

CONTENTS

Preface	v
list of Contributors	vii
CHAPTER 1. STABLE ISOTOPES AND OCEAN MIXING	
V.I. Ferronsky and V.S. Brezgunov	
Introduction	
Depth and latitude distribution in the ocean water	2
Oxygen and hydrogen stable isotopes and ocean dynamics	12
References	26
CHAPTER 2. RESTRICTED MARINE BASINS AND MARGINAL SEA ENVIRONMENTS	
D.A. Anati and J.R. Gat	
Water balance, water masses and circulation patterns in mediterranean seas	29
Water isotopes as related to the water balance and air-sea interaction process in mediterranean seas	44
Isotope hydrography of some marine basins	50
Highly evaporated marine lagoons	64
References	71
CHAPTER 3. CARBON-14 IN THE OCEANS	
U. Siegenthaler	
Introduction	75
Global cycling of carbon and of $\delta^{14}\text{C}$	78
Air-sea exchange of CO_2	81
The large-scale ^{14}C distribution and box models of the ocean	86
Radiocarbon and the deep ocean circulation	96
^{13}C in surface and thermocline waters	108
The anthropogenic carbon dioxide increase	116
Natural ^{14}C variations	122
The Mediterranean and other semi-enclosed seas	126
Radiocarbon dating of marine materials	128
References	130
CHAPTER 4. STABLE CARBON ISOTOPE STUDIES ON ORGANIC MATTER IN THE MARINE ENVIRONMENT	
W.M. Sackett	
Introduction	139
Photosynthetic signatures	139
Spatial $\delta^{13}\text{C}$ variations of dissolved and particulate organic carbon	144
Preservation of isotopic signature	147
Uses of carbon isotopic compositions	148
References	167

CHAPTER 5. STABLE CARBON ISOTOPES IN DISSOLVED INORGANIC CARBON IN MARINE AND ESTUARINE ENVIRONMENTS	171
F.C. Tan	
Introduction	171
Sources of carbon and $\delta^{13}\text{C}$ variations in natural waters	171
$\delta^{13}\text{C}$ distributions in marine environments	174
$\delta^{13}\text{C}$ distributions in estuarine environments	183
Appendix 1 Sampling and analytical procedures for the $\delta^{13}\text{C}$ of total dissolved inorganic carbon	188
Referentes	188
 CHAPTER 6. THE CARBON AND OXYGEN ISOTOPIC CHEMISTRY OF SURFICIAL HOLOCENE SHALLOW MARINE CARBONATE SEDIMENT AND QUATERNARY LIMESTONE AND DOLOMITE	191
L.S. Land	
Introduction	191
Sample analysis	192
Isotopic composition of skeletal shallow water marine carbonate sediment	193
Isotopic composition of non-skeletal shallow water marine carbonate sediment	204
Isotopic composition of Holocene dolomite	205
Isotopic composition of Quaternary limestones	206
Isotopic composition of Quaternary dolomite	210
Conclusions	211
Referentes	
 CHAPTER 7. OXYGEN-18 AND SULPHUR-34 IN DISSOLVED OCEANIC SULPHATE AND PHOSPHATE	219
A. Longinelli	
Introduction	219
Sulphur isotopic composition of dissolved marine sulphate	220
Oxygen isotopic composition of dissolved marine sulphate	222
Isotopic composition of dissolved sulphate from internal seas	227
Models for the isotopic steady state of oceanic sulphate	232
Oxygen isotopic composition of dissolved oceanic phosphate	242
Referentes	249
 CHAPTER 8. SEDIMENTATION AND DIAGENESIS IN RESTRICTED MARINE BASINS	257
C. Pierre	
Introduction	257
Isotopic parameters of the marine environment	258
Time variables in the sedimentary environment and their impact on the isotopic signal	259
Modern restricted marine environments: isotopic features	269
Conclusions	308
Referentes	309
 CHAPTER 9. THE STABLE ISOTOPE GEOCHEMISTRY OF DEEP-SEA PORE WATER	317
J.R. Lawrence	
Introduction	317
Principles of isotopic exchange during water/rock interaction	318
Reactants in the water/rock system of the ocean crust	320
Causes of chemical and isotopic changes observed in pore waters	321
Case studies	324
Polar ice volume effects	342

Water/rock interaction al mid-ocean ridges	344
Oxygen isotopic and chemical fluxes between the otean and lhe Earth's crusr and mande	345
Hydrogen isotope variations in pore waters	350
Pore waters from gas hydrate (clathrate) dissociation	351
Referentes	352
CHAPTER 10. URANIUM AND THORIUM DECAY SERIES IN THE MODERN MARINE ENVIRONMENT	357
M. Bernal and T.M. Church	
Introduction	357
Analytical techniques	358
Uranium	359
Thorium and protactinium	362
Radium	369
Radon	372
Lead and polonium	373
Conclusions	376
Referentes	376
CHAPTER 11. ARGON-39: A TOOL TO INVESTIGATE OCEAN WATER CIRCULA- TION AND MIXING	385
H.H. Loosli	
Introduction to the ³⁹ Ar method	385
Piar oceanic ³⁹ Ar results and their interpretation	386
Conclusions and summarav	391
Referentes	392
References Index	393
Subject Index	417
Index of Geographical Names	427
