|---|-----|
| Preface | 7 |
| Introduction | 9 |
| I. Formal Aspects of Method | |
| A. Exploring the Characteristics of a Naturally Occurring Process | |
| 1. Aristotle: <i>The Embryology of the Chick</i> | 31 |
| 2. William Beaumont: <i>The Process of Digestion as Chemistry</i> | 39 |
| B. Deciding between Rival Hypotheses | |
| 3. Robert Norman: <i>The Discovery of Dip and the Field Concept</i> | 49 |
| 4. Stephen Hales: <i>The Circulation of Sap in Plants</i> | 57 |
| 5. Konrad Lorenz: <i>The Conditions of Imprinting</i> | 65 |
| C. Finding the Form of a Law Inductively | |
| 6. Galileo: <i>The Law of Descent</i> | 76 |
| 7. Robert Boyle: <i>The Measurement of the Spring of the Air</i> | 83 |
| D. The Use of Models to Simulate otherwise Unresearchable Processes | |
| 8. Theodoric of Freiburg: <i>The Causes of the Rainbow</i> | 93 |
| E. Exploiting an Accident | |
| 9. Louis Pasteur: <i>The Preparation of Artificial Vaccines</i> | 102 |
| 10. Ernest Rutherford: <i>The Artificial Transmutation of the Elements</i> | 111 |
| F. Null Results | |
| 11. A. A. Michelson and E. W. Morley: <i>The Impossibility of Detecting the Motion of the Earth</i> | 124 |
| II. Developing the Content of a Theory | |
| A. Finding the Hidden Mechanism of a Known Effect | |
| 12. F. Jacob and E. Wollman: <i>The Direct Transfer of Genetic Material</i> | 137 |
| 13. J. J. Gibson: <i>The Mechanism of Perception</i> | 147 |

Contents

| | |
|---|-----|
| B. Existence Proofs | |
| 14. A. L. Lavoisier: <i>The Proof of the Oxygen Hypothesis</i> | 155 |
| 15. Humphry Davy: <i>The Electrolytic Isolation of New Elements</i> | 163 |
| 16. J. J. Thomson: <i>The Discovery of the Electron</i> | 171 |
| C. The Decomposition of an Apparently Simple Phenomenon | |
| 17. Isaac Newton: <i>The Nature of Colours</i> | 182 |
| D. The Demonstration of Underlying Unity within Apparent Variety | |
| 18. Michael Faraday: <i>The Identity of All Forms of Electricity</i> | 191 |
| III. Technique | |
| A. Accuracy and Care in Manipulation | |
| 19. J. J. Berzelius: <i>The Perfection of Chemical Measurement</i> | 201 |
| B. The Power and Versatility of Apparatus | |
| 20. Otto Stern: <i>The Wave Aspect of Matter and the Third Quantum Number</i> | 212 |
| General Bibliography | 221 |
| Index | 223 |
