

CONTENTS

A more detailed contents list is given at the beginning of each chapter.

Preface, v

Chapter 1 (H. Czichos)

Introduction to friction and wear, 1

Abstract, 1

1. Friction and wear: sub-areas of tribology, 2
 2. Terminology, 2
 3. Mechanisms of friction, 3
 4. Mechanisms of wear, 11
 5. Friction and wear as system properties, 19
- References, 22

Chapter 2 (B.J. Briscoe)

Interfacial friction of polymer composites. General fundamental principles, 25

Abstract, 26

1. Introduction, 26
 2. Deformation or ploughing friction, 29
 3. Interfacial or adhesion friction, 37
 4. Other models of friction, 51
 5. Lubricated systems, 53
 6. Conclusions, 55
- References, 56

Chapter 3 (E. Hornbogen)

Friction and wear of materials with heterogeneous microstructures, 61

Abstract, 61

1. Introduction, 62
2. Types of microstructure and anisotropy, 63
3. Formal description of friction and wear, 66
4. The coefficient of wear and the role of macrohardness, 68
5. Components of the coefficient of friction, 70
6. Components of the wear coefficient, k , and the role of fracture, 71

7. Isotropic heterogeneous microstructures, 76
 8. Anisotropic structures, 79
 9. Relations between friction and wear, 85
- References, 88

Chapter 4 (J.M. Thorp)

Tribological properties of selected polymeric matrix composites against steel surfaces, 89

- Abstract, 90
1. Introduction, 91
 2. Experimental, 94
 3. Coefficients of friction given by selected polymeric materials against smooth steel, 100
 4. Coefficients of friction given by selected polymeric materials against an abrasive counterface, 107
 5. Abrasive wear of selected polymeric materials, 110
 6. Conclusions, 131
- References, 134

Chapter 5 (K. Tanaka)

Effects of various fillers on the friction and wear of PTFE-based composites, 137

- Abstract, 138
1. Introduction, 138
 2. Molecular and morphological characteristics of PTFE, 138
 3. Tribological characteristics of PTFE, 140
 4. Friction and wear of glass and carbon fiber-filled PTFE, 147
 5. Friction and wear of PTFE incorporating various fillers, 152
 6. Roles of various fillers incorporated in PTFE, 164
 7. Effect of water lubrication on the friction and wear of PTFE-based composites, 167
 8. Conclusions, 173
- References, 174

Chapter 6 (Z. Eliezer)

Friction and wear of metal matrix-graphite fiber composites, 175

- Abstract, 175
1. Introduction, 176
 2. Materials, 176
 3. Friction and wear behavior, 180

4. Wear mechanisms, 190
 5. Potential applications, 200
 6. Conclusions, 202
- References, 202

Chapter 7 (T. Tsukizoe and N. Ohmae)

Friction and wear performance of unidirectionally oriented glass, carbon, aramid and stainless steel fiber-reinforced plastics, 205

- Abstract, 205
1. Introduction, 206
 2. Experimental, 207
 3. Law of mixtures for calculating the friction coefficient, 210
 4. Results, 211
 5. The wear equation for FRP, 219
 6. Some topics related to the tribology of FRP, 221
 7. Concluding remarks, 229
- References, 230

Chapter 8 (K. Friedrich)

Wear of reinforced polymers by different abrasive counterparts, 233

- Abstract, 233
1. Introduction, 234
 2. Experimental details, 238
 3. Sliding wear against steel counterparts, 241
 4. Abrasion by hard abrasive particles, 258
 5. Concluding remarks, 281
- References, 285

Chapter 9 (J.-Å. Schweitz and L. Åhman)

Mild wear of rubber-based compounds, 289

- Abstract, 289
1. Introduction, 290
 2. Mechanical behaviour of rubber, 291
 3. Conditions and parameters influencing the wear process, 297
 4. Three phases of wear, 300
 5. Special wear patterns, 318
 6. Tendencies and suggestions, 323
- References, 325

Chapter 10 (J.C. Anderson)

The wear and friction of commercial polymers and composites, 329

Abstract, 329

1. Introduction, 330
 2. Applications, 331
 3. Performance rating, 333
 4. Basic friction and wear data, 333
 5. Factors affecting friction and wear, 338
 6. Factors influencing material selection, 350
 7. Selection of materials, 360
- References, 361

Chapter 11 (J.K. Lancaster)

Composites for aerospace dry bearing applications, 363

Abstract, 363

1. Introduction, 364
 2. Materials, 365
 3. Performance testing, 368
 4. Influence of operating parameters on performance, 373
 5. Materials development, 390
 6. Life prediction, 393
 7. Future trends, 394
- References, 395

Chapter 12 (M.N. Gardos)

Self-lubricating composites for extreme environmental conditions, 397

Abstract, 397

1. Introduction, 398
 2. Composites for extreme triboenvironments, 400
 3. Conclusions, 442
- References, 444

Author Index, 449

Subject Index, 457
