HANDBOOK OF Noise Measurement

(SIXTH EDITION)

by Arnold P. G. Peterson
and Ervin E. Gross, Jr.

Price: \$2.00

GENERAL RADIO COMPANY

**Copyright 1963, 1967 by General Radio Company,
West Concord, Massachusetts. U.S.A.**

Printed in U.S.A. Form No. 5301-8111-H

TABLE OF CONTENTS

	<u>Page</u>
CHAPTER 1. INTRODUCTION.....	1
CHAPTER 2. WHAT ARE NOISE AND VIBRATION? . .	3
2.1 Introduction.	3
2.2 The Decibel-What is it?	4
2.3 Power Level	6
2.4 Sound-Pressure Level.	6
2.5 Sound Level.	8
2.6 Combining Decibels.	10
2.7 Analysis in Frequency Bands	11
Octave, 1/3 Octave, Narrow, Spectrum Level, Basic Uses for Noise Analysis	
2.8 Sound Fields	15
Simple Source in Free Field, Directional Source in Free Field, Simulated Free Field, Effect of Reflections in a Room, Measuring of Acoustic Power, Predict- ing Noise Levels	
2.9 Vibration.	32
Nature, Terms, Acceleration and Velocity, Non-sinusoidal	
2.10 Summary.	36
CHAPTER 3. WHAT NOISE AND VIBRATION DOES AND HOW MUCH IS ACCEPTABLE	39
3.1 Why We Measure Noise	39
3.2 Psychoacoustic Experiments.	39
3.3 Thresholds of Hearing.	41
3.4 What Noise Annoys an Oyster?	43
3.5 Rating Loudness.	44
3.6 Perceived Noise Level.	53
3.7 Noise and Number Index.	56
3.8 A-Weighted Sound Level as a Single- Number Rating.	57
3.9 Additional Hearing Characteristics	59
3.10 Masking	60
3.11 Residential Noise Levels	65
3.12 Hearing Loss from Noise Exposure	66
3.13 Effects of Noise	69
3.14 What Vibration Does	69

Effects on Man, Maintenance, Some
Specifications, Other Effects

CHAPTER	4. INSTRUMENTATION FOR NOISE AND VIBRATION	76
	4.1 General.	76
	4.2 Transducers Ceramic Microphones, Condenser Microphones, Hydrophones, Vibration Pickups	78
	4.3 The Sound-Level Meter	80
	4.4 The Vibration Meter	81
	4.5 Vibration Pickup Systems.	84
	4.6 Preamplifier	86
	4.7 Analyzers Octave Band, 1/3-Octave Band, 1% Band- width, Wave Analyzer	86
	4.8 The Graphic-Level Recorder	92
	4.9 Magnetic Tape Recorder	95
	4.10 Impact-Noise Analyzer	97
	4.11 Random-Noise Generator.	98
	4.12 Tone-Burst Generator.	98
	4.13 Earphone Couplers	99
	4.14 Oscilloscope	100
	4.15 Calibrators	100
	4.16 Recording Galvanometer	102
	4.17 Shakers.	104
	4.18 Stroboscopes	104
CHAPTER	5. WHAT NOISE AND VIBRATION MEASUREMENTS <u>SHOULD</u> BE MADE? .	108
	5.1 Introduction.	108
	5.2 Devices That are Noisy or Vibrate Excessively. Product Noise and Test Codes, Produc- tion-Line Testing, Product Development, Machinery Maintenance	109
	5.3 Environmental Noise Hearing Loss from Noise Exposure, Local Noise Ordinances, Noise Ratings, Motor Vehicle Noise	116
	5.4 Architectural Acoustics Sound Absorption, Sound Transmission Loss, Reverberation Time and Decay Rate, Response Testing, Tone-Burst Testing for Echoes, Site Selection	117

	<u>Page</u>
CHAPTER 6. TECHNIQUES, PRECAUTIONS AND CALIBRATIONS..	124
6.1 Sound	124
Choice and Use of Microphones, Effects of Room and Nearby Objects, Observer and Case, Room Design, Background Noise-Instrument Precautions, Calibration and Corrections, Earphones and Stethoscopes, Mounting of Device Under Test, Effects of Atmospheric Pressure, Record of Measurements	
6.2 Vibration Measuring Techniques ,	152
Choice and Use of Pickups, Stray Effects, Calibrations, Two-Pickup Method for Rotational Measurements	
CHAPTER 7. NOISE AND VIBRATION CONTROL	163
7.1 Introduction.	163
7.2 Noise Control at the Source	163
7.3 Control of Sound Path	164
7.4 Summary of Noise Reduction.	169
7.5 Vibration Reduction.	170
CHAPTER 8. SOME CASE HISTORIES.	185
8.1 The Noisy Compressor-Annoyance.	185
8.2 Braiding Machine Noise-Hazard	187
8.3 Flutter in a Tape Recorder-Design	187
8.4 Oil Pump Problem-Annoyance	189
8.5 Examples in Other Literature.	194
APPENDIXES	
I Decibel Conversion Tables.	199
II Chart for Combining Levels	208
III Table for Converting Loudness to Loudness Level.	210
IV Vibration Conversion Charts.	211
V Definitions of Noise Terms.	221
VI Words to Describe Sounds	234
VII References and Standards.	235
VIII Catalog Section	244
DIGITAL REAL-TIME ANALYSIS.	273
INDEX	279
