<i>Preface</i>	vii
----------------------	-----

SECTION 1: Theory and Concepts	1
---------------------------------------	----------

CHAPTER ① Radiobiology History	3
Radiobiology History	4
Law of Bergonie and Tribondeau	8
Ancel and Vitemberger	8
Fractionation Theory	9
Repopulation and Protraction	9
Mutagenesis	10
Effects of Oxygen and Hydrolysis of Water	10
Reproductive Failure	10
Roentgen	10
Rad	11
Rem	11
SI Units	11
Regulation	12
CHAPTER ② Cellular Anatomy and Physiology	17
Cell Biology	18
Chemical Configuration of Cells	19
Cell Structure	22
Cell Growth and Division	30
Mitosis	31
Meiosis	32
DNA Proofreading and Repair	34
CHAPTER ③ Cellular Effects of Radiation	43
Radiosensitivity of Cells	44
Physical and Biologic Factors	45
Direct and Indirect Effects of Radiation	48
Interactions with Radiation	49
Radiolysis of Water	49
Irradiation of Macromolecules	50
Single-Hit Chromosome Aberrations	52
Multi-Hit Chromosome Aberrations	54
Reciprocal Translocations	55
Dose-Response Relationships	55
Linear-Dose-Response Relationships	56
Linear Quadratic Dose-Response Curves	56
Target Theory	58
Bystander Effect	59
Cell Survival Curves	60
Section 1 Review	67

SECTION 2: Biological Effects of Radiation Exposure**71**

CHAPTER 4	<i>Effects of Initial Exposure to Radiation</i>	73
	Acute Radiation Syndromes	74
	Response Stages	75
	Bone Marrow Syndrome	77
	Gastrointestinal Syndrome	78
	Central Nervous System Syndrome	78
	Local Tissue Damage	79
	Skin	79
	Eyes	82
	Gonads	82
	Hematologic Effects	84
	Hemopoietic System	84
	Cytogenetic Effects	86
CHAPTER 5	<i>Effects of Long-term Exposure to Radiation</i>	95
	Epidemiology	96
	Dose-Response Curves	97
	Relative vs. Absolute Risk	97
	Radiation-Induced Malignancies	104
	Leukemia	104
	Skin Carcinoma	105
	Thyroid Cancer	106
	Breast Cancer	106
	Osteosarcoma	107
	Lung Cancer	107
	Life-Span Shortening	107
	Genetic Damage	109
	Irradiation of the Fetus	113
	Pre-implantation Stage	114
	Fetal Growth Stage	116
	Stochastic and Nonstochastic Effects	119
	Radiation Hormesis	120
	Section 2 Review	126

SECTION 3: RADIATION PROTECTION**129**

CHAPTER 6	<i>Protection of Personnel</i>	131
	Rationale for Radiation Protection	132
	Monitoring of Personnel	132
	Film Badges	133
	Thermoluminescent Dosimeters	134
	Optically Stimulated Luminescence (OSL) Dosimeters	136
	Pocket Dosimeters	138
	Dosimetry Report	139
	Radiation Survey Instruments	140
	Dose-Limiting Recommendations	142
	Principles of Personnel Exposure Reduction	147
	Time	148
	Distance	148
	Shielding	148

Structural Shielding Construction	148
Use of Protective Garments	151
Mobile Exam Considerations	156
Fluoroscopic Exam Considerations	157
Inverse Square Law	161
Patient Immobilization Considerations	163
CHAPTER 7 <i>Protection of Patients</i>	171
Immobilization	172
Beam Restriction	173
Kilovoltage	173
Irradiated Material	174
Beam-Limiting Devices	174
Aperture Diaphragms	174
Cones	174
Collimators	176
X-Ray Beam Filtration	177
Gonadal Shielding	178
Flat Contact Shields	179
Shadow Shields	179
Shaped Contact Shields	179
Exposure and Technique Factors	179
Kilovoltage Range	180
Milliamperage and Time	181
Film-Screen Considerations	182
Radiographic Film	182
Intensifying Screens	182
Electronic Imaging	183
Computed Radiography (CR)	183
Digital Radiography (DR)	184
Patient Positioning	184
Grids	184
The Pregnant Patient	184
Repeat Radiographs	185
Fluoroscopic Procedures	185
Image Intensification Fluoroscopy	185
Section 3 Review	192
 <i>Bibliography</i>	 195
<i>Glossary</i>	197
<i>Index</i>	203
