | 415 |
| 14.7 | References | 415 |
| 15 | Borohydrides as hydrogen storage materials | 420 |
| | Y. NAKAMORI and S. ORIMO, Tohoku University, Japan | |
| 15.1 | Introduction | 420 |
| 15.2 | Synthesis of borohydrides | 420 |
| 15.3 | Structure of borohydrides | 425 |
| 15.4 | Dehydrogenation and rehydrogenation reactions | 435 |
| 15.5 | Future trends | 445 |
| 15.6 | Acknowledgements | 445 |
| 15.7 | References | 445 |
| 16 | Imides and amides as hydrogen storage materials | 450 |
| | D. H. GREGORY, University of Glasgow, UK | |
| 16.1 | Introduction | 450 |
| 16.2 | The lithium–nitrogen–hydrogen system | 450 |
| 16.3 | The imides and amides of the group 2 elements | 464 |
| 16.4 | Mixed metal imides and amides | 466 |
| 16.5 | Future trends and conclusions | 472 |
| 16.6 | Acknowledgements | 473 |
| 16.7 | References | 474 |
| 17 | Multicomponent hydrogen storage systems | 478 |
| | G. WALKER, University of Nottingham, UK | |
| 17.1 | Introduction | 478 |
| 17.2 | Thermodynamic destabilisation | 480 |
| 17.3 | Complex hydride–metal hydride systems | 482 |
| 17.4 | Complex hydride–non-hydride systems | 491 |
| 17.5 | Complex hydride–complex hydride systems | 493 |
| 17.6 | Other destabilisation multicomponent systems | 495 |

| | | |
|------|--|-----|
| 17.7 | Future trends | 496 |
| 17.8 | References | 497 |
| 18 | Organic liquid carriers for hydrogen storage | 500 |
| | M. ICHIKAWA, Hokkaido University, Japan | |
| 18.1 | Introduction | 500 |
| 18.2 | Organic hydrides: chemistry and reactions for hydrogen storage and supply | 501 |
| 18.3 | Spray-pulsed reactors for efficient hydrogen supply by organic hydrides | 506 |
| 18.4 | Hydrogen storage and supply by organic hydrides | 512 |
| 18.5 | Hydrogen delivery using organic hydrides for fuel-cell cars and domestic power systems | 518 |
| 18.6 | High-density electric power delivery using organic hydride carriers | 521 |
| 18.7 | Rechargeable direct fuel cells using organic hydrides | 523 |
| 18.8 | Hydrogen delivery networks using organic hydrides | 528 |
| 18.9 | References | 531 |
| 19 | Indirect hydrogen storage in metal amines | 533 |
| | T. VEGGE, R. Z. SØRENSEN, A. KLERKE, J. S. HUMMELSHØJ, T. JOHANNESSEN, J. K. NØRSKOV and C. H. CHRISTENSEN, Technical University of Denmark, Denmark | |
| 19.1 | Introduction | 533 |
| 19.2 | Indirect hydrogen storage in ammonia | 534 |
| 19.3 | Compact storage in solid metal ammine materials | 537 |
| 19.4 | Selecting metal ammine storage materials | 541 |
| 19.5 | Nano- to macro-scale design of metal amines | 548 |
| 19.6 | Commercial applications and future trends | 553 |
| 19.7 | References | 561 |
| 20 | Conclusion: technological challenges in hydrogen storage | 565 |
| | G. WALKER, University of Nottingham, UK | |
| 20.1 | Challenges in hydrogen applications | 565 |
| 20.2 | Challenges in materials for storage | 566 |
| 20.3 | Conclusions | 569 |
| 20.4 | References | 569 |
| | <i>Index</i> | 571 |
