

CONTENTS

Preface *ix*

Acknowledgments *xi*

Abbreviations and Symbols *xiii*

SECTION I: MR PHYSICS 1

- I-1. Overview of MRI and Basic Principles 3
- I-2. RF Excitation and Signal Generation 31
- I-3. Tissue Characteristics and Contrast Agents: PD, T1, and T2 42
- I-4. Echoes 51
- I-5. Spatial Localization and Introduction to k-Space 81
- I-6. k-Space 104
- I-7. More k-Space: The Relationship between k-Space and the Image 122
- I-8. Fast Scanning and k-Space Shortcuts 138
- I-9. Selectively Saturating, Nulling, and Exciting Protons 159
- I-10. Safety and Cardiovascular MRI 175

SECTION II: VASCULAR MR IMAGING 183

- II-1. Flow 185
- II-2. Time-of-Flight MR Angiography 197
 - ▷ Protocol: Carotid Artery MRA without Gadolinium Contrast 203
 - ▷ Protocol: Pelvic MR Venography without Gadolinium Contrast 203
- II-3. Phase Contrast MRI: Flow Quantification and MRA 204
 - ▷ Protocol: Aortic Coarctation 216
- II-4. Gadolinium-Enhanced MRA 217
 - ▷ Protocol: Carotid Artery MRA with Gadolinium Contrast 246

- ▷ Protocol: Thoracic Aorta MRA with Gadolinium Contrast 247
- ▷ Protocol: Abdominal Aorta/Renal Artery MRA with Gadolinium Contrast 248
- ▷ Protocol: Three-Station Peripheral MRA (Renal Arteries to Feet) with Gadolinium Contrast and Moving Table (Option A) 249
- ▷ Protocol: Four-Station Peripheral MRA (Renal Arteries to Feet) with Gadolinium Contrast and Manual Patient Move (Option B) 250
- ▷ Protocol: Three-Station Peripheral MRA (Renal Arteries to Feet) with Gadolinium Contrast with Separate Stations (Option C) 252
- ▷ Protocol: MR Venography of Chest with Gadolinium Contrast 254

SECTION III: CARDIAC MR IMAGING 255

- III-1. ECG Gating 257
- III-2. Cardiac Imaging Planes 266
- III-3. Black-Blood Imaging 274
- III-4. Cine Gradient Echo Imaging 283
 - ▷ Protocol: Left Ventricular Function 306
- III-5. Tissue Characterization in the Heart 307
 - ▷ Protocol: Cardiac Mass 322
 - ▷ Protocol: Cardiac Viability 323
 - ▷ Protocol: Arrhythmogenic Right Ventricular Dysplasia 324
- III-6. Phase Contrast Flow Quantification in the Heart 325
 - ▷ Protocol: Aortic Valve Disease 336
 - ▷ Protocol: Shunt Fraction Quantification 336

III-7. Ischemic Cardiac Disease 337

- ▷ Protocol: Ischemic heart Disease: Adenosine/Dipyridamole Perfusion Imaging 348
- ▷ Protocol: Ischemic Heart Disease: Dobutamine Contractility Imaging 349

III-8. Coronary Artery Imaging 350

- ▷ Protocol: Anomalous Coronary Arteries 359
- ▷ Protocol: Comprehensive Examination of Coronary Artery Disease 360

Answers to Review Questions 361

Glossary of Terms 387
