| PREFACE . . . . .   | v    |
| LIST OF SYMBOLS . . . . .   | xiii |
|   |      |
| 1. INTRODUCTION . . . . .   | 1    |
| 1.1 Historical Background . . . . .   | 1    |
| 1.11. Proposals I . . . . .   |      |
| 1.12. Survey of Experiment since 1960 . . . . .                                   |      |
| 1.2 Spectroscopic Preliminaries . . . . .   | 8    |
| 1.21. Alkali Atoms 8 . . . . .  |      |
| 1.22. Rare-gas Atoms 9 . . . . .  |      |
| 1.23. Molecules 11 . . . . .  |      |
| 1.3 Modes: The Gain Profile . . . . .   | 14   |
| 1.31. Modes of Optical Cavities 15 . . . . .                                      |      |
| 1.32. Optical Properties of the Medium near a Laser Line 19 . . . . .             |      |
| 1.33. Cavity Containing Active Medium 23 . . . . .                                |      |
| 1.34. Considerations Regarding Cavity Design 33 . . . . .                         |      |
|   |      |
| 2. PHYSICAL MECHANISMS . . . . .  | 38   |
| 2.1 The Establishment of Inverted Population in a Gas . . . . .                   | 38   |
| 2.11. List of Important Processes 39 . . . . .                                    |      |
| 2.12. Absorption and Emission 40 . . . . .  |      |
| 2.13. Entrapment of Radiation 43 . . . . .  |      |
| 2.14. Excitation by Electrons 44 . . . . .  |      |
| 2.15. Ionization by Electrons and by Photons 46 . . . . .                         |      |
| 2.16. Collisions of the Second Kind 47 . . . . .                                  |      |
| 2.17. Influence of the Walls 48 . . . . .   |      |
| 2.2 The Gas Discharge . . . . .   | 49   |
| 2.21. General Characteristics 49 . . . . .  |      |
| 2.22. The Positive Column 50 . . . . .  |      |
| 2.3 Experimental Techniques for Determining the Process Parameters . . . . .      | 54   |
| 2.31. Radiative Lifetimes 55 . . . . .  |      |
| 2.32. Cross Sections 55 . . . . .   |      |
| 2.33. Spectroscopic Techniques 56 . . . . .                                       |      |
| 2.34. Electron Density 57 . . . . .   |      |
| 2.35. Electron Temperatures 59 . . . . .  |      |
| 2.4 Specific Systems . . . . .  | 59   |
| 2.41. The Optically Pumped Cesium Laser 59 . . . . .                              |      |
| 2.42. 6328- $\text{\AA}$ , 1.15- $\mu$ , and 3.39- $\mu$ Neon Lasers 62 . . . . . |      |

|  |              |
|--|--------------|
| 2.43. Other Atomic Rare-gas Lasers               | 72           |
| 2.44. Ion Lasers                                 | 75           |
| 2.45. Molecular Lasers                           | 79           |
| <b>3. DESIGN PARAMETERS</b>                      | <b>83</b>    |
| 3.1 Hard w a r e                                 | 83           |
| 3.11. Tubes                                      | 83           |
| 3.12. Mirrors                                    | 86           |
| 3.13. Mechanical Arrangements                    | 89           |
| 3.14. Frequency-selective Cavities               | 91           |
| 3.15. Ring Lasers                                | 92           |
| 3.2 G a s e s                                    | 9 3          |
| 3.21. Purity                                     | 93           |
| 3.22. Isotopic Content                           | 93           |
| 3.3 Excitation                                   | 9 4          |
| 3.31. Radio-frequency Excitation                 | 94           |
| 3.32. Direct-current Excitation                  | 95           |
| 3.33. 60-cycle Excitation                        | 95           |
| 3.34. Pulsed Excitation                          | 96           |
| 3.4 Accessory Apparatus                          | 96           |
| 3.41. Isolators                                  | 96           |
| 3.42. Scanning Interferometers                   | 97           |
| <b>4. OUTPUT CHARACTERISTICS</b>                 | <b>100</b>   |
| 4.1 Output Characteristics of a Simple Gas Laser | 100          |
| 4.11. Ideal Characteristics                      | 100          |
| 4.12. Departures from Ideal Performance          | 109          |
| 4.2 Stabilization                                | 111          |
| 4.21. Amplitude Stabilization                    | 111          |
| 4.22. Frequency Stabilization                    | 111          |
| 4.3 Intracavity Modulation Schemes               | 113          |
| 4.31. Amplitude Modulation                       | 113          |
| 4.32. Frequency Modulation                       | 116          |
| 4.4 Magnetic Field Effects                       | 117          |
| 4.41. Elementary Treatment                       | 117          |
| 4.42. Mode Competition Effects                   | 120          |
| 4.5 Q Sw i t c h i n g                           | 122          |
| 4.51. Principles of Q Switching                  | 123          |
| 4.52. Q Switching of the Carbon Dioxide Laser    | 127          |
| <b>BIBLIOGRAPHY</b>                              | <b>1 2 9</b> |
| <b>INDEX.</b>                                    | <b>1 3 7</b> |
