1	Black Holes and Hawking Radiation in Spacetime and Its Analogues	1
	Ted Jacobson	
1.1	Spacetime Geometry and Black Holes	1
1.1.1	Spacetime Geometry	1
1.1.2	Spherical Black Hole	2
1.1.3	Effective Black Hole and White Hole Spacetimes	7
1.1.4	Symmetries, Killing Vectors, and Conserved Quantities	8
1.1.5	Killing Horizons and Surface Gravity	11
1.2	Thermality of the Vacuum	14
1.3	Hawking Effect	17
1.3.1	Mode Solutions	19
1.3.2	Positive Norm Modes and the Local Vacuum	20
1.3.3	Stimulated Emission of Hawking Radiation	23
1.4	The Trans-Planckian Question	23
1.5	Short Wavelength Dispersion	24
1.5.1	Stimulated Hawking Radiation and Dispersion	26
1.5.2	White Hole Radiation	26
	References	28
2	Survey of Analogue Spacetimes	31
	Matt Visser	
2.1	Introduction	31
2.2	Optics: The Gordon Metric and Its Generalizations	32
2.3	Non-relativistic Acoustics: The Unruh Metric	35
2.4	Horizons and Ergo-Surfaces in Non-relativistic Acoustics	37
2.5	Relativistic Acoustics	41
2.6	Bose–Einstein Condensates	43
2.7	Surface Waves and Blocking Horizons	44
2.8	Optical Fibres/Optical Glass	46
2.9	Other Models	47
2.10	Discussion	47

References	47
