| <b>Chapter 1</b> | <b>Introduction to Nondestructive Testing</b>          | <b>1.1</b> |
| 1.1              | What Is Nondestructive Testing?                        | 1.1        |
| 1.2              | Concerns Regarding NDT                                 | 1.2        |
| 1.3              | History of Nondestructive Testing                      | 1.3        |
| 1.4              | Nondestructive versus Destructive Tests                | 1.17       |
| 1.5              | Conditions for Effective Nondestructive Testing        | 1.20       |
| 1.6              | Personnel Considerations                               | 1.21       |
| 1.7              | Certification Summary                                  | 1.26       |
|                  | References   | 1.27       |
| <b>Chapter 2</b> | <b>Discontinuities—Origins and Classification</b>      | <b>2.1</b> |
| 2.1              | Primary Production of Metals                           | 2.2        |
| 2.2              | Casting  | 2.4        |
| 2.3              | Cracks   | 2.10       |
| 2.4              | Welding Discontinuities                                | 2.12       |
| 2.5              | Discontinuities Resulting from Plastic Deformation     | 2.15       |
| 2.6              | Corrosion-Induced Discontinuities                      | 2.15       |
| 2.7              | Operationally Induced Discontinuities—Fatigue Cracking | 2.18       |
| 2.8              | Operationally Induced Discontinuities—Creep            | 2.19       |
| 2.9              | Operationally Induced Discontinuities—Brittle Fracture | 2.20       |
| 2.10             | Geometric Discontinuities                              | 2.22       |
| 2.11             | Summary  | 2.23       |
| 2.12             | Glossary of Metallurgy and Discontinuity Terms         | 2.23       |
| 2.13             | Discontinuity Guide                                    | 2.27       |
| <b>Chapter 3</b> | <b>Visual Testing</b>                                  | <b>3.1</b> |
| 3.1              | History and Development                                | 3.1        |
| 3.2              | Theory and Principles                                  | 3.4        |
| 3.3              | Equipment and Accessories                              | 3.8        |
| 3.4              | Applications and Techniques                            | 3.22       |
| 3.5              | Evaluation and Reporting of Test Results               | 3.44       |
| 3.6              | Advantages and Limitations                             | 3.48       |
| 3.7              | Glossary of Key Terms                                  | 3.53       |
|                  | Bibliography   | 3.56       |

| <b>Chapter 4 Penetrant Testing</b>            | <b>4.1</b> |
| 4.1 Introduction                              | 4.1        |
| 4.2 History and Development                   | 4.1        |
| 4.3 Theory and Principles                     | 4.4        |
| 4.4 Penetrant Equipment and Materials         | 4.6        |
| 4.5 Penetrant Procedures                      | 4.13       |
| 4.6 Techniques and Variables                  | 4.19       |
| 4.7 Evaluation and Disposition                | 4.26       |
| 4.8 Penetrant Testing Applications            | 4.28       |
| 4.9 Quality Control Considerations            | 4.28       |
| 4.10 Advantages and Limitations               | 4.31       |
| 4.11 Glossary of Penetrant Testing Terms      | 4.31       |
