

Volume 1

CHAPTER 1 Transition to Hydrogen-based Energy Systems

Fuel Cell Propulsion for Urban Duty Vehicles - Bavarian Fuel Cell Bus Project. <i>R. Wurster, M. Altmann, D. Sillat, H.J. Drewitz, K.W. Kalk Ch. Gruber, A. Hammerschmidt, W. Stühler, E. Holl (Germany)</i>	3
Investigations in the Solar Energy Conversion to Hydrogen Energy in the Republic of Armenia <i>V.M. Aroutiounian (Armenia)</i>	13
Potential and Costs of Electrolytical Hydrogen Production by Secondary Energy in Brazil. <i>S.N.M. De Souza, E.P. Da Silva (Brazil)</i>	23
Potential for Air Quality Improvement in the Tokyo Metropolitan Area from Use of Hydrogen Fuel. <i>P. Kruger, M. Murdock, T. Hirai, K. Okano (USA/Japan)</i>	33
Solar Hydrogen Project at Nasser Lake in the South of Egypt. <i>M.A.M. Shaltout (Egypt)</i>	45
Generation and Use of Hydrogen for the Supply of the Cane to the Sugar-Cane Industry. <i>A. Valdés (Cuba)</i>	55
Potential for Solar Hydrogen Production in the Mediterranean Area Using a Central Receiver System. <i>F. Rosa, V. Fernández, F. Isorna, E. López (Spain)</i>	65
Development of Guidelines for the Design of Integrated Hydrogen Systems. <i>A. de Groot, M. Bracht, C.E. Gregoire Padro, T.H. Schucan, E. Skolnik (The Netherlands/USA/Switzerland)</i>	75
The Integration of Secondary Energy and Natural Gas by Hydrogen. <i>S.N.M. De Souza, E.P. Da Silva (Brazil)</i>	87
The Air Quality Control and the Air Monitoring Systems. <i>O. Garcia Peyrano, M. Caputo (Argentina)</i>	95

Solar Hydrogen as a Transportation Fuel: Application to a Sensitive Environmental Site. <i>E. López, F. Rosa, F. Isorna (Spain)</i>	103
Development of Hydrogen Technology Component Models for Systems Integration. <i>T.H. Schucan, E. Skolnik, M. Bracht, C.E. Gregoire Padró (Switzerland/USA/The Netherlands)</i>	111
Economic Aspects	
Why Hydrogen Makes Sense as a Motor Fuel of the Future - With or Without Global Warming. <i>A. Lloyd, G. Rambach, A. LaVen, R. Rose (USA)</i>	121
Hydrogen-based Systems as reply of El Niño Problem in Colombian Energy Sector <i>V.V. Kafarov, L. Acevedo Duarte (Colombia)</i>	131
Newly Emerging Opportunities for Pollution Reduction Using Hydrogen as Vehicular Fuel. <i>T. Krepec, H. Hong</i>	143
Biological Hydrogen Production as an Environmentally Friendly Technology. <i>K. Takasaki, S. Otsuka, T. Hattori (Japan)</i>	153
A Feasibility Study of Conceptual Design for International Clean Energy Network using Hydrogen Conversion Technology. <i>T. Sato, A. Hamada, K. Kitamura (Japan)</i>	159
Pollution Solution Evolution. New Opportunity for Hydrogen. <i>R.M. Zweig, J. Provenzano (USA)</i>	169
Wind Hydrogen Production in Buenos Aires Province Eolic Resources - Demonstration Plant. <i>J.C. Bolcich, M.M. Cueto</i>	177
Visions and Strategies	
Comparative Costs of Hydrogen Produced from Photovoltaic Electrolysis and from Photoelectrochemical Processes. <i>D.L. Block (USA)</i>	185

Development of a Data Acquisition and Control System for a Small-Scale PV-H ₂ System - First Design Phase. <i>J. Eriksen (Norway)</i>	195	Zero-Emission Transport Systems Based on Hydrogen Fuel from Renewable Energies. <i>M. Altmann, M. van Brummelen, K. Blok, R. Steinberger-Wilckens, K. Stolzenburg, R. Wurster (The Netherlands/Germany)</i>	313
The Introduction of Hydrogen in London and Tokyo - Costs and Strategic Issues. <i>D. Hart, D. Hutchinson (U.K.)</i>	205	Urban Buses: A Market Opportunity for Hydrogen in the USA. <i>J. S. Cannon (USA)</i>	325
Hydrogen, Hybrid and Electric Propulsion in a Strategy for Sustainable Transport. <i>K. Jorgensen (Denmark)</i>	213	Exploring the Technical and Economic Feasibility of Producing Hydrogen from Sunlight and Wind. <i>M.K. Mann, J.P. DiPietro, J.J. Iannucci, J. M. Eyer (USA)</i>	337
The Socio-Political Aspects of the Transition to Hydrogen-Based Energy Systems. <i>E. Gladstone (USA)</i>	223	An Examination of the Criteria Necessary for Successful Worldwide Deployment of Isolated, Renewable Hydrogen Stationary Power Systems. <i>G.D. Rambach, J.D. Snyder (USA)</i>	347
Carbon Trading and Hydrogen - Possibilities and Pitfalls. <i>R. E. Ayres, R.K. Rose, A. C. Lloyd, R. Wichert (USA)</i>	231	Use of Barrier and Attractor Analysis for Identifying Hydrogen System Opportunities with Illustrations in Latin America. <i>W. R. Merida, D. Sanborn Scott (Canada)</i>	357
System Comparison of Hydrogen with other Alternative Fuels in Terms of EPACT Requirements. <i>K. Özay, T.N. Veziroglu, F. Barbir (USA)</i>	241	International and National Programs and Projects	
Energy Supply and Conversion to Hydrogen: How to Improve the Air Quality in Buenos Aires City. <i>N.R. Venturini, J. Bergallo, H.L. Corso, J.C. Bolcich (Argentina)</i>	271	Argentina, The 21st. Century Kuwait - Patagonian Wind "Exported" as Liquid Hydrogen. <i>E. Spinadel, F. Gamallo, S.L. Gracia Nuñez, P. Spinadel, M. Cerviño (Argentina)</i>	369
HyWeb - The Hydrogen and Fuel Cell Information System. Publication of a Hydrogen Acceptance Study in HyWeb as an Example of the Dissemination of Hydrogen Information via the Internet. <i>M. Altmann, R. Wurster, C. Gräsel (Germany)</i>	281	CanarHy - Canary Renewables & Hydrogen Project. Towards a Clean and Sustainable Energy System in the Canary Islands - Hydrogen as a Vector. <i>A. Gómez Gotor, A. González García-Conde, R. Luque Berruezo, J. Pérez Peces, J. García Latorre, M. Perdomo Machín (Spain)</i>	377
Implementing the Hydrogen Commercialization Plan. <i>R.L. Mauro, K.I. Miller</i>	291	The Icelandic-German Hydrogen Project. <i>H. Gretz, H. Albert, D. Allers, T. Breitzkreuz, W. Fürwentsches, J. Gretz, M. Meybauer, T. Mucha, O. Weinmann (Germany)</i>	387
Reconsideration of Air/Fuel Ratios for Thermal Management of Tubular Solid Oxide Fuel Cells. <i>C. Haynes (USA)</i>	301	The United States Department of Energy's Hydrogen Program - Perspectives from the Hydrogen Technical Advisory Panel (HTAP). <i>C. Bailey, M. Kamal, A. Lloyd, F. Lynch, D. Nahmias, R. Zalosh (USA)</i>	395
Wind Potential Availability for the Production of Hydrogen in the Canary Archipelago. <i>J. García Latorre, A. Gomez Gotor, M. Perdomo Machín (Spain)</i>	307	The Use of a Liquid Hydrogen Bus in a Public Transport System. <i>K. Matthes, H. Knorr, D. Sillat (Germany)</i>	405

ⁱ Solar-Hydrogen: An Energy System for Sustainable Development in Spain. <i>A. Contreras, J. Carpio, M. Molero, T.N. Veziroglu (Spain/USA)</i>	415
Evaluation of a 5 kW _p Photovoltaic Hydrogen Production and Storage Installation for a Residential Home in Switzerland. <i>P. Hollmuller, J.M. Joubert, B. Lachal, K. Yvon (Switzerland)</i>	423
Integration of Hydrogen into Energy Supply Systems. <i>G. Newi, O. Weinmann (Germany)</i>	445
Research and Development Activities on Hydrogen Technology in Switzerland. <i>A. Reller (Switzerland)</i>	455
Feasibility Study for R & D Hydrogen Fuel Cell Bus Project in China. <i>B. De You (R.P. China)</i>	463
European Integrated Hydrogen Project (EIHP). <i>C. Devillers, K. Pehr, J.S. Duffield, O. Weinmann, H. Vandendorre, A. González García C., R. Wurster, M. Kesten, F. Heurtaux, P. Ekdunge (France/Germany/Italy/Belgium/Spain/Sweden)</i>	469
The Role of Hydrogen in Energy Supply of the County of Split and Dalmatian Islands. <i>R. Vujcic, Z. Josipovic, F. Matejcic, F. Barbir (Croatia/USA)</i>	483
Status Report on the Demonstration Phases of the Euro-Quebec Hydro-Hydrogen Pilot Project (EQHHPP). <i>A. Bahbout, D. Kluyskens, R. Wurster (Italy/Canada/Germany)</i>	495
CHAPTER 2 Technologies of Hydrogen Production	
Effects of Temperature on the Performance of Cu-Ni Oxygen Anodes in Alkaline Solution. <i>M. Abdulsalam, U. Dawoud (Saudi Arabia)</i>	513
CO ₂ Free Production of Hydrogen by Catalytic Pyrolysis of Hydrocarbon Fuels for Transportation. <i>N.Z. Muradov (USA)</i>	523
Continuos Generation of Hydrogen from Sewage Sludge.	533

<i>S. Roychowdhury, D. Cox, M. Nag, T. Hamill (USA)</i>	
Hydrogen Production from Gasified Biomass by Sponge Iron Reactor (SIR). <i>V. Hacker, H. Fuchs, R. Fankhauser, B. Spreitz, K. Friedrich, G. Faleschini (Austria)</i>	543
First Operation Results of a Small Scale Sponge Iron Reactor (SIR) for Hydrogen Production. <i>R. Fankhauser, V. Hacker, B. Spreitz, K. Kleindienst, H. Fuchs, A. Rabel, K. Friedrich, G. Faleschini (Austria)</i>	551
Helium Detection During Electrolytic Hydrogen Production. <i>E. Peres da Silva, N. Pimenta Neves Jr., M.Ballester Ferreira Santos (Brazil)</i>	555
Kinetics and Mechanism of Hydrolysis of a Ca Pellet in the UT-3 Thermochemical Cycle for Hydrogen Production. <i>T. Sato, M. Sakurai, Y. Matsumura, A. Tsutsumi, K. Yoshida (Japan)</i>	561
Hydrogen Production from Hydrogen Sulfide using Membrane Reactor. <i>H. Ohya, M. Aihara, H. Ohashi, Y. Negishi (Japan)</i>	571
Preparation, Structure and Reactivity of Ca-Pellets for the UT-3 Thermochemical Hydrogen Production Cycle. <i>T. Sato, M. Sakurai, Y. Matsumura, A. Tsutsumi, K. Yoshida (Japan)</i>	581
Properties and Application of the Zirfon® Separator for Use in Alkaline Electrolysers. <i>Ph. Vermeiren, W. Adriansens, J.P. Moreels, R. Leysen (Belgium)</i>	589
Ni-Fe-Zn as Cathode Material for the Production of Hydrogen by Water Electrolysis. <i>E.R. Gonzalez, M.J. Giz, S.C. Bento (Brazil)</i>	599
The Hydrogen Evolution Reaction on LaNiO ₃ Cathodes. <i>R.C. Rosim, E.R. Gonzalez (Brazil)</i>	607
Natural Gas Decarbonization Technology for Mitigating Global Warning. <i>M. Steinberg (USA)</i>	615
Hydrogen from Fossil Fuels	
Comparative Analysis of Various Pyrolysis and Conversion of Natural Gas Methods. <i>E.E. Shpilrain, V.Y. Shterenberg, V.M. Zaitchenko (Russia)</i>	625

KV AERNER Based Technologies for Environmentally Friendly Energy and Hydrogen Production. <i>S Lynum, R. Hildrum, K Hox, J Hugdahl (Norway)</i>	637	Uses of Simple Electrochemical Methods for Production and Characterization of Composite Materials for HER. <i>E. Peláez, M. Trueba, H. González, C. Nuñez, M. Valdés, M. Fernández (Cuba)</i>	739
A temperature-Pressure Swing Methanation Process for the Recovery of Carbon Oxides by Using Fluorinated Hydriding Alloys. <i>K. Iwata, Y Komazaki, M Uchida, S. Suda (Japan)</i>	647	Development of 2500 cm ₂ Solid Polymer Electrolyte Water Electrolyzer in WE-NET. <i>M. Yamaguchi, T. Shinohara, H. Taniguchi, T. Nakanori, K. Okisawa (Japan)</i>	747 ¹
Steam-Methanol Reforming Over Zeolitic Materials. <i>M. Laniecki, K. Kazmierczak-Rosik (Poland)</i>	661	Hydrogen-Production by a Windmill Powered Electrolyser. <i>F. Menzl, M. Wenske, J. Lehmann (Germany)</i>	757
Rapid Steam Reforming of Volatiles from Flash Coal Pyrolysis over Simultaneously Formed Char as Catalyst. <i>J. I. Hayashi, Y. Tomioka, T. Shimada, H. Takahashi, H. Kumagai, T. Chiba (Japan)</i>	669	Electrodeposited Cobalt Oxides for Alkaline Water Electrolysis. <i>E.B. Castro, C.A. Gervasi (Argentina)</i>	767
Plasmacatalysis Hydrogen Production from Methane. <i>A. Babaritskiy, I. Baranov, S. Dyomkin, C. Etievant, V. Jivotov, B. Potapkin, V. Rusanov, E. Ryazantsev (Russia/France)</i>	679	An Autonomous Wind-Hydrogen System for Electricity Services to Isolated Locations. <i>F. Menzl, E. Spinadel (Germany/Argentina)</i>	777
Plasmachemical Hydrogen Production from Natural Gases Containing Hydrogen Sulfide. <i>A. Bagautdinov, V.K. Jivotov, Y. Eremenko, I. A. Kalachev, A. I. Kozbagarov, E. I. Konstantinov, S.A. Musinov, K. I. Overchuk, V.D. Rusanov, V.A. Zoller (Russia)</i>	683	Thermochemical Cycles	
Hydrogen Generation in the Water-Gas Shift Reaction Over Sulfided Catalysts. <i>M. Malecka-Grycz, F. Domka, M. Laniecki (Poland)</i>	691	Technical Evaluation of Adiabatic UT-3 Thermochemical Hydrogen Production Process for an Industrial Scale Plant. <i>Y. Tadokoro, O. Sato, T. Yamaguchi, K. Endo, H. Kemeyama, K. Yoshida (Japan)</i>	783
Electrolysis		Solar Thermochemical Production of Hydrogen using Metal Oxide Redox Systems. <i>A. Steinfeld, A. Reller (Switzerland)</i>	793
Recent Developments in Electrode Materials for Water Electrolysis. <i>L.A. Avaca, S.A.S. Machado, J.L. Cerne, F.C. Crnkovic, H.B. Suffredini (Brazil)</i>	701	Solar Hydrogen from Manganese Oxide - A New Thermochemical Cycle. <i>M. Sturzenegger, J. Ganz, P. Nüesch, Th. Schelling (Switzerland)</i>	801
Improved Electrodes for Water Electrolysis. <i>L.N. Kulikova, V.N. Fateev, V.D. Rusanov (Russia)</i>	711	UT-3 Thermochemical Hydrogen Production Process Driven by Conventional Heat Sources. <i>K. Yoshida, Y. Matsumura, T. Sato, A. Tsutsumi, K. Yamada, S. Shimizu (Japan)</i>	807
Electrocatalysis and Non-faradaic Promotion in Heterogeneous Catalysis (NEMCA): Hydrogen Electrode Reactions, Its Hydridic Behaviour and Chemical Oxidation. <i>V.V. Krstajic, M.M. Jaksic (Yugoslavia)</i>	717	Solar Reactor for Thermochemical and Hybrid Cycles for Hydrogen Production. <i>H. Romero-Paredes, A. Torres, J.J. Ambriz (Mexico)</i>	817

Other Technologies

- Prospects of Biological Hydrogen Production in Cuba. 827
L. Travieso, F. Benítez, M. Hernández (Cuba)
- H₂ Production using Semiconductor Photoelectrodes, Prepared by Screen Printing. 833
A.M. Fernández, L.G. Arriaga (Mexico)
- Accumulation Solar and Wind Energy to Synthetic Energy Carriers (H₂, CO, CH). 841
Sh.D. Schachbazov (Azerbaijan)
- The Advanced Process of Hydrogen Production. 845
D.L. Astanovsky, L.Z. Astanovsky (Russia)

Volume 2

CHAPTER 3 Technologies of Hydrogen Storage and Transport

- Hydrogen Storage and Supply Systems on Hydroreacting Composition Base. 855
V. Krivtsova (Ukraine)
- Coupled Ammonia-Salt/Metal Hydride Sorption Device. 865
E. Willers, M. Groll (Germany)
- Stationary Storage Systems**
- The Solar-Hydrogen Saphys Project: Operating Results. 877
S. Galli (Italy)
- Cycling Performance of Metal Hydride - Air Rechargeable Cells. 887
S. Gamburzev, A.J. Appleby, A. Visintin (USA/Argentina)
- Technical and Economical Practicability of Carbon Nanostructures Hydrogen Storage Systems. 893
H. Klos, W. Schütz (Germany)
- Simulation and Evaluation of a Hydrogen Storage System using Hydrogen Storage Alloy for a Chemical CO₂ Fixation and Utilization System. 899
K. Nishimura, C. Inazumi, K. Oguro, I. Uehara, S. Fujitani, K. Nishio (Japan)

- Structural and Technological Features of Ground Fuel Supply of Civil Aviation Airports with Liquid Hydrogen. 907
S.K. Postoev, A.M. Domashenko

- Optimisation of Seasonal Energy Storage in Stationary Systems with Liquid Hydrogen Carriers, Decalin and Methylcyclohexane. 935
E. Newson, T.B. Truong, P. Hottinger, F. von Roth, Th. Schucan (Switzerland)

Mobile Storage Systems

- Analysis of Hydrogen Vehicles with Cryogenic High Pressure Storage. 943
S.M. Aceves, G.D. Berry (USA)

- Catalyst Screening for Hydrogen Production in Mobile Systems by the Partial Oxidation of Methanol or Hydrocarbons. 953
E. Newson, E. Uenala, K. Geissler, P Hottinger, T. B. Truong, F von Roth (Switzerland)

- Adding New Hydrogen to the existing Gas Infrastructure in the Netherlands, using the Carbon Black and Hydrogen process. 963
R.A. Wijbrans, J. M. van Zutphen, D.H. Recter (The Netherlands)

Physico-chemical Storage

- Temperature Dependence of the Long-Term Degradation Behaviour of LANI₅ and LANI_{4,7}AL_{0,3}. 969
M. Wanner, T. Oberle, E. Willers, M. Groll (Germany)

- Performance Study of Hydrogen Adsorption Storage Systems. 979
R. Chahine, P. Bénard (Canada)

- Electrochemical Quartz Crystal Microbalance (EQCM) Viscoelastic Studies of Nickel Hydroxide Electrodes for Metal-Hydride Batteries. 987
R.A. Etchenique, E.J. Calvo (Argentina)

- Evaluation of the Heat of Solution of Hydrogen in Metals using the Jellium Model. 997
J.L. Gervasoni, M.J. Maresca, J.O. Sofo, J.P. Abriata (Argentina)

Anelastic Studies in a Magnesium Composite Containing Hydrided Laves Phase Particles. <i>A.A. Ghilarducci, H.A. Peretti, H.L. Corso, H.R. Salva, J.C. Bolcich (Argentina)</i>	1005	Hydrogen Transport and Storage Technologies using Metal Hydrides. <i>T. Gamo, Y. Morita, S. Kuranaka, J. Suzuki, M. Uchida, A. Ohta, N. Itoh (Japan)</i>	1105
Kinetics of Hydrogen Absorption of Al-Doped $MmNi_5$. <i>G.E. Fernández, D. Rodríguez, G. Meyer (Argentina)</i>	1015	Investigation of Thermal Conductivity of Metal-Hydrides at One-Sided Heating. <i>K. Isayev, D. Schur (Ukraine)</i>	1115
Hydrogen Evolution on the Ni-P Alloy. A Study of Reaction Mechanisms. <i>T. Burchardt, T. Valand (Norway)</i>	1025	Modeling of Hydrogen Adsorption on Activated Carbon Over the 77K to 273K Range. <i>P. Bénard, R. Chahine (Canada)</i>	1121
Wire and Strip Form Specimens of $Pd_{81}Pt_{19}$ Alloys as Monitors of Hydrogen Solubility and Hydrogen Chemical Potential. <i>F.A. Lewis, K. Kandasamy (Ireland/Sri Lanka)</i>	1033	Experimental Investigation of a Multi-Hydride Thermal Wave Device for Simultaneous Heating and Cooling. <i>E. Willers, M. Groll (Germany)</i>	1131
Study of Hydrogen Content in Hydrogenated FeTi Thin Films using ERDA. <i>I.P. Jain, B. Devi, P. Sharma, A. Williamson, Y.K. Vijay, D.K. Avasthi, A. Tripathi (India)</i>	1037	Charge/Discharge Performance of the Experimental Nickel/Metal Hydride Battery. <i>M. Geng, J. Han, F. Feng, D.O. Northwood (Canada)</i>	1143
Hydrogen and Sulphur Production by Indirect Electrolysis of Hydrogen Sulphide. <i>Y. Ying, Y. Yingtao, W. Fei, Z. Yongfeng (China)</i>	1047	The Inner Cell Pressure Characteristics of Sealed Type Ni-MH Rechargeable Battery using Zr-Ti-Mn-V-Ni Hydrogen Storage Alloy as Anode. <i>D-M. Kim, J-S. Yu, S-M. Lee, K-J. Jang, J-Y. Lee (Korea)</i>	1153
Cyclic Charge and Discharge Stability of Nanocrystalline Mg_2Ni Alloy. <i>Z. Dehouche, J. Goyette, T.K. Bose, S. Boily, J. Huot, R. Schulz (Canada)</i>	1055	Effect of Interatomic Interaction between Hydrogen and Ruthenium on the Isotropic-Anisotropic State Transition. Hydrogen Adsorption. <i>S. Zaginaichenko, Z. Matysina, D. Schur (Ukraine)</i>	1163
Water Resistant Metal Hydrides Encapsulated in Hydrophobic Ceramic Shells. <i>N. Nishimiya, M. Suzuki, T. Wada, A. Matsumoto, K. Tsutsumi (Japan)</i>	1065	Evaluation of Metal Hydride Decomposition Kinetics, Utilizing the Normalized Pressure Dependence Method. <i>M. Ron, V.M. Skripnyuk (Israel)</i>	1173
Kinetic and Equilibrium Properties of the Fluorinated Laves-phase Hydriding Alloys. <i>X.P. Gao, B.H. Liu, M. Imai, H. Ohta, S. Suda (Japan)</i>	1075	Effect of Processing Parameters on MG-Based Hydrogen Storage Materials Prepared by Mechanical Alloying. <i>K. Sapru, L. Ming, J. Evans, N.T. Stetson (USA)</i>	1183
Improvement of the Activation Stage of the Hydride forming $MMNi_{4.7}Al_{0.3}$ Alloy by Surface Flourination. <i>D.S. Rodríguez, G. Meyer (Argentina)</i>	1085	Electrochemical Behavior of Zr-based AB_2 Type Alloys Partially Substituted by Ti. <i>A. Visintin, H.A. Peretti, C. Tori, J.C. Bolcich, W.E. Triaca (Argentina)</i>	1193
Temperature Dependence of the Hydride Formation Kinetics in ZRY-4. <i>G.E. Fernández, D. Rodríguez, G. Meyer (Argentina)</i>	1095	Hydrogen Storage by Adsorption in Zeolites: Influence of Cation Exchanged in Zeolites A and X.	1201

<i>F. Darkrim, P. Malbrunot (France)</i> An Integrated Hydrogen Production/Storage System based on PV/Electrolysis/Metal Hydrides for Near-Term Applications. <i>K. Saprú, N.T. Stetson, S.R. Ovshinsky (USA)</i>	1211	Dynamic Storage of Hydrogen by Adsorption at Room Temperature and High Pressure. <i>M. Lamari, A. Aoufi, P. Malbrunot (France)</i>	1307
Promotion of Fullerene Hydride Synthesis by Intermetallic Compounds. <i>B.P. Tarasov, V.N. Fokin, A.P. Moravsky, Y.M. Shul'ga, V.A. Yartys, D.V. Schur (Russia/Ukraine)</i>	1221	Toward Low NO _x Hydrogen Fueled Internal Combustion Engine. <i>V. Medica, B. Frankovic (Croatia)</i>	1317
Hydrogen Transport and Distribution.		VGF (Variable Gaseous Fuel) Vehicles Using Hydrogen and Natural Gas. <i>J. Heffel, N. Hill, J.M. Norbeck, P.B. Scott (USA)</i>	1325
Analysis of Shipping Hydrogen. <i>S. Belak (Croatia)</i>	1231	Performance of an Alkaline Fuel Cell System Using Three-Dimensional Electrodes. <i>T. Nakagawa, A. Tsutsumi, K. Yoshida (Japan)</i>	1333
CHAPTER 4. Technologies of Hydrogen Utilization		A Solution Model for an Economically Sustainable Development. <i>W. Seifritz, B. Fritsch (Switzerland)</i>	1339
Performance Tests of a Multicell, Low Catalyst Loading, 100W PEM Fuel Cell Stack. <i>V.A. Paganin, E.A. Ticianelli, E.R. Gonzalez (Brazil)</i>	1235	Evaluation of a Lean Burn Hydrogen Fueled Engine for Hybrid Electric Vehicles. <i>Y. Nakajima, M. Hiruma, K. Yamane, T. Shudo, S. Furuhashi, Y. Takagi (Japan)</i>	1359
Evaluation Tool for Selection and Optimisation of Hydrogen Demonstration Projects. Application to a Decentralised Renewable Hydrogen System. <i>M. Bracht, A. de Groot, C.E. Gregoire Padro, T.H. Schucan, E. Skolnik (The Netherlands/USA/Switzerland)</i>	1243	Devices for the Removal of Hydrogen. <i>P. Bröckerhoff, E.A. Reinecke, M. Voswinckel (Germany)</i>	1369
Analysis of Hydrogen/Oxygen Combustor Heat Transfer and Structural Failure. <i>D. Kuhl, K. Fröhlke, O.J. Haidn (Germany)</i>	1255	Testing of Fuel Cells for Automotive Applications at I.N.T.A. <i>F. Isorna, E. López, F. Rosa (Spain)</i>	1379
Hydrogen Fueled Cell Powered Vehicle Development. <i>B.S. Oh, K. Özay, T.N. Veziroglu (Korea/USA)</i>	1265	Determination of Hydrogen Content in Massive Samples Using Neutron Techniques. <i>J.R. Santisteban, J.R. Granada, R.E. Mayer (Argentina)</i>	1389
Ecological Low Polluting City Bus with Regeneration of Braking Energy. <i>G.A. Durán (Argentina)</i>	1281	Rate Limiting Step Identification on Hydrogen Desorption Using Thermal Desorption Spectroscopy. <i>F.J. Castro, G. Meyer (Argentina)</i>	1399
Computational Simulation and Experimental Investigation of the Catalytic Combustion of Hydrogen on Platinum and Palladium. <i>J. Warnatz (Germany)</i>	1291	Amount of Hydrogen and Loss of Ductility in Welded Joints of Zircaloy-4. <i>L. Fernández, G. Fernández, H.L. Corso, R. Martínez, F. Tiglió, O. A. González, G. Meyer (Argentina)</i>	1409
Thermodynamic Design of a Car Engine with External Hydrogen-Air Mixture Formation. <i>D. Dini (Italy)</i>	1297		

Combustion Systems			
Evaluation of Heat Exchangers Powered by Electrolytic Hydrogen/Oxygen. <i>M. A. Motta Sobrinho, J. Goldfarb, K.B. França (Brazil)</i>	1415		
Hydrogen C.I. Large Bore Four Stroke Engine: Ignition and Combustion Process Analyzed with High Speed Optical Measurement Systems. <i>P. Prechtel, F. Dorer, F. Mayinger, C. Vogel, V. Schnurbein (Germany)</i>	1425		
Hydrogen Internal Combustion Stirling Engine. <i>S. Takahashi, H. Furutani, N. Iki, J. Hama, I. Yamashita (Japan)</i>	1437		
Examination of the Effects of the Presence of Some Gaseous Fuels and Preignition Reaction Products with Hydrogen in Engines. <i>Y.K. Wong, G.A. Karim (Canada)</i>	1447		
High Pressure Hydrogen Injection System for a Large Bore 4 Stroke Diesel Engine: Investigation of the Mixture Formation with Laser-Optical Measurement Techniques and Numerical Simulations. <i>F. Dorer, P. Prechtel, F. Mayinger, C. Vogel, V. Schnurbein (Germany)</i>	1457		
Performance and NO _x Formation in a Hydrogen Premixed-Charge Engine. <i>M. Shioji, N. Inoue (Japan)</i>	1469		
Combustion Properties of Stoichiometric Hydrogen-Oxygen-Steam Mixture in Steam Environment. <i>N. Iki, H. Furutani, J. Hama, S. Takahashi (Japan)</i>	1479		
The Ignition of H ₂ -O ₂ -Ar Mixture Flows with ArF Excimer Laser - The influence of the flow speed, temperature and adding of ozone. <i>H. Furutani, F. Liu, N. Iki, J. Hama, S. Takahashi (Japan)</i>	1489		
Research and Development of an Initial Model of Hydrogen Turbine Combustor for WE-NET Project in Japan. <i>M. Murayama, H. Toh, S. Yasu, T. Saito (Japan)</i>	1497		
A Study of 50 MW Hydrogen Combustion Turbines. <i>H. Mori, H. Sugishita, K. Uematsu (Japan)</i>	1505		
Investigation of a Direct Injecting Hydrogen Diesel-Engine. <i>H. Rottengruber, U. Wiebicke, G. Woschni, K. Zeilinger (Germany)</i>	1515		
		Backfire Mechanism in a Carburetted Hydrogen Fuelled Engine. <i>R. Sierens, E. Rosseel (Belgium)</i>	1537
		Hydrogen Fueled Integral Combustion Engine. Its Implementation on a Renault 9 Car. <i>E. Fernández Navarro, J.C. Bolcich, E. Tagliabore, G. Widman, M. Iwan, A.J.A. Bolcich (Argentina)</i>	1547
		Research and Development of Hydrogen Combustion Turbine System in World Energy Network Project in Japan. <i>T. Tsukagoshi, K. Mouri, T. Hisamatsu, M. Watanabe (Japan)</i>	1557
		Analytical Studies to Optimize the Design and Operating Parameters for a Hydrogen-Fueled 4-Stroke Spark Ignition Engines. <i>J.A.A. Yamin, H.N. Gupta, B.B. Bansal, O.N. Srivastava (India)</i>	1573
		Fuel Cells	
		Technical Challenges in PEM Fuel Cell Development. <i>F. Barbir (USA)</i>	1589
		PEMA, DLR's Membrane Fuel Cell Test Facility for Stationary and Mobile Applications. <i>A. Brinner, E. Hartmann, W. Hoyer, W. Hug, W. Schnurnberger (Germany)</i>	1597
		Fuel Cells for Portable Applications. <i>A. Heinzl, R. Nolte, O. Rau, M. Zedda (Germany)</i>	1607
		Fuel Cell Electric Vehicles. An Italian Project to Develop a Hydrogen Generator. <i>V. Recupero, L. Pino, M. Laganà, A. Ciancia, A. Iacobazzi (Italy)</i>	1611
		Experience with an Alkaline Fuel Cell Stack: Test Plant, Measurements and Analysis of the Results. <i>A. Vegas, C. García, A. González (Spain)</i>	1621
		A Rapid Fill Hydrogen Fuel Station for Fuel Cell Buses. <i>V. Raman, D. Farese, J. Hansel, F. Lynch (USA)</i>	1629
		A Novel Hybrid Power Source Incorporating a PEM Fuel Cell Stack for Frigid-Zone Applications. <i>J. Cargnelli, R.B. Gopal, P. Rivard, T.K. Bose (Canada)</i>	1643

Characterization and Innovative Production Technique for PEFC and DMFC Electrodes. <i>E. Gülzow, A. Helmbold, N. Wagner, R. Reißner, M. Schulze, W. Schnurnberger (Germany)</i>	1653
Cycling Performance of Metal Hydride - Air Rechargeable Cells. <i>S. Gamburgzev, A.J. Appleby, A. Visintin (USA/Argentina)</i>	1663
Air and Space Projects	
Cryogenic Fuel Aviation Complex as the Basis for Using Liquid Hydrogen in Civil Aviation. <i>S.K. Postoev, V.S. Streliaev (Russia)</i>	1671
Systems Modelling and Simulation	
Compressibility Factor for Mixtures of Natural Gas and Hydrogen: Comparison Between Experimental and Calculated Values Using Supertrapp <i>A. Hourri, R. Okambawa, P. Bénard, T.K. Bose (Canada)</i>	1679
Lessons Learnt from the Experiments with EQHHPP Model Tank. <i>U. Schmidtchen, G. Würsig, N. Wöhren, E. Behrend (Germany)</i>	1689
Design of an Isolated Wind-Hydrogen Energy Supply System. <i>M. Altmann, F. Gamallo (Germany/Argentina)</i>	1699
Transport Phenomena in Two Dimensional Hydrogen-Oxygen PEM Fuel Cells. <i>V. Gurau, H. Liu (USA)</i>	1707
Mathematical Model for Determining the Accumulated Hydrogen Reserve in Wind-Generated Electricity at Distant Sites. <i>V.W. Spinadel, F. Gamallo, E. Spinadel (Argentina)</i>	1719
Hydrogen and Profit in Making the World Work for Everyone. <i>D. Haberman, P.B. Scott (USA)</i>	1729

Volume 3

CHAPTER 5 Materials and Safety

Assessment of Thermal Hazards Resulting from Accidental Liquid Hydrogen	1735
---	------

Spills.

<i>P. Bénard, V. Mustafa, M. Ferland, A. Chabbaz, D.R. Hay (Canada)</i>	
Analysis of a Large Scale Liquid Hydrogen Spill Experiment Using the Multi-Phase Hydrodynamics Analysis Code (Champagne) - part 2. <i>K. Chitose, Y. Ogawa, M. Hishida, T. Morii (Japan)</i>	1745
Microbiological Influences on Hydrogen Effects on Steels. <i>R.G.J. Edyvean, J. Benson, I.B. Beech, H.A. Videla (UK/Argentina)</i>	1755
Mechanical Properties of AA5083 Aluminum Alloy and its Weld Metal at Low Temperature (Study on low temperature materials used in WE-NET 6). <i>M. Hayashi, M. Yabumoto, H. Fujii, T. Iida, H. Eguchi (Japan)</i>	1763
Hydrogen Diffusion in Ordered Magnetic Alloys. Pressure Effect. <i>S.Y. Zaginaichenko, Z. Matysina (Ukraine)</i>	1773
Investigation of Kinetics of Phase Transitions in Zirconium Hydride. <i>D. Schur, S. Zaginaichenko, B. Tarasov, V. Pishuk (Ukraine/Russia)</i>	1781
Topochemistry and Special Features of Zirconium Reaction with Atomic Hydrogen. <i>D. Schur (Ukraine)</i>	1795
Materials Behaviour in Low Temperature Tribosystems. <i>W. Hübner, Th. Gradt, Th. Schneider (Germany)</i>	1801
Hydrogen Embrittlement on Austenitic Stainless Steels and their Welds. <i>A. Hazarabedian, M.I. Lупpo, J. Ovejero-García (Argentina)</i>	1813
Materials for Hydrogen Technologies	
Hydrogen Manufacture, Storage and Utilisation: The Role of Nickel. <i>H.C. Angus (UK)</i>	1823
Test Loop for Hydrogen Embrittlement Studies of Steel. <i>J.L. Aprea, G.M. Bertolino, J. Pérez Ipiña, G. Meyer, J.C. Bolcich (Argentina)</i>	1833
Characterisation of Magnetic Refrigeration Materials for Hydrogen Liquefaction. <i>R.B. Gopal, R. Chahine, T.K. Bose (Canada)</i>	1843

Effects of δ -Ferrite Phase on the Mechanical Properties of the Weld Metals of Austenitic Stainless Steels at Low Temperature (Study on low temperature materials used in WE-NET 5). <i>H. Nakagawa, M. Yabumoto, M. Saito, S. Okaguchi, H. Fujii, Y. Wada, T. Iida, T. Ogata (Japan)</i>	1853
Hydrogen Environment Embrittlement of Austenitic Stainless Steels at Low Temperatures (Study on low teperature materials used in WE-NET 7). <i>G. Han, J. He, S. Fukuyama, K. Yokogawa (Japan)</i>	1863
Magnetic Refrigeration Materials for Hydrogen Liquefaction. <i>M. Földeàki, R. Chahine, T.K. Bose (Canada)</i>	1873
Plastic Composite Materials for Cryogenic Storage of Hydrogen. <i>A. Schroder Pedersen (Denmark)</i>	1883
Evaluation of Mechanical Properties of Austenitic Stainless Steels and Aluminum Alloy in Liquid Hydrogen. (Study on low temperature materials used in WE-NET 4). <i>H. Fujii, A. Yamamoto, M. Yabumoto, T. Ogata, M. Hayashi, M. Saito, S. Okaguchi, Y. Wada, H. Nakagawa (Japan)</i>	1893
Hydrogen Microprint Technique Applied to Observe Hydrogen Transportation in Metallic Materials. <i>A. Nagao, S. Kuramoto, M. Kanno (Japan)</i>	1903
Theoretical Investigation of Isoleths of Hydrogen Solubility in Metals and Alloys. <i>S. Zaginaichenko, Z. Matysina, D. Schur, V. Pishuk (Ukraine)</i>	1913
Safety Aspects of Hydrogen and its Application	
System Safety Considerations for a Hydrogen Engine. <i>L.M. Das (India)</i>	1913
Rich Flammability Limits of Fuel Mixtures Involving Hydrogen at Elevated Temperatures. <i>B.B. Ale, I. Wierzba (Canada)</i>	1935
Safety Concept of the Solar Hydrogen Demonstration Plant at Neunburg vorm Wald, Germany. <i>H. Rainer (Germany)</i>	1945

Hydrogen Systems Safety Assessment and Risk-Reduction. <i>M. Sanai (USA)</i>	1955
Prevention of Detonation Burning in Hydrogen - Air Mixtures with High Efficient Inhibitor. <i>V.V. Azatyan, R.G. Ayvazyan, G.K. Vedeshkin, V.A. Iskra (Russia)</i>	1965
The Simulation of a Membrane Reactor for Generating Hydrogen from Methanol for a P.E.M. Fuel Cell Power System. <i>J.C. Amphlett, L.M. Kearns, R.F. Mann, B.A. Peppley, J.P. Salvador (Canada)</i>	1977
CHAPTER 6 Standards and Regulations	
Photoelectrochemistry	
Development of New Materials and Approaches to H ₂ -Evolving Photocatalytic Systems. <i>C.A. Linkous, D.K. Slattery (USA)</i>	1987
Photoelectrochemical Characteristics of Fluorinated SrTiO ₃ Photoelectrodes. <i>A.G. Sarkissyan, K.H. Begoyan, E.L. Ignatyan, E.A. Khachatourian, G.E. Shahnazaryan (Armenia)</i>	1997
Possibilities of the GaAs _{0.6} P _{0.4} - Electrolyte Barrier for Water Photolysis. <i>E. Vigil, I. Zumeta, C. Nuñez, B. González, M. Fernández (Cuba)</i>	2001
Biological Hydrogen Production	
Photoproduction of Hydrogen. Annex 10 of the IEA Hydrogen Programme. <i>B. Gaudernack (Norway)</i>	2011 2014
Outdoor Operation of Bioreactor using Photosynthetic Bacteria and Effect of Dark Reaction. <i>Y. Kitajima, S. Otsuka, Y. Ueno, S. Kawasaki, M. Morimoto (Japan)</i>	2025
Nostoc sp. Strain PCC 73102 and H ₂ : Knowledge, Research, and Biotechnological Challenges. <i>P. Lindblad, A. Hansel, F. Oxelfelt, P. Tamagnini (Sweden)</i>	2035
New Photobioreactor for Application of Biological Hydrogen Production. <i>M. Modigell, N. Holle (Germany)</i>	2045

FALTA

Technoeconomic Assessment of Four Biomass-to-Hydrogen Conversion Technologies. <i>P.L. Spath, M.K. Mann (USA)</i>	2057
Biotechnological Approach for Future Use of Solar Energy: Photohydrogen Production by the Green Alga <i>Scenedesmus Obliquus</i> and the Cyanobacterium <i>Synechocystis</i> sp. PCC 6803. <i>R. Schulz, J. Appel, S. Phunpruch, K. Stangier, R. Wünschiers (Germany)</i>	2069
Hydrogen Production by Floating-Type Photobioreactor <i>T. Otsuki, S. Uchiyama, T. Ichikawa, S. Fukunaga (Japan)</i>	2079
Innovative Materials and Processes	
Overall Efficiency Analysis of a High Efficiency Solar-Hydrogen-Generating System. <i>A.R. Shahin, T.N. Veziroglu (USA)</i>	2089
Determination of the Solubility of H ₂ Gas in Different Electrolytic Solutions of Non-Aqueous Solvents with a Novel Solid State Electrochemical Sensor. <i>M.A. Estes, R.C.V. Piatti, J.J. Podestá (Spain/Argentina)</i>	2107
Synthesis of La-Co-Oxides: Electrocatalytic Activity for the Oxygen Evolution in Alkaline Media. <i>G. Almazan-Torres, S.M. Fernández-Valverde (Mexico)</i>	2113
Progress in Thin Film Catalytical Layers Formation for Reduced Temperature SOFC Applications. <i>N.I. Khramushin, G.S. Mezheritsky, Ju.I. Moskalev, I.N. Prilezhaeva, I.A. Rezvykh, A.N. Ryzkov (Russia)</i>	2119
Evaluation of Plasma Sprayed Cathodes for Hydrogen Evolution. <i>A.H. Fakeeha, T.F. Al-Fariss, I.S. Al-Mutaz, F.A. Abdelaleem, A. Idriss (Saudi Arabia)</i>	2129
Novel Method for Zirconium Oxide and Rare Earth-Transition Metal Perovskite Oxides Synthesis from Aqueous Solutions. <i>T. Yao, Y. Uchimoto, K. Kajahara (Japan)</i>	2139
An Impedance Analysis of the Doped Iron Oxide - Electrolyte Interface. <i>V.M. Aroutiounian, V.M. Arakelyan, G.E. Shahnazaryan, G.M. Stepanyan, J.A. Turner, S.S. Kocha (Armenia/USA)</i>	2149

Development of a High Pressure Liquid Hydrogen Pump with a Small Diameter. <i>K. Yamane, K. Yasuda, T. Nose, Y. Nakajima, S. Furuhamu (Japan)</i>	2159
Development of a New Reactor Fuel Material: Thermal Properties of U-Th-Zr-H Alloys. <i>H. Suwarno, M. Yamawaki, T. Yamamoto, F. Ono, K. Yamaguchi (Japan)</i>	2169
Mathematical Modelling	
Thermodynamic Analysis and Amorphous Formation in the Mg-Ni-H System. <i>M. Ruda, J. Abriata (Argentina)</i>	2189
Atomistic Simulation of H Effects in Metals and Intermetallics. <i>M. Ruda, D. Farkas, J. Abriata (Argentina/USA)</i>	2199
Instability of a Two-Phase Field in the Presence of a Temperature Gradient. Its Importance in the Case of Hydrogen-Metal Systems. <i>G.E. Fernández, H.E. Troiani, J.P. Abriata (Argentina)</i>	2207
Application of Physical and Mathematical Modeling in Hydrogen Separation and Purification Technology. <i>E.S. Gorkunov, V.M. Makarov, I.N. Veselov, A.B. Vandyshev, V.P. Phedotov, L.L. Muravyev, N.I. Tomofeev, V.K. Rudenco (Russia)</i>	2213
Parametrization of the Density of States Induced by a Hydrogen in a Metallic System. <i>S.A. Serebrinsky, J.L. Gervasoni (Argentina)</i>	2217
Investigations on Reversible System Electrolyzer PEM Fuel Cell. <i>V. Fateev, M. Tsyarkin, I.E. Baranov, E. Lutikova, V. Rusanov (Russia)</i>	2227
Comparison of the Experimental Values of the Density of Hythane with the Existing Equations of State for Natural Gas. <i>R. Okambawa, A. Hourri, J.M. St-Arnaud, T.K. Bose (Canada)</i>	2237
Modeling of Hydrogen Energy Systems of Remote Applications. <i>C.E. Gregoire Padró, V.L. Putsche, M. Fairlie (USA/Canada)</i>	2247
Hydrogen Storage in Carbon Nanotubes: A Montecarlo Simulation of Adsorption at High Pressure. <i>F. Darkrim, P. Malbrunot, D. Levesque (France)</i>	2263

CHAPTER 7 Standards and Regulations

Clean Energy Implementation and Standardization. 2271
G. R. Grob (Switzerland)

The Role of International Standardization for the safe practice of Hydrogen. 2283
T.K. Bose, D. Allard (Canada)

Sourcebook for Hydrogen Applications. 2291
T.K. Bose, J. Ohi (Canada/USA)

Role of the National Hydrogen Association in Codes and Standards Activities. 2309
J.G. Hansel, M. Fairlie, A. Coutts, R.L. Mauro, K.I. Miller (USA)
