

CONTENTS

| | |
|--|-----------|
| Preface | xi |
| 1 Introductory Survey | 1 |
| 1-1 The Basic Phenomena | 2 |
| 1-2 The London Equations | 4 |
| 1-3 The Pippard Nonlocal Electrodynamics | 6 |
| 1-4 The Energy Gap and the BCS Theory | 8 |
| 1-5 The Ginzburg-Landau Theory | 9 |
| 1-6 Type II Superconductors | 11 |
| 1-7 Phase, Josephson Tunneling, Fluxoid Quantization, and Persistent Currents: The Essence of Superconductivity | 13 |
| 1-8 Fluctuation Effects | 14 |
| 2 The BCS Theory | 16 |
| 2-1 Cooper Pairs | 17 |
| 2-2 Origin of the Attractive Interaction | 19 |
| 2-3 The BCS Ground State | 21 |

| | | |
|----------|---|-----------|
| 2-4 | Variational Method | 25 |
| | Determination of the Coefficients | 25 |
| | Evaluation of Ground-State Energy | 29 |
| 2-5 | Solution by Canonical Transformation | 30 |
| | Excitation Energies and the Energy Gap | 33 |
| 2-6 | Finite Temperatures | 33 |
| | Determination of T_c | 34 |
| | Temperature Dependence of the Gap | 34 |
| | Thermodynamic Quantities | 35 |
| 2-7 | State Functions and the Density of States | 38 |
| | Density of States | 41 |
| 2-8 | Electron Tunneling | 43 |
| | The Semiconductor Model | 44 |
| | Normal-Normal Tunneling | 46 |
| | Normal-Superconductor Tunneling | 46 |
| | Superconductor-Superconductor Tunneling | 48 |
| | Phonon Structure | 49 |
| 2-9 | Transition Probabilities and Coherence Effects | 50 |
| | Ultrasonic Attenuation | 53 |
| | Nuclear Relaxation | 55 |
| | Electromagnetic Absorption | 57 |
| 2-10 | Electrodynamics | 59 |
| | Calculation of $K(0, T)$ or $\lambda_{\varphi}(T)$ | 62 |
| | Calculation of $K(q, 0)$ | 64 |
| | Nonlocal Electrodynamics in Coordinate Space | 66 |
| | Effect of Impurities | 67 |
| | Complex Conductivity | 68 |
| 2-11 | Concluding Summary | 71 |
| 3 | Magnetic Properties of Type I Superconductors | 72 |
| 3-1 | The Penetration Depth | 73 |
| | Gauge Choice for the Vector Potential | 73 |
| | Preliminary Estimate of λ | 74 |
| | Exact Solution by Fourier Analysis | 75 |
| | Temperature Dependence of λ | 79 |
| 3-2 | Penetration Depth in Thin Films | 81 |
| | Diffuse Surface Scattering | 83 |
| | Specular Surface Scattering | 86 |
| 3-3 | Measurement of λ | 87 |
| 3-4 | Superconductors in Strong Magnetic Fields: The Intermediate State | 88 |
| | Nonzero Demagnetizing Factor | 90 |
| | Intermediate State in a Flat Slab | 91 |
| | Intermediate State of a Sphere | 97 |
| 3-5 | Critical Current of a Superconducting Wire | 99 |

| | | |
|----------|--|------------|
| 4 | Ginzburg-Landau Theory | 104 |
| 4-1 | The Ginzburg-Landau Free Energy | 105 |
| 4-2 | The Ginzburg-Landau Differential Equations | 110 |
| | The Ginzburg-Landau Coherence Length | 111 |
| 4-3 | Calculation of the Domain-Wall-Energy Parameter | 114 |
| 4-4 | Critical Current of a Thin Wire or Film | 116 |
| 4-5 | Fluxoid Quantization and the Little-Parks Experiment | 120 |
| | The Fluxoid | 120 |
| | The Little-Parks Experiment | 122 |
| 4-6 | Parallel Critical Field of Thin Films | 124 |
| | Thicker Films | 125 |
| 4-7 | The Linearized GL Equation | 127 |
| 4-8 | Nucleation in Bulk Samples: H_{c2} | 128 |
| 4-9 | Nucleation at Surfaces: H_{c3} | 130 |
| 4-10 | Nucleation in Films and Foils | 133 |
| | Angular Dependence of the Critical Field of Thin Films | 133 |
| | Nucleation in Films of Intermediate Thickness | 135 |
| 4-11 | The Abrikosov Vortex State at H_{c2} | 138 |
| 5 | Magnetic Properties of Type II Superconductors | 143 |
| 5-1 | Behavior Near H_{c1} : The Structure of an Isolated Vortex | 144 |
| | The High- κ Approximation | 146 |
| | Vortex Line Energy | 148 |
| 5-2 | Interaction Between Vortex Lines | 149 |
| 5-3 | Magnetization Curves | 150 |
| | Low Flux Density | 151 |
| | Intermediate Flux Densities | 152 |
| | Regime Near H_{c2} | 155 |
| 5-4 | Flux Pinning, Creep, and Flow | 157 |
| 5-5 | Flux Flow | 161 |
| | The Bardeen-Stephen Model | 162 |
| | Onset of Resistance in a Wire | 166 |
| | Experimental Verification of Flux Flow | 169 |
| | Concluding Remarks on Flux Flow | 170 |
| 5-6 | The Critical-State Model | 171 |
| 5-7 | Thermally Activated Flux Creep | 174 |
| | Anderson-Kim Flux-Creep Theory | 175 |
| | Thermal Instability | 181 |
| 5-8 | Superconducting Magnets for Time-varying Fields | 182 |
| | Flux Jumps | 184 |
| | Twisted Composite Conductors | 185 |
| 6 | Josephson Effect and Macroscopic Quantum Phenomena | 192 |
| 6-1 | The Josephson Current-Phase Relation | 193 |
| 6-2 | Effect of Magnetic Field | 196 |

| | | |
|----------|--|------------|
| 6-3 | Superconducting Quantum Interferometers | 201 |
| 6-4 | The AC Josephson Effect | 203 |
| | General Equations | 205 |
| | Examples | 207 |
| 6-5 | General Relations between Phase, Number, Energy, and Current | 209 |
| 6-6 | Practical SQUID Magnetometers | 212 |
| | Typical Parameter Values | 212 |
| | The Two-Junction DC SQUID | 214 |
| | Effect of Screening | 215 |
| | Use of Flux Transformer | 217 |
| | The Single-Contact RF SQUID | 218 |
| | Limit of Sensitivity | 224 |
| 6-7 | Other Josephson-Effect Devices | 226 |
| | The SLUG Voltmeter | 227 |
| | Josephson-Effect Radiation Detectors | 228 |
| 7 | Fluctuation Effects | 230 |
| 7-1 | Appearance of Resistance in a Thin Wire | 231 |
| 7-2 | Superconductivity above T_c in Zero-Dimensional Systems | 237 |
| 7-3 | Spatial Variation of Fluctuations | 240 |
| 7-4 | Fluctuation Diamagnetism above T_c | 244 |
| | Diamagnetism in Two-Dimensional Systems | 249 |
| 7-5 | Time Dependence of Fluctuations | 250 |
| 7-6 | Fluctuation-Enhanced Conductivity above T_c | 251 |
| | Three Dimensions | 253 |
| | Two Dimensions | 253 |
| | One Dimension | 254 |
| | Anomalous Contributions to Fluctuation Conductivity | 255 |
| | High-Frequency Conductivity | 256 |
| 8 | Concluding Topics | 258 |
| 8-1 | Bogoliubov Method: Generalized Self-Consistent Field | 258 |
| | Dirty Superconductors | 260 |
| | Uniform Current in Pure Superconductors | 261 |
| | Excitations in Vortex | 262 |
| 8-2 | Magnetic Perturbations and Gapless Superconductivity | 263 |
| | Depression of T_c by Magnetic Perturbations | 264 |
| | Density of States | 268 |
| 8-3 | Time-Dependent Ginzburg-Landau Theory | 273 |
| | Electron-Phonon Relaxation | 275 |
| | References | 281 |
| | Indexes | 285 |
