Preface.....	ix
Editors.....	xi
Contributors.....	xiii

## **SECTION I Atomic Arrangement and Defects**

<b>Chapter 1</b> Graphene Heterostructures.....	3
<i>Zheng Liu and Hong Wang</i>	
<b>Chapter 2</b> Atomic-Scale Defects and Impurities in Graphene .....	21
<i>Rocco Martinazzo</i>	
<b>Chapter 3</b> Atomic Arrangement and Its Effects on Electronic Structures of Graphene from Tight-Binding Description .....	39
<i>Sirichok Jungthawan and Sukit Limpijumnong</i>	
<b>Chapter 4</b> Graphene Plasmonics: Light–Matter Interactions at the Atomic Scale .....	63
<i>Pai-Yen Chen and Mohamed Farhat</i>	
<b>Chapter 5</b> Graphene/Polymer Nanocomposites: Crystal Structure, Mechanical and Thermal Properties .....	77
<i>Fabiola Navarro-Pardo, Ana Laura Martínez-Hernández, and Carlos Velasco-Santos</i>	
<b>Chapter 6</b> Graphene-Like Structures as Cages for Doxorubicin .....	99
<i>Iva Blazkova, Pavel Kopel, Marketa Vaculovicova, Vojtech Adam, and Rene Kizek</i>	
<b>Chapter 7</b> Mathematical Modeling for Hydrogen Storage Inside Graphene-Based Materials.....	111
<i>Yue Chan</i>	
<b>Chapter 8</b> Morphology of Cylindrical Carbon Nanostructures Grown by Catalytic Chemical Vapor Deposition Method.....	123
<i>S. Ray, M. Jana, and A. Sil</i>	
<b>Chapter 9</b> $sp^2$ to $sp^3$ Phase Transformation in Graphene-Like Nanofilms .....	147
<i>Long Yuan, Zhenyu Li, and Jinlong Yang</i>	
<b>Chapter 10</b> Symmetry and Topology of Graphenes.....	159
<i>A. R. Ashrafi, F. Koorepazan-Moftakhar, and O. Ori</i>	

## **SECTION II Modified Graphene**

<b>Chapter 11</b> N-Doped Graphene for Supercapacitors .....	167
<i>Dingsheng Yuan and Worong Lin</i>	

<b>Chapter 12</b> Electrical and Optical Properties and Applications of Doped Graphene Sheets.....	179
<i>Ki Chang Kwon and Soo Young Kim</i>	
<b>Chapter 13</b> Chemical Modifications of Graphene via Covalent Bonding .....	207
<i>Liang Cui, Dongjiang Yang, and Jingquan Liu</i>	
<b>Chapter 14</b> Functionalization and Vacancy Effects on Hydrogen Binding in Graphene .....	221
<i>A. Tapia, C. Cab, and G. Canto</i>	
<b>Chapter 15</b> Modifications of Electronic Properties of Graphene by Boron (B) and Nitrogen (N) Substitution.....	231
<i>Debnarayan Jana, Palash Nath, and Dirtha Sanyal</i>	
<b>SECTION III Characterization</b>	
<b>Chapter 16</b> Electronic Structure and Topological Disorder in $sp^2$ Phases of Carbon .....	249
<i>Y. Li and D. A. Drabold</i>	
<b>Chapter 17</b> 3D Macroscopic Graphene Assemblies .....	263
<i>Marcus A. Worsley, Juergen Biener, Michael Stadermann, and Theodore F. Baumann</i>	
<b>Chapter 18</b> 3D-AFM-Hyperfine Imaging of Graphene Monolayers Deposit on YBCO-Superconducting Surface.....	277
<i>Khaled M. Elsabawy</i>	
<b>Chapter 19</b> Phonon Spectrum and Vibrational Thermodynamic Characteristics of Graphene Nanofilms.....	289
<i>Alexander Feher, Sergey Feodosyev, Igor Gospodarev, Eugen Syrkin, and Vladimir Grishaev</i>	
<b>Chapter 20</b> Tuning Atomic and Electronic Properties of Graphene by Selective Doping .....	305
<i>Cecile Malardier-Jugroot, Michael N. Groves, and Manish Jugroot</i>	
<b>Chapter 21</b> Scanning Electron Microscopy of Graphene .....	319
<i>Yoshikazu Homma, Katsuhiko Takahashi, Yuta Momiuchi, Junro Takahashi, and Hiroki Kato</i>	
<b>Chapter 22</b> Tunneling Current of the Contact of the Curved Graphene Nanoribbon with Metal and Quantum Dots .....	327
<i>Mikhail B. Belonenko, Natalia N. Konobeeva, Alexander V. Zhukov, and Roland Bouffanais</i>	
<b>Chapter 23</b> Using Few-Layer Graphene Sheets as Ultimate Reference of Quantitative Transmission Electron Microscopy.....	341
<i>Wang-Feng Ding, Bo Zhao, and Fengqi Song</i>	

### SECTION IV Recent Advances

<b>Chapter 24</b> Computational Modeling of Graphene and Carbon Nanotube Structures in the Terahertz, Near-Infrared, and Optical Regimes .....	359
<i>M. F. Pantoja, D. Mateos Romero, H. Lin, S. G. Garcia, and D. H. Werner</i>	

<b>Chapter 25</b> Design and Properties of Graphene-Based Three Dimensional Architectures .....	375
<i>Chunfang Feng, Ludovic F. Dumée, Li He, Zhifeng Yi, Zheng Peng, and Lingxue Kong</i>	
<b>Chapter 26</b> Electronic Structure of Graphene-Based Materials and Their Carrier Transport Properties.....	401
<i>Wen Huang, Argo Nurbawono, Minggang Zeng, Gaurav Gupta, and Gengchiao Liang</i>	
<b>Chapter 27</b> Graphene-Enabled Heterostructures: Role in Future-Generation Carbon Electronics.....	423
<i>Nikhil Jain and Bin Yu</i>	
<b>Chapter 28</b> Recent Progresses and Understanding of Lithium Storage Behavior of Graphene Nanosheet Anode for Lithium Ion Batteries.....	435
<i>Xifei Li and Xueliang Sun</i>	
<b>Chapter 29</b> Study of Transmission, Transport, and Electronic Structure Properties of Periodic and Aperiodic Graphene-Based Structures.....	453
<i>Heraclio García-Cervantes, Rogelio Rodríguez-González, José Alberto Briones-Torres, Juan Carlos Martínez-Orozco, Jesús Madrigal-Melchor, and Isaac Rodríguez-Vargas</i>	
<b>Chapter 30</b> Benefits of Few-Layer Graphene Structures for Various Applications.....	479
<i>I. V. Antonova and V. Ya. Prinz</i>	
<b>Chapter 31</b> Designing Carbon-Based Thin Films from Graphene-Like Nanostructures.....	497
<i>Cecilia Goyenola and Gueorgui K. Gueorguiev</i>	
<b>Chapter 32</b> Graphene-Based Hybrid Composites .....	517
<i>Antonio F. Ávila, Diego T. L. da Cruz, Hermano Nascimento Jr., and Flávio A. C. Vidal</i>	
<b>Chapter 33</b> Graphene Dispersion by Polymers and Hybridization with Nanoparticles.....	529
<i>Po-Ta Shih, Kuo-Chuan Ho, and Jiang-Jen Lin</i>	
<b>Chapter 34</b> Magnetocaloric Effect of Graphenes .....	541
<i>M. S. Reis and L. S. Paixão</i>	
<b>Chapter 35</b> Mode-Locked of Fiber Laser Employing Graphene-Based Saturable Absorber .....	555
<i>Pi Ling Huang, Chao-Yung Yeh, Jiang-Jen Lin, Lain-Jong Li, and Wood-Hi Cheng</i>	
<b>Index</b> .....	573
