

Contents

Preface xiii

Chapter 1

Introduction 3

- 1.1 Preliminary Remarks 3
- 1.2 History and Scope of Fluid Mechanics 4
- 1.3 Problem-Solving Techniques 6
- 1.4 The Concept of a Fluid 6
- 1.5 The Fluid as a Continuum 8
- 1.6 Dimensions and Units 9
- 1.7 Properties of the Velocity Field 17
- 1.8 Thermodynamic Properties of a Fluid 18
- 1.9 Viscosity and Other Secondary Properties 25
- 1.10 Basic Flow Analysis Techniques 40
- 1.11 Flow Patterns: Streamlines, Streaklines, and Pathlines 41
- 1.12 The Engineering Equation Solver 46
- 1.13 Uncertainty in Experimental Data 46
- 1.14 The Fundamentals of Engineering (FE) Examination 48
 - Problems 49
 - Fundamentals of Engineering Exam Problems 58
 - Comprehensive Problems 59
 - References 61

Chapter 2

Pressure Distribution in a Fluid 65

- 2.1 Pressure and Pressure Gradient 65
- 2.2 Equilibrium of a Fluid Element 67
- 2.3 Hydrostatic Pressure Distributions 68
- 2.4 Application to Manometry 75

- 2.5 Hydrostatic Forces on Plane Surfaces 78
- 2.6 Hydrostatic Forces on Curved Surfaces 86
- 2.7 Hydrostatic Forces in Layered Fluids 89
- 2.8 Buoyancy and Stability 91
- 2.9 Pressure Distribution in Rigid-Body Motion 97
- 2.10 Pressure Measurement 105
 - Summary 109
 - Problems 109
 - Word Problems 135
 - Fundamentals of Engineering Exam Problems 136
 - Comprehensive Problems 136
 - Design Projects 138
 - References 139

Chapter 3

Integral Relations for a Control Volume 143

- 3.1 Basic Physical Laws of Fluid Mechanics 143
- 3.2 The Reynolds Transport Theorem 147
- 3.3 Conservation of Mass 154
- 3.4 The Linear Momentum Equation 159
- 3.5 Frictionless Flow: The Bernoulli Equation 173
- 3.6 The Angular Momentum Theorem 182
- 3.7 The Energy Equation 188
 - Summary 199
 - Problems 199
 - Word Problems 230
 - Fundamentals of Engineering Exam Problems 230
 - Comprehensive Problems 231
 - Design Project 233
 - References 233

Chapter 4

Differential Relations for Fluid Flow 235

4.1 The Acceleration Field of a Fluid—236

4.2 The Differential Equation of Mass Conservation 238

4.3 The Differential Equation of Linear Momentum 244

4.4 The Differential Equation of Angular Momentum 250

4.5 The Differential Equation of Energy 252

4.6 Boundary Conditions for the Basic Equations 255

4.7 The Stream Function 259

4.8 Vorticity and Irrotationality 267

4.9 Frictionless Irrotational Flows 269

4.10 Some Illustrative Incompressible Viscous Flows 274

Summary 282

Problems 283

Word Problems 295

Fundamentals of Engineering Exam Problems 296

Comprehensive Problems 296

References 297

Chapter 5

Dimensional Analysis and Similarity 301

5.1 Introduction 301

5.2 The Principle of Dimensional Homogeneity 304

5.3 The Pi Theorem 310

5.4 Nondimensionalization of the Basic Equations 320

5.5 Modeling and Its Pitfalls 329

Summary 341

Problems 341

Word Problems 350

Fundamentals of Engineering Exam Problems 350

Comprehensive Problems 351

Design Projects 352

References 353

Chapter 6

Viscous Flow in Ducts 357

6.1 Reynolds Number Regimes 357

6.2 Internal versus External Viscous Flows 362

6.3 Head Loss—The Friction Factor 365

6.4 Laminar Fully Developed Pipe Flow 367

6.5 Turbulence Modeling 369

6.6 Turbulent Pipe Flow 375

6.7 Four Types of Pipe Flow Problems 383

6.8 Flow in Noncircular Ducts 389

6.9 Minor or Local Losses in Pipe Systems 398

6.10 Multiple-Pipe Systems 407

6.11 Experimental Duct Flows: Diffuser Performance 413

6.12 Fluid Meters 418

Summary 439

Problems 440

Word Problems 460

Fundamentals of Engineering Exam Problems 461

Comprehensive Problems 461

Design Projects 464

References 465

Chapter 7

Flow Past Immersed Bodies 469

7.1 Reynolds Number and Geometry Effects 469

7.2 Momentum Integral Estimates 473

7.3 The Boundary Layer Equations 476

7.4 The Flat-Plate Boundary Layer 479

7.5 Boundary Layers with Pressure Gradient 488

7.6 Experimental External Flows 494

Summary 521

Problems 522

Word Problems 535

Fundamentals of Engineering Exam Problems 536

Comprehensive Problems 536

Design Project 538

References 538

Chapter 8

Potential Flow and Computational Fluid Dynamics 541

8.1 Introduction and Review 541

8.2 Elementary Plane Flow Solutions 544

8.3 Superposition of Plane Flow Solutions 551

8.4 Plane Flow Past Closed-Body Shapes 557

8.5 Other Plane Potential Flows 567

8.6 Images 571

8.7 Airfoil Theory 574

8.8 Axisymmetric Potential Flow 586

8.9 Numerical Analysis 591

Summary 605

Problems 606

Word Problems 617

Comprehensive Problems 618

Design Projects 619

References 619

Chapter 9

Compressible Flow 623

9.1 Introduction: Review of Thermodynamics 623

9.2 The Speed of Sound 628

9.3 Adiabatic and Isentropic Steady Flow 630

9.4 Isentropic Flow with Area Changes 636

9.5 The Normal Shock Wave 643

9.6 Operation of Converging and Diverging Nozzles 651

9.7 Compressible Duct Flow with Friction 656

9.8 Frictionless Duct Flow with Heat Transfer 668

9.9 Two-Dimensional Supersonic Flow 673

9.10 Prandtl-Meyer Expansion Waves 683

Summary 695

Problems 696

Word Problems 710

Fundamentals of Engineering Exam Problems 710

Comprehensive Problems 711

Design Projects 712

References 713

Chapter 10

Open-Channel Flow 715

10.1 Introduction 715

10.2 Uniform Flow: The Chézy Formula 721

10.3 Efficient Uniform-Flow Channels 726

10.4 Specific Energy: Critical Depth 728

10.5 The Hydraulic Jump 736

10.6 Gradually Varied Flow 740

10.7 Flow Measurement and Control by Weirs 748

Summary 755

Problems 755

Word Problems 768

Fundamentals of Engineering Exam Problems 769

Comprehensive Problems 769

Design Projects 770

References 771

Chapter 11

Turbomachinery 773

11.1 Introduction and Classification 773

11.2 The Centrifugal Pump 776

11.3 Pump Performance Curves and Similarity Rules 782

11.4 Mixed- and Axial-Flow Pumps: The Specific Speed 792

11.5 Matching Pumps to System Characteristics 799

11.6 Turbines 807

Summary 821

Problems 821

Word Problems 834

Comprehensive Problems 834

Design Project 836

References 836

Appendix A Physical Properties of Fluids 838

Appendix B Compressible Flow Tables 843

Appendix C Conversion Factors 850

Appendix D Equations of Motion in Cylindrical Coordinates 854

Answers to Selected Problems 856

Index 863
