<b>PREFACE</b> .....	xv
<b>PREFACE TO SECOND EDITION</b> .....	xvii
<b>PREFACE TO FIRST EDITION</b> .....	xix
<b>ACKNOWLEDGMENTS</b> .....	xxi
<b>ABOUT THE AUTHOR</b> .....	xxiii
<b>1 INTRODUCTION TO POLYMER SCIENCE</b> .....	1
1.1 Classification of Polymers .....	3
1.1.1 Thermoplastics and Thermosets .....	3
1.1.2 Classification Based upon the Mechanism of Polymerization .....	4
1.1.3 Classification Based upon Polymer Structure .....	7
1.2 Polymer Structure .....	8
1.2.1 Copolymers .....	9
1.2.2 Tacticity .....	9
1.2.3 Geometric Isomerism .....	12
1.2.4 Nomenclature .....	13
1.3 Molecular Weight .....	15
1.3.1 Molecular-Weight Distribution .....	15
1.3.2 Molecular-Weight Averages .....	16
1.4 Chemical Structure and Thermal Transitions .....	20
Suggested Reading .....	22
Problems .....	22
References .....	24
<b>2 POLYMER SYNTHESIS</b> .....	25
2.1 Step-Growth Polymerization .....	26
2.1.1 Molecular Weight in a Step-Growth Polymerization .....	28
2.1.2 Step-Growth Polymerization Kinetics .....	30
2.2 Chain-Growth Polymerization .....	31
2.2.1 Free-Radical Polymerization and Copolymerization .....	32
2.2.2 Ionic Polymerization and Copolymerization .....	49
2.2.3 Coordination Polymerization .....	53
2.2.4 Controlled Radical Polymerizations .....	57
2.3 Polymerization Techniques .....	64
2.3.1 Bulk Polymerization .....	64

2.3.2	Solution Polymerization .....	66
2.3.3	Suspension Polymerization .....	66
2.3.4	Emulsion Polymerization .....	67
2.3.5	Solid-State, Gas-Phase, and Plasma Polymerization.....	69
2.3.6	Polymerization in Supercritical Fluids .....	71
2.3.7	Polymerization in Ionic Liquids .....	72
2.4	Polymer Reactivity.....	74
2.4.1	Chemical Modification.....	74
2.4.2	Preparation of Polymer Derivatives .....	76
2.4.3	Click Chemistry.....	79
2.5	Special Topics in Polymer Synthesis .....	81
2.5.1	Metathesis.....	81
2.5.2	Group-Transfer Polymerization .....	83
2.5.3	Macromers in Polymer Synthesis.....	84
2.5.4	Genetic Engineering.....	85
2.5.5	Green Chemistry.....	86
2.6	Chemical Structure Determination.....	86
2.6.1	Vibrational Spectroscopy .....	86
2.6.2	Nuclear Magnetic Resonance Spectroscopy .....	89
	Suggested Reading .....	92
	Problems.....	95
	References .....	98
<b>3</b>	<b>CONFORMATION, SOLUTIONS, AND MOLECULAR WEIGHT .....</b>	<b>101</b>
3.1	Polymer Conformation and Chain Dimensions.....	102
3.2	Thermodynamics of Polymer Solutions.....	109
3.2.1	The Flory–Huggins Theory .....	110
3.2.2	Flory–Krigbaum and Modified Flory–Huggins Theories .....	116
3.2.3	Equation-of-State Theories.....	117
3.2.4	Phase Equilibria.....	122
3.2.5	Determination of the Interaction Parameter .....	125
3.2.6	Predictions of Solubilities .....	126
3.3	Measurement of Molecular Weight.....	129
3.3.1	Osmometry .....	130
3.3.2	Light-Scattering Methods.....	134
3.3.3	Intrinsic Viscosity Measurements .....	140
3.3.4	Gel-Permeation Chromatography.....	143
	Suggested Reading .....	146
	Problems.....	146
	References .....	150

<b>4</b>	<b>SOLID-STATE PROPERTIES</b> .....	153
4.1	The Amorphous State .....	154
4.1.1	Chain Entanglements and Reptation .....	154
4.1.2	The Glass Transition .....	156
4.1.3	Secondary-Relaxation Processes .....	158
4.2	The Crystalline State .....	159
4.2.1	Ordering of Polymer Chains .....	159
4.2.2	Crystalline-Melting Temperature .....	163
4.2.3	Crystallization Kinetics .....	164
4.2.4	Techniques to Determine Crystallinity .....	165
4.3	Thermal Transitions and Properties .....	167
4.3.1	Fundamental Thermodynamic Relationships .....	167
4.3.2	Measurement Techniques .....	172
4.3.3	Structure-Property Relationships .....	177
4.3.4	Effect of Molecular Weight, Composition, and Pressure on $T_g$ ...	179
4.4	Mechanical Properties .....	183
4.4.1	Mechanisms of Deformation .....	183
4.4.2	Methods of Testing .....	185
4.5	Solid-State Characterization Methods .....	200
4.5.1	Microscopy .....	200
4.5.2	Scattering Methods .....	201
	Suggested Reading .....	202
	Problems .....	203
	References .....	204
<b>5</b>	<b>VISCOELASTICITY AND RUBBER ELASTICITY</b> .....	207
5.1	Introduction to Viscoelasticity .....	208
5.1.1	Dynamic-Mechanical Analysis .....	208
5.1.2	Mechanical Models of Viscoelastic Behavior .....	221
5.1.3	Viscoelastic Properties of Polymer Solutions and Melts .....	230
5.1.4	Dielectric Analysis .....	232
5.1.5	Dynamic Calorimetry .....	239
5.1.6	Time-Temperature Superposition .....	242
5.1.7	Boltzmann Superposition Principle .....	245
5.1.8	Interrelationships between Transient and Dynamic Properties .....	247
5.2	Introduction to Rubber Elasticity .....	248
5.2.1	Thermodynamics .....	248
5.2.2	Statistical Theory .....	252
5.2.3	Phenomenological Model .....	253
5.2.4	Recent Developments .....	254

Suggested Reading .....	255
Problems .....	256
References .....	259
<b>6 POLYMER DEGRADATION AND THE ENVIRONMENT .....</b>	<b>261</b>
6.1 Polymer Degradation and Stability .....	262
6.1.1 Thermal Degradation.....	262
6.1.2 Oxidative and UV Stability .....	267
6.1.3 Chemical and Hydrolytic Stability .....	269
6.1.4 Effects of Radiation.....	271
6.1.5 Mechanodegradation .....	272
6.2 Management of Plastics in the Environment.....	272
6.2.1 Recycling.....	273
6.2.2 Incineration.....	274
6.2.3 Biodegradation .....	275
Suggested Reading .....	279
References .....	279
<b>7 ADDITIVES, BLENDS, BLOCK COPOLYMERS, AND COMPOSITES.....</b>	<b>281</b>
7.1 Additives .....	282
7.1.1 Plasticizers.....	282
7.1.2 Fillers and Reinforcements.....	287
7.1.3 Other Important Additives.....	288
7.2 Polymer Blends and Interpenetrating Networks .....	293
7.2.1 Polymer Blends .....	293
7.2.2 Toughened Plastics and Phase-Separated Blends.....	302
7.2.3 Interpenetrating Networks .....	304
7.3 Block Copolymers.....	306
7.4 Composites.....	310
7.4.1 Mechanical Properties .....	311
7.4.2 Composite Fabrication .....	316
7.5 Nanocomposites .....	318
7.5.1 Montmorillonite Nanocomposites.....	319
7.5.2 Buckyballs, Carbon Nanotubes, Graphene, and POSS .....	322
Suggested Reading .....	326
Problems .....	328
References .....	329

<b>8 BIOPOLYMERS, NATURAL POLYMERS, AND FIBERS</b> .....	331
8.1 Biopolymers and Other Naturally Occuring Polymers .....	332
8.1.1 Proteins.....	332
8.1.2 Polynucleotides .....	336
8.1.3 Polysaccharides .....	341
8.1.4 Naturally Occurring Elastomers .....	344
8.2 Fibers .....	346
8.2.1 Natural and Synthetic Fibers .....	346
8.2.2 Cellulosics .....	349
8.2.3 Non-cellulosics .....	350
8.2.4 Fiber-Spinning Operations .....	354
Suggested Reading .....	358
Problems .....	359
References .....	359
<b>9 THERMOPLASTICS, ELASTOMERS, AND THERMOSETS</b> .....	361
9.1 Commodity Thermoplastics .....	362
9.1.1 Polyolefins.....	362
9.1.2 Vinyl Polymers.....	367
9.1.3 Thermoplastic Polyesters .....	372
9.2 Elastomers .....	374
9.2.1 Diene Elastomers.....	375
9.2.2 Nondiene Elastomers.....	379
9.2.3 Thermoplastic Elastomers .....	384
9.3 Thermosets .....	386
9.3.1 Epoxies .....	386
9.3.2 Unsaturated Polyesters .....	387
9.3.3 Formaldehyde Resins .....	389
Suggested Reading .....	393
Problems .....	394
References .....	395
<b>10 ENGINEERING AND SPECIALTY POLYMERS</b> .....	397
10.1 Engineering Plastics .....	399
10.1.1 Polyamides.....	399
10.1.2 ABS .....	401
10.1.3 Polycarbonates.....	402
10.1.4 Modified Poly(phenylene oxide) .....	404
10.1.5 Acetal.....	405
10.1.6 Polysulfones.....	406
10.1.7 Poly( <i>p</i> -phenylene sulfide).....	408

10.1.8	Engineering Polyesters .....	409
10.1.9	Fluoropolymers.....	411
10.2	Specialty Polymers .....	412
10.2.1	Polyimides and Related Specialty Polymers .....	413
10.2.2	Polyaryletherketones.....	419
10.2.3	Specialty Polyolefins .....	420
10.2.4	Ionic Polymers .....	421
10.2.5	Inorganic Polymers.....	422
10.2.6	Liquid-Crystalline Polymers.....	424
10.2.7	Conductive Polymers.....	427
10.2.8	High-Performance Fibers.....	429
10.2.9	Dendritic Polymers .....	430
	Suggested Reading .....	431
	Problems.....	433
	References .....	433
<b>11</b>	<b>POLYMER PROCESSING AND RHEOLOGY .....</b>	<b>435</b>
11.1	Basic Processing Operations .....	436
11.1.1	Extrusion.....	436
11.1.2	Molding .....	437
11.1.3	Calendering.....	445
11.1.4	Coating.....	445
11.2	Introduction to Polymer Rheology.....	446
11.2.1	Non-Newtonian Flow .....	448
11.2.2	Viscosity of Polymer Solutions and Suspensions.....	452
11.2.3	Constitutive Equations.....	456
11.2.4	Elastic Properties of Polymeric Fluids.....	457
11.2.5	Melt Instabilities .....	460
11.2.6	Drag Reduction.....	460
11.3	Analysis of Simple Flows .....	461
11.3.1	Pressure (Poiseuille) Flow .....	464
11.3.2	Drag Flow .....	467
11.4	Rheometry .....	468
11.4.1	Capillary Rheometer.....	469
11.4.2	Couette Rheometer .....	473
11.4.3	Cone-and-Plate Rheometer .....	475
11.4.4	Rheometry of Polymer Solutions and Melts.....	475
11.5	Modeling of Polymer-Processing Operations .....	476
11.5.1	Extrusion.....	476
11.5.2	Wire Coating.....	482

Appendices .....	485
11.A.1 Relationships between WLF Parameters and Free Volume .....	485
11.A.2 Dynamic and Continuity Equations .....	486
Suggested Reading .....	487
Problems .....	488
References .....	491
<b>12 POLYMERS FOR ADVANCED TECHNOLOGIES .....</b>	<b>493</b>
12.1 Membrane Science and Technology .....	494
12.1.1 Barrier Polymers .....	494
12.1.2 Membrane Separations .....	495
12.1.3 Mechanisms of Transport .....	506
12.1.4 Membrane Preparation .....	517
12.2 Biomedical Engineering and Drug Delivery .....	526
12.2.1 Controlled Drug Delivery .....	527
12.2.2 Gene Therapy .....	530
12.2.3 Antimicrobial Polymers .....	532
12.2.4 Tissue Engineering .....	532
12.2.5 Kidney Dialysis and Artificial Organs .....	533
12.3 Applications in Electronics and Energy .....	533
12.3.1 Electrically Conductive Polymers .....	533
12.3.2 Polymeric Batteries .....	535
12.3.3 Organic Photovoltaic Polymers .....	537
12.3.4 Electronic Shielding .....	540
12.3.5 Dielectrics .....	541
12.3.6 Electronic Encapsulation .....	541
12.4 Photonic Polymers .....	541
12.4.1 Nonlinear Optical Polymers .....	542
12.4.2 Light-Emitting Diodes .....	543
12.5 Sensor Applications .....	544
Suggested Reading .....	547
Problems .....	550
References .....	550
<b>13 CORRELATIONS AND SIMULATIONS IN POLYMER SCIENCE .....</b>	<b>553</b>
13.1 Group-Contribution Methods .....	554
13.1.1 Volumetric Properties .....	554
13.1.2 Glass-Transition Temperature .....	558
13.1.3 Permeability .....	559
13.1.4 Solubility Parameter .....	562
13.1.5 Activity Coefficients .....	566

13.2 Topological Indices .....	574
13.3 Artificial Neural Network .....	578
13.4 Molecular Simulations .....	581
13.4.1 Molecular Mechanics Force Fields.....	583
13.4.2 Molecular Dynamics and Monte Carlo Methods.....	588
13.5 Applications of Molecular Simulations.....	591
13.5.1 PVT Simulation .....	591
13.5.2 Cohesive Energy Density and the Solubility Parameter .....	593
13.5.3 Glass-Transition Temperature .....	594
13.5.4 Pair Correlations .....	595
13.5.5 Time-Correlation Coefficients.....	597
13.5.6 Scattering Functions .....	599
13.5.7 Mechanical Properties .....	600
13.5.8 Sorption Isotherms.....	602
13.5.9 Permeability.....	605
13.5.10 Free Volume.....	610
Suggested Reading .....	611
Problems.....	612
References .....	612
<b>A</b> Polymer Abbreviations .....	617
<b>B</b> Representative Properties of Some Important Commercial Polymers.....	621
<b>C</b> ASTM Standards for Plastics and Rubber .....	623
<b>D</b> SI Units and Physical Constants .....	627
<b>E</b> Mathematical Relationships.....	629
<b>F</b> The Major Elements .....	635
<b>INDEX</b> .....	637
