Preface	xi
About the Author	xv
Constants	xvii
1 Fundamentals of Optical Devices	1
1.0 Introduction	2
1.1 Laser Diodes and LEDs	4
1.1.1 Pn Junction and Energy Diagram	5
1.1.2 Direct and Indirect Semiconductors	6
1.1.3 Carrier Confinement	7
1.1.4 Spontaneous Emission and Stimulated Emission	8
1.1.5 Light-Emitting Diodes (LEDs)	9
1.1.6 Laser Diodes (LDs)	13
1.1.7 Single-Frequency Semiconductor Lasers	26
1.2 Photodetectors	32
1.2.1 Pn-Junction Photodiodes	32
1.2.2 Responsivity and Bandwidth	34
1.2.3 Electrical Characteristics of a Photodiode	36
1.2.4 Photodetector Noise and SNR	37
1.2.5 Avalanche Photodiodes (APDs)	41
1.3 Optical Fibers	44
1.3.1 Reflection and Refraction	44
1.3.2 Propagation Modes in Optical Fibers	49
1.3.3 Optical Fiber Attenuation	62
1.3.4 Group Velocity and Dispersion	67
1.3.5 Nonlinear Effects in an Optical Fiber	77
1.4 Optical Amplifiers	85
1.4.1 Optical Gain, Gain Bandwidth, and Saturation	86
1.4.2 Semiconductor Optical Amplifiers	89
1.4.3 Erbium-Doped Fiber Amplifiers (EDFAs)	100
1.5 External Electro-Optic Modulator	115
1.5.1 Basic Operation Principle of Electro-Optic Modulators	116

1.5.2	Frequency Doubling and Duo-Binary Modulation	121
1.5.3	Optical Single-Side Modulation	123
1.5.4	Optical Modulators Using Electro-Absorption Effect	125
2	Basic Instrumentation for Optical Measurement	129
2.0	Introduction	130
2.1	Grating-Based Optical Spectrum Analyzers	131
2.1.1	General Specifications	131
2.1.2	Fundamentals of Diffraction Gratings	134
2.1.3	Basic OSA Configurations	138
2.2	Scanning FP Interferometer	146
2.2.1	Basic FPI Configuration and Transfer Function	146
2.2.2	Scanning FPI Spectrum Analyzer	153
2.2.3	Scanning FPI Basic Optical Configurations	157
2.2.4	Optical Spectrum Analyzer Using the Combination of Grating and FPI	159
2.3	Mach-Zehnder Interferometers	160
2.3.1	Transfer Matrix of a 2×2 Optical Coupler	161
2.3.2	Transfer Function of an MZI	162
2.3.3	MZI Used as an Optical Filter	164
2.4	Michelson Interferometers	168
2.4.1	Operating Principle of a Michelson Interferometer	169
2.4.2	Measurement and Characterization of Michelson Interferometers	172
2.4.3	Techniques to Increase Frequency Selectivity	174
2.5	Optical Wavelength Meter	179
2.5.1	Operating Principle of a Wavelength Meter Based on Michelson Interferometer	180
2.5.2	Wavelength Coverage and Spectral Resolution	183
2.5.3	Wavelength Calibration	185
2.5.4	Wavelength Meter Based on Fizeau Wedge Interferometer	186
2.6	Optical Polarimeter	188
2.6.1	General Description of Lightwave Polarization	188
2.6.2	The Stokes Parameters and the Poincare Sphere	190
2.6.3	Optical Polarimeters	193
2.7	Measurement Based on Coherent Optical Detection	196
2.7.1	Operating Principle	196
2.7.2	Receiver SNR Calculation of Coherent Detection	199

2.7.3	Balanced Coherent Detection and Polarization Diversity	202
2.7.4	Phase Diversity in Coherent Homodyne Detection	204
2.7.5	Coherent OSA Based on Swept Frequency Laser	207
2.8	Waveform Measurement	211
2.8.1	Oscilloscope Operating Principle	212
2.8.2	Digital Sampling Oscilloscopes	216
2.8.3	High-Speed Sampling of Optical Signal	219
2.8.4	High-Speed Electric ADC Using Optical Techniques	223
2.8.5	Short Optical Pulse Measurement Using an Autocorrelator	224
2.9	Optical Low-Coherent Interferometry	232
2.9.1	Optical Low-Coherence Reflectometry	232
2.9.2	Fourier-Domain Reflectometry	240
2.10	Optical Network Analyzer	246
2.10.1	S-Parameters and RF Network Analyzer	246
2.10.2	Optical Network Analyzers	249
3	Characterization of Optical Devices	259
3.0	Introduction	260
3.1	Characterization of RIN and Linewidth of Semiconductor Lasers	260
3.1.1	Measurement of Relative Intensity Noise (RIN)	261
3.1.2	Measurement of Laser Phase Noise and Linewidth	266
3.2	Measurement of Electro-Optic Modulation Response	276
3.2.1	Characterization of Intensity Modulation Response	277
3.2.2	Measurement of Frequency Chirp	282
3.2.3	Time-Domain Measurement of Modulation-Induced Chirp	292
3.3	Wideband Characterization of an Optical Receiver	296
3.3.1	Characterization of Photodetector Responsivity and Linearity	297
3.3.2	Frequency Domain Characterization of Photodetector Response	299
3.3.3	Photodetector Bandwidth Characterization Using Source Spontaneous-Spontaneous Beat Noise	301
3.3.4	Photodetector Characterization Using Short Optical Pulses	304

3.4	Characterization of Optical Amplifiers	306
3.4.1	Measurement of Amplifier Optical Gain	306
3.4.2	Measurement of Static and Dynamic Gain Tilt	311
3.4.3	Optical Amplifier Noise	314
3.4.4	Optical Domain Characterization of ASE Noise	316
3.4.5	Impact of ASE Noise in Electrical Domain	318
3.4.6	Noise Figure Definition and Its Measurement	323
3.4.7	Time-Domain Characteristics of EDFA	327
3.5	Characterization of Passive Optical Components	329
3.5.1	Fiber-Optic Couplers	330
3.5.2	Fiber Bragg Grating Filters	335
3.5.3	WDM Multiplexers and Demultiplexers	340
3.5.4	Characterization of Optical Filter Transfer Functions	345
3.5.5	Optical Isolators and Circulators	353
4	Optical Fiber Measurement	365
4.0	Introduction	366
4.1	Classification of Fiber Types	367
4.1.1	Standard Optical Fibers for Transmission	367
4.1.2	Specialty Optical Fibers	370
4.2	Measurement of Fiber Mode-Field Distribution	374
4.2.1	Near-Field, Far-Field, and Mode-Field Diameter	375
4.2.2	Far-Field Measurement Techniques	378
4.2.3	Near-Field Measurement Techniques	380
4.3	Fiber Attenuation Measurement and OTDR	382
4.3.1	Cutback Technique	382
4.3.2	Optical Time-Domain Reflectometers	384
4.3.3	Improvement Considerations of OTDR	391
4.4	Fiber Dispersion Measurements	394
4.4.1	Intermodal Dispersion and Its Measurement	395
4.4.2	Chromatic Dispersion and Its Measurement	400
4.5	Polarization Mode Dispersion (PMD) Measurement	409
4.5.1	Representation of Fiber Birefringence and PMD Parameter	409
4.5.2	Pulse Delay Method	413
4.5.3	The Interferometric Method	415
4.5.4	Poincare Arc Method	418
4.5.5	Fixed Analyzer Method	420
4.5.6	The Jones Matrix Method	424
4.5.7	The Mueller Matrix Method	431

4.6	Determination of Polarization-Dependent Loss	438
4.7	PMD Sources and Emulators	442
4.8	Measurement of Fiber Nonlinearity	446
4.8.1	Measurement of Stimulated Brillouin Scattering Coefficient	447
4.8.2	Measurement of the Stimulated Raman Scattering Coefficient	453
4.8.3	Measurement of Kerr effect nonlinearity	459
5	Optical System Performance Measurements	481
5.0	Introduction	482
5.1	Overview of Fiber-Optic Transmission Systems	483
5.1.1	Optical System Performance Considerations	484
5.1.2	Receiver <i>BER</i> and <i>Q</i>	486
5.1.3	System <i>Q</i> Estimation Based on Eye Diagram Parameterization	494
5.1.4	Bit Error Rate Testing	499
5.2	Receiver Sensitivity Measurement and OSNR Tolerance	508
5.2.1	Receiver Sensitivity and Power Margin	509
5.2.2	OSNR Margin and Required OSNR (R-OSNR)	514
5.2.3	BER vs. Decision Threshold Measurement	521
5.3	Waveform Distortion Measurements	524
5.4	Jitter Measurement	527
5.4.1	Basic Jitter Parameters and Definitions	527
5.4.2	Jitter Detection Techniques	532
5.5	In-situ Monitoring of Linear Propagation Impairments	537
5.5.1	<i>In Situ</i> Monitoring of Chromatic Dispersion	537
5.5.2	<i>In Situ</i> PMD Monitoring	541
5.5.3	<i>In Situ</i> PDL Monitoring	551
5.6	Measurement of Nonlinear Crosstalk in Multi-Span WDM systems	556
5.6.1	XPM-Induced Intensity Modulation in IMDD Optical Systems	556
5.6.2	XPM-induced Phase Modulation	572
5.6.3	FWM-Induced Crosstalk in IMDD Optical Systems	575
5.6.4	Characterization of Raman Crosstalk with Wide Channel Separation	581

5.7	Modulation Instability and Its Impact in WDM Optical Systems	590
5.7.1	Modulation-instability and Transfer Matrix Formulation	590
5.7.2	Impact of Modulation Instability in Amplified Multispan Fiber Systems	600
5.7.3	Characterization of Modulation Instability in Fiber-Optic Systems	601
5.8	Optical System Performance Evaluation Based On Required OSNR	606
5.8.1	Measurement of R-SNR Due to Chromatic Dispersion	607
5.8.2	Measurement of R-SNR Due to Fiber Nonlinearity	610
5.8.3	Measurement of R-OSNR Due to Optical Filter Misalignment	615
5.9	Fiber-Optic Recirculating Loop	616
5.9.1	Operation Principle of a Recirculating Loop	617
5.9.2	Measurement Procedure and Time Control	618
5.9.3	Optical Gain Adjustment in the Loop	622
	Index	631
